Gender and Security in Digital Space Gulizar Hacıyakupoglu 2022-11-10 Digital space offers new avenues, opportunities, and platforms in the fight for gender equality, and for the social, economic, and political participation of women and marginalised communities. However, the very same space plays host to gender inequalities and security threats with gendered implications. This edited volume ventures into complexities at the intersection of gender, security, and digital space, with a particular focus on the persistent problems of access, harassment, and disinformation. Scholars and practitioners in this volume tackle various facets of the issue, presenting an array of research, experiences, and case studies that span the globe. This knowledge lends itself to potential policy considerations in tackling inequalities and threats with gendered implications in cyber space towards digital spaces that are safe and equal. This book is a must-read for students, scholars, and practitioners seeking to expand their knowledge on the gendered threats in digital space and potential remedies against them.

21st Century Media and Female Mental Health Fredrika Thelandersson 2022-10-22 This open access book examines the conversations around gendered mental health in contemporary Western media culture. While early 21st century-media was marked by a distinct focus on happiness, productivity and success, during the 2010s negative feelings and discussions around mental health have become increasingly common in that same

media landscape. This book traces this turn to sadness in women's media culture and shows that it emerged indirectly as a result of a culture overtly focused on happiness. By tracing the coverage of mental health issues in magazines, among female celebrities, and on social media this book shows how an increasingly intimate media environment has made way for a profitable vulnerability, that takes the shape of marketable and brand-friendly mental illness awareness that strengthens the authenticity of those who embrace it. But at the same time sad girl cultures are proliferating on social media platforms, creating radically honest spaces where those who suffer get support, and more capacious ways of feeling bad are formed. Using discourse analysis and digital ethnography to study contemporary representations of mental illness and sadness in Western popular media and social media, this book takes a feminist media studies approach to popular discourse, understanding the conversations happening around mental health in these sites to function as scripts for how to think about and experience mental illness and sadness

*Girls' Feminist Blogging in a Postfeminist Age* Jessalynn Keller 2015-10-05 *Girls' Feminist Blogging in a Postfeminist Age* explores the practices of U.S.-based teenage girls who actively maintain feminist blogs and participate in the feminist blogosphere as readers, writers, and commenters on platforms including Blogspot, Facebook, Twitter, and Tumblr. Drawing on interviews with bloggers between the ages of fifteen and twenty-one, as well as discursive textual analyses of feminist blogs and social networking postings authored by teenage girls, Keller addresses how these girls use blogging as a practice to articulate contemporary feminisms and craft their own identities as feminists and activists. In this sense, feminist girl bloggers defy hegemonic postfeminist and neoliberal girlhood subjectivities, a finding that Keller uses to complicate both academic and popular assertions that suggest teenage girls are uninterested in feminism. Instead, Keller maintains that these young bloggers employ digital media production to educate their peers about feminism, connect with like-minded activists, write feminist history, and make feminism visible within popular culture, practices that build upon and continue a lengthy tradition of American feminism into the twenty-first century. *Girls' Feminist Bloggers in a Postfeminist Age* challenges readers to not only reconsider teenage girls' online practices as politically and culturally significant, but to better understand their crucial role in a thriving contemporary feminism.

*A Dynamic Systems Approach to Adolescent Development* Saskia Elske Kunnen 2012-12-06 The dynamic systems approach is a rapidly expanding advancement in the study of developmental research, particularly in the domain of adolescent development. It provides a unique way of examining the subject, and this innovative study of developmental processes helps social scientists to translate dynamic systems conceptualizations into clear empirical research that readers will be able to implement themselves. The first part of this edited book discusses techniques that describe and assess specific process characteristics such as variability, sudden jumps and attractor states. The second part explores the different techniques for building a dynamic systems model, which can simulate the behaviour of a system to investigate the mechanisms behind the processes. Each chapter describes one technique and is based on a specific practical example of its application in adolescent development. Step-by-step instructions for model-building and examples of ready-made models are provided on the website that belongs to the book: [www.psypress.com/dynamic-systems-approach](http://www.psypress.com/dynamic-systems-approach). This book provides a clear step-by-step description of theories and techniques that are designed for the study of developmental processes, and is therefore ideal for researchers of developmental psychology who do not specialise in statistics or research methods.

**Buddhist Approach to Harmonious Families, Healthcare and Sustainable Societies** Thich Duc Thien 2019-04-16 EDITORS' INTRODUCTION BACKGROUND There have been major changes in world today and that the term Global Leadership and Sustainable Development is no longer taken

for granted as a point of reference for understanding the contemporary chaotic situation. These disruptive changes mean that it is now arguable as to whether we still live in a world of justice, equality, peace and prosperity. The nature of these changes and the concepts of the Buddhist approach are central to the whole project of this book. In this light, we place great emphasis on understanding Buddhist teaching in dealing with this matter. We argue that any investigation of the changing character and context of the present time, needs to take account of the Buddhist philosophy. We focus on providing a thorough and critical understanding of change taking place as a starting point of discussion. In doing so, we attempt to clarify the nature of the Buddhist approach. It may be more productively understood as the result of a complex contested and fragile set of arrangements, which in this book we term as "approach". We do not imply that the frameworks based on the Buddhist teachings are fully fixed and agreed by everybody. Rather it would refer to a set of arrangements that need to be further discussed. Given the above, this volume collects together papers presented at the international workshop on Buddhist Approach to Harmonious Families, Healthcare and Sustainable Societies which took place on 13 May 2019 at International Conference Center Tam Chuc, Ha Nam, Vietnam on the occasion of THE 16TH UNITED NATIONS DAY OF VESAK CELEBRATIONS 2019. The participants in this workshop were not representative of the mainstream thinking or conventional wisdom of this field, although this volume reflects this richness and diversity. Treating the Buddha teachings as a basic theoretical reconstruction, we examine the relationships between the societies and Buddhist responsibilities. We combine analyses of the conflicts, trends and dynamics affecting future development with more focused studies on a range of policy areas: migration, education, leadership, climate change, etc... Two of our most crucial presumptions are that making Buddhism great again at the time of disruption is our first and foremost duty and the Buddhist responsibility can contribute to creating a new foundation for Global Leadership and Sustainable Development.

**Elena, Princesa of the Periphery** Diana Leon-Boys 2023-03-17 In the summer of 2016, Disney introduced its first Latina princess, Elena of Avalor. *Princesa of the Periphery* explores this Disney property using multiple case studies to understand its approach to girlhood and Latinidad. Following the circuit of culture model, author Diana Leon-Boys teases out moments of complex negotiations by Disney, producers, and audiences as they navigate Elena's circulation. Case studies highlight how a flexible Latinidad is deployed through corporate materials, social media pages, theme park experiences, and the television series to create a princess who is both marginal to Disney's normative vision of princesshood and central to Disney's claims of diversification. This multi-layered analysis of Disney's mediated Latina girlhood interrogates the complex relationship between the U.S.'s largest ethnic minority and a global conglomerate that stands in for the U.S. on the global stage.

[Encyclopedia of Curriculum Studies](#) Craig Kridel 2010-02-16 The Encyclopedia of Curriculum Studies provides a comprehensive introduction to the academic field of curriculum studies for the scholar, student, teacher, and administrator. The study of curriculum, beginning in the early 20th century, served primarily the areas of school administration and teaching and was seen as a method to design and develop programs of study. The field subsequently expanded to draw upon disciplines from the arts, humanities, and social sciences and to examine larger educational forces and their effects upon the individual, society, and conceptions of knowledge. Curriculum studies has now emerged to embrace an expansive and contested conception of academic scholarship while focusing upon a diverse and complex dynamic among educational experiences, practices, settings, actions, and theories in relation to personal and institutional needs and interests. The Encyclopedia of Curriculum Studies serves to inform and to introduce terms, events, documents, biographies, and concepts to assist the reader in understanding aspects of this rapidly changing field of study. Representative topics include: Origins, definitions, dimensions, and variations on Curriculum Studies Curriculum development and design for schools Curricular purpose, implementation, and evaluation Contemporary issues, e.g., standards, tests, and accountability Curricular dimensions of teaching and teacher education Interdisciplinary perspectives on institutionalized curriculum Informal curricula of homes, mass media, workplaces, organizations, and relationships Impact of race, class, gender, health, belief, appearance, place, ethnicity, language Relationships of curriculum and poverty, wealth, and related factors Modes of curriculum inquiry and research Curriculum as cultural studies, exploring the formation of identities and possibilities Corporate, state, church, and military influence as curriculum Global and international perspectives on curriculum Curriculum organizations, journals, and resources Summaries of books and articles on curriculum studies Biographic vignettes of key persons in curriculum studies Relevant photographs

**Girl Head** Genevieve Yue 2020-11-10 *Girl Head* shows how gender has had a surprising and persistent role in film production processes, well before the image ever appears onscreen. For decades, feminist film criticism has focused on issues of representation: images of women in film. But what are the feminist implications of the material object underlying that image, the filmstrip itself? What does feminist analysis have to offer in understanding the film image before it enters the realm of representation? *Girl Head* explores how gender and sexual difference have been deeply embedded within

film materiality. In rich archival and technical detail, Yue examines three sites of technical film production: the film laboratory, editing practices, and the film archive. Within each site, she locates a common motif, the vanishing female body, which is transformed into material to be used in the making of a film. The book develops a theory of gender and film materiality through readings of narrative film, early cinema, experimental film, and moving image art. This original work of feminist media history shows how gender has had a persistent role in film production processes, well before the image ever appears onscreen.
