Pratiquer autrement - Aborder l'éducation à la sexualité aux cycles 1, 2 et 3 - ePub FXL - Ed. 2023 - Aurélie Gourmelon 2023-06-07

L'éducation à la sexualité est un domaine transversal des programmes, bien plus large, qui doit permettre de faire de la prévention contre tous types de violences sexuelles, comme le rappelle la circulaire de rentrée 2022 : « Au-delà des actions de sensibilisation [...], il est nécessaire de donner une réalité plus tangible et systématique à l'éducation à la sexualité vue comme l'apprentissage d'un comportement responsable dans le respect de soi et des autres. » Il s'agit donc d'aborder aussi les notions de sexisme, de stéréotypes de genre, de consentement, etc. Cet ouvrage propose d'apporter à la fois des informations théoriques simples et des réponses pratiques concrètes pour permettre aux enseignant(e)s de mettre en œuvre sereinement l'éducation à la sexualité en classe de la maternelle au CM2. Les points forts Un ouvrage pratique clés en main : des fiches de préparation complètes qui permettent de mettre en œuvre facilement ses séances en classe. Une bibliographie ciblée d'albums.

**Investigations into the Origin of Language and Consciousness** - Trân Duc Thao 2012-12-06

Tran Duc Thao, a wise and learned scientist and an eminent Marxist philosopher, begins this treatise on the origins of language and consciousness with a question: "One of the principal difficulties of the problem of the origin of consciousness is the exact determination of its beginnings. Precisely where must one draw the line between the sensorimotor psychism of animals and the conscious psychism that we see developing in man?" And then he cites Karl Marx's famous passage about 'the bee and the architect' from *Capital*: ... what distinguishes the worst architect from the best of bees is this, that the architect raises his structure in the imagination before he erects it in reality. At the end of every labor process, we get a result that already existed in the imagination of the laborer at its commencement. (*Capital*, Vol. I, p. 178,

tr. Moore and Aveling) Thao follows this immediately with a second question: "But is this the most elementary form of consciousness?" Thus the conundrum concerning the origins of consciousness is posed as a circle: if human consciousness pre supposes representation (of the external reality, of mental awareness, of actions, of what it may), and if this consciousness emerges first with the activity of production using tools, and if the production of tools itself pre supposes representation - that is, with an image of what is to be produced in the mind of the producer - then the conditions for the origins of human
