Eco-Impacts and the Greening of Postmodernity - Tom Jagtenberg 1996-11-07

Addressing a growing need to examine environmental issues from a cultural perspective, this innovative book adopts a cultural studies approach to reach a deeper understanding of the significance of ecological issues in our lives. Eco-Impacts and the Greening of Postmodernity explores such vital questions as: Can nature survive? How do academic disciplines engage with environmental crises? And, how do we map sustainable futures? The authors, Tom Jagtenberg and David McKie, bring a body of relevant literature into the debate - that stems from both cultural and environmental issues - as well as their own multidisciplinary perspectives on the subject.

The Fourth Education Revolution - Anthony Seldon 2018

There is no more important issue facing education, or humanity at large, than the fast approaching revolution in Artificial Intelligence or AI. This book is a call to educators everywhere to open their eyes to what is coming. If we do so, then the future will be shaped by us in the interests of humanity as a whole.

Bibliographic Guide to the Environment - 1992

Dyslexia is My Superpower (Most of the Time) - Margaret Rooke 2017-09-21

In more than 100 interviews, children and young adults reveal their personal tips and tactics for honing the creative benefits of dyslexia, enabling them to thrive in school and beyond. Strategies include ways to develop confidence and self-belief. The contributors have outlined specific approaches they feel have helped them, and others that haven't. The book contains stunning illustrations by 8-18 year olds with dyslexia. The first-hand accounts are inspiring in the way they normalise dyslexia and reveal the many success stories. There is an additional section for professionals who work in education or special learning environments, with advice given by school students themselves.

Adventure and Society - Simon Beames 2018-12-28

This undergraduate textbook provides a broad overview of the ways in which 'adventurous practices' influence, and are influenced by, the world around them. The concept of adventure is one that is too often tackled within subject silos of philosophy, education, tourism, or leisure. While much of the analysis is strong, there is little cross-pollination between disciplines. Adventure & Society pulls together the threads of these discourses into one coherent treatment of the term 'adventure' and the role that it plays in human

social life of the 21st century. It explores how these practices can be considered more deeply through theoretical discourses of capitalism, identity construction, technology and social media, risk-taking, personal development, equalities, and sustainability. As such, the book speaks to a broad audience of undergraduate and postgraduate students across diverse subject areas, and aims to be an accessible starting point for deeper inquiry.

Tourism and China's Development - Julie Jie Wen 2001-03-15

China's continuing economic reforms since 1978 have substantially altered its economic structure, expanding the service sector, including the tourist industry. The reforms have resulted in spectacular economic growth and a boom in tourism development. But China's economic growth has been very uneven regionally and has been cause for political concern. The ability of tourism to counteract this uneven development and promote regionally decentralised development is therefore of special interest as is the sustainability of regional tourism, which often depends on nature conservation and the presence of minority cultures. This book addresses all those issues. Although focussed on China, it deals with issues such as those involving the sustainability of tourism, and convergence and divergence in regional tourism development and economic growth relevant to other geographical areas. Contents: Tourism, Economic Growth and Sustainable Development Tourism Development and Changing Policies in China: An Overview Regional Economic Disparity and Tourism Development: Theories and the Chinese Case Spatial Distribution of Tourism in China: Its Nature, Determinants and Consequences Trends in the Regional Distribution of Tourism in China and Their Implications Ecotourism: Its Nature, Sustainability, and Other Issues Evaluating Resources for Ecotourism, Particularly in China Tourism Development in Yunnan: A Case Study Unbalanced Growth, Growth Pole Theory and Tourism Development Identifying Whether Tourism is a Leading Sector or Growth Pole: Application of I-O Analysis China's Tourism Development in Retrospect and Prospect Readership: Undergraduates, graduate students, researchers and policy-makers in tourism management. Keywords: China; Economic Development; Ecotourism; Environmental Conservation; Environmental Economics; Growth Poles; Input-Output Analysis; Regional Development; Regional Economics; Sustainable Development; Tourism Development; Tourism in China; Tourism Policies; Tourism Economics; Tourism Management; Yunnan; Nature Conservation; Economy; Community; Value; Resource; Sustainability Reviews: "The strength of this book is that it 'deal[s] with many development issues that have not been considered in depth for China before' ... this volume makes its mark in the growing literature on tourism development in China. Despite its focus, it deals with issues such as convergence and divergence in regional tourism development and economic growth relevant to other geographical areas, which should be of interest to scholars specialized in the studies of local economic development." Annals of Tourism Research

Beyond Profit and Self-interest - Robert Scott Gassler 2003

Gassler (economics, Vrije U., Brussels) tries to establish some order in the chaos he sees resulting from economists expanding their portfolio to deal with just about everything in society. He does not offer a new

theory, but reformulates existing theory to make it more applicable across disciplines, illuminate its limitations and point out necessary extensions, show its successes, and provide some new extensions of his own. First he sets out the scope, method, foundations, and taxonomy of the theory; then he surveys applications in such contexts as interactions, non-profits, and planets. He writes for upper-division, graduate, and professional economists who are conversant in intermediate microeconomic theory, multivariable calculus, and statistics. Annotation : 2004 Book News, Inc., Portland, OR (booknews.com).
