Power and Poverty - Susannah R. Ottaway
2002-10-30

Despite calls since the 1970s for more research into the history of old age, there is still a relative dearth of historical studies on the elderly, especially in the pre-industrial past. This volume remedies much of that deficiency with essays exploring the lives of old men and old women, and the images of old age and aging, in early modern Europe and America. Collectively, the chapters demonstrate there was a strong association of advanced age with authority in the lived experience of older men and women. This book recognizes poverty and physical limitations were a very real threat, but challenges the tendency of existing literature on historical gerontology to associate old age with dependence and disability. Instead, what emerges from this volume is the success of older people in the past in imbuing their old age with dignity, despite the often vicious nature of old age in both popular and elite literature. Essays are brought together on old age in early modern England, France, Germany, Italy, Spain and America, enabling comparisons that cross geographical boundaries. Historians of old age, the family, demography, social history and cultural history will value this volume, as will sociologists and anthropologists interested in gerontology.

*Acts of the Dean and Chapter of Westminster,
1543-1609: The First Collegiate Church,
1543-1556* - Westminster Abbey 1997

First volume in the new Westminster Abbey Record Series, covering changes in Abbey ritual during the Reformation. This book is the first volume in a new venture, the Westminster Abbey Record Series, which aims to publish documents, calendars, lists and indexes from the Abbey's large and continuous archive of over a thousand years, making its contents available both to scholars and to a wider interested public. This edition of the earliest Chapter Act Book of the Dean and Chapter is an essential source for the impact of the Reformation at Westminster. The years covered in this volume show the business of setting up a reformed cathedral; the administration of the Abbey's large estate is also well illustrated, including the relations with the powerful courtiers and politicians who were among the Abbey's tenants. Dr CHARLES KNIGHTON gained his Ph.D. from Magdalene College, Cambridge.

The Politics of Prayer in Early Modern Britain -
Richard J. Ginn 2020-07-23

Prayer was regarded as an essential arm of the State and even a method of 'thought control' in early modern England. In the seventeenth Century, the period covered by Richard Ginn's study, Common Prayer dominated people's everyday lives at a national level, in communities and congregations, as well as privately in households. Ginn demonstrates how prayer represented the search for pattern, order and purpose in and between these different layers of society in a period when England was struggling

to come to terms with political and social turbulence, rocked by the violence of the Civil War, unease over the Commonwealth and the uncertainties of the Restoration. Ginn argues that the importance of Prayer as a stabilizing force during these times of instability cannot be underestimated; it fostered a sense of national identity, an integrating principle at a vulnerable time for England, putting the social order in a greater context under a sovereign God.
