Victorian Negatives - Susan E. Cook 2019-08-01

Argues that the photographic negative gives a new way of understanding Victorian debates surrounding origins and copies as well as reality and representation. *Victorian Negatives* examines the intersection between Victorian photography and literary culture, and argues that the development of the photographic negative played an instrumental role in their confluence. The negative is a technology that facilitates photographic reproduction by way of image inversion, and Susan E. Cook argues that this particular photographic technology influenced the British realist novel and literary celebrity culture, as authors grappled with the technology of inversion and reproduction in their lives and works. The book analyzes literary works by Charles Dickens, Arthur Conan Doyle, E. W. Hornung, Cyril Bennett, Robert Louis Stevenson, Oscar Wilde, Thomas Hardy, and Bram Stoker, and puts readings of those works into conversations with distinct

photographic forms, including the daguerreotype, solarization, forensic photography, common cabinet cards, double exposures, and postmortem portraiture. In addition to literary texts, the book analyzes photographic discourses from letters and public writings of photographers and the nineteenth-century press, as well as discussions and debates surrounding Victorian celebrity authorship. The book's focus on the negative both illuminates an oft-marginalized part of the history of photography and demonstrates the way in which this history is central to Victorian literary culture. "This is a fascinating and extremely specific discussion of the ways in which photography, more precisely negative technology, was 'culturally embedded' in the Victorian era. It is this precision that makes the book most compelling; as Cook herself notes, most literary scholars treat photography as a monolithic whole, but she offers a welcome specificity."

Mapping Across Academia - Stanley D. Brunn 2017-02-10
This book addresses the role and importance of space in the respective fields of the social sciences and the humanities. It discusses how map representations and mapping processes can inform ongoing intellectual debates or open new avenues for scholarly inquiry within and across disciplines, including a wide array of significant developments in spatial

processes, including the Internet, global positioning system (GPS), affordable digital photography and mobile technologies. Last but not least it reviews and assesses recent research challenges across disciplines that enhance our understanding of spatial processes and mapping at scales ranging from the molecular to the galactic.

Slow Travel: Dorset - Alexandra Richards 2019-04-08

This new third edition of Bradt's popular guide to Dorset - part of its distinctive series of 'Slow Travel' guides to local UK regions - has been thoroughly updated to reflect all the most recent changes to the region. Where - and what - to eat, where and when to go and what to see are all covered, providing an essential guide to one of Britain's most rural counties. The author, a Dorset girl born and bred, says: 'Many of Dorset's attractions are well-hidden and known only to locals, who like to keep the county's treasures to themselves. This guide takes you to those secret places and

introduces you to some delightful Dorset locals past and present. Practical information covers accommodation, eating and drinking, and travelling in this unspoilt region.' Dorset is quintessential rural England: rolling hills, thatched houses, narrow, winding lanes and stunning stately homes and gardens, all of which make it perfect for slowing down and discovering what really makes the region tick. The enchanting Dorset landscapes described in Thomas Hardy's 19th-century novels are largely unchanged and are likely to remain so as the county has the highest proportion of conservation areas in England. A sense of history is conveyed by innumerable sites of archaeological interest, including Britain's largest Iron Age hillfort, Maiden Castle, and the county is trimmed by the spectacular Jurassic Coast, England's first natural World Heritage Site, whose cliffs are constantly revealing their prehistoric, fossilised secrets. For walkers, the Dorset section

of the South West Coast Path, which includes part of the Jurassic Coast, offers some of the most spectacular seaside walks in England. This guide provides walking routes with maps to help you explore some of the finest sections of the coastal path, as well as other walks around the county. Whatever your interest, be it local food, brewery tours, peaceful waterways, horse-riding, beach walks or simply escaping to an unspoiled corner, Bradt's Dorset is the ideal companion.
