*Selected Writings of Andrés Bello* - Andrés Bello 1998-12-17

Andrés Bello was a towering figure in nineteenth-century Latin America, as influential and as famous there as Thomas Jefferson is in the United States. Poet, politician, educator, essayist, philosopher, he wielded astonishing influence and played a major role in shaping the national identities of newly independent Latin American countries. He held several key government positions, authored Chile's civil code, launched several periodicals, wrote prodigiously on a vast array of subjects, and implemented important educational reforms. Available here in English for the first time, the Selected Writings of Andrés Bello, edited by Iván Jaksic, gathers wide-ranging selections that explore such subjects as grammar and philology, constitutional reform, the aims of education, international relations, historiography, Latin and Roman Law, government and society, and many others. The Selected Writings of Andrés Bello gives us a generous sampling of a gifted thinker who must be included in any understanding of the origins and development of Latin America.

**Classroom Assessment** - Lorin W. Anderson 2003-02-26

This book is based on the belief that decision making is perhaps the most critical of all teaching skills and that good assessments lie at the core of good decision making. To become better teachers then, teachers must learn to make informed decisions about both individual students

(learning decisions) and about groups of students (teaching decisions). This book gives equal status to both types of decisions and shows how assessment is integral to both. The organization of the book is sequential, mirroring the way in which information should be used to make decisions. It begins with a conceptual framework linking information to decision making, then moves to the design of assessment instruments and the collection of assessment information, then to the interpretation of assessment information and, finally, to reporting the results of both the assessment and the decision-making process. There is an emphasis throughout on linking why teachers assess with what and how they assess. Other key features include: \* Practical Framework -- The book's framework corresponds to the framework that teachers use to grade their students: conduct (classroom behavior), effort (student motivation), and achievement (student learning). \* Unique Chapters -- There are separate chapters on interpreting assessment information prior to decision making and on reporting assessment information to parents, teachers, and administrators. \* Flexibility -- Because of its modest length and price, and its practical focus on the links between assessment and everyday teacher decision making, this text can be used either in full-length assessment courses for teachers or to teach the assessment units in educational psychology or integrated methods courses.

*Blood of the Moon* - Richard Gazala 2009-10-14

David Rivers is a second-generation oilman. From Houston he runs the multinational oil company built by his father, former Apollo astronaut Michael Rivers, one of the last men alive to walk on the moon. Michael now spends his days confined to an assisted-living facility, his mind succumbing to the ravages of Alzheimer's disease. Somewhere in Michael's crumbling memory is a devastating secret he has revealed to no one in over forty years, not even to his sole surviving child. The secret is the location of a small capsule Michael brought back from the moon in 1972 containing proof that conventional wisdom is a deliberate lie. With the cryptic aid of an anonymous benefactor deep within the ancient and powerful secret society of the Hostmen of Newcastle, David races to unravel the mysteries shrouding his father's legacy while wars, terrorism, and riots over dwindling oil reserves enflame the planet, and a corrupted American presidential election teeters in the balance. David finds himself confronting the same crisis of conscience his father faced decades before. Should he risk his life and company to expose the Hostmen's lies? Or will he bury what he uncovers and let the world burn? *Blood of the Moon* won Honorable Mention in its category (Mystery/Suspense/Thriller) at the Los Angeles DIY Book Festival, and won third place in the Santa Fe Trail Creative Arts Guild Book Competition in the same category. *Blood of the Moon* has also been named a Finalist the Next Generation Indie Awards for 2010.

**Financing Health Services in Developing Countries** - John S. Akin 1987-01-01

This report discusses several different approaches that support reforming health care services in developing countries. For some time now, health care services have been supported by government funds. As demands for improving health care services continue to increase additional demands will be placed on governments to respond. This, however, will not be easy. Slow economic growth and record budget deficits in the 1980's have forced reductions in public spending. Alternative approaches to finance health care services are needed. Such

possible changes could involve: decentralization of federal government involvement; the promotion of nongovernment involvement; the imposition of user fees; and, establishing health insurance. Finally, the role of the Bank in pursuing new financing strategies is discussed.

**The American College** - Abraham Flexner 1908

**Democratic Transitions** - Sergio Bitar 2015-09-15

Thirteen former presidents and prime ministers discuss how they helped their countries end authoritarian rule and achieve democracy. National leaders who played key roles in transitions to democratic governance reveal how these were accomplished in Brazil, Chile, Ghana, Indonesia, Mexico, the Philippines, Poland, South Africa, and Spain. Commissioned by the International Institute for Democracy and Electoral Assistance (International IDEA), these interviews shed fascinating light on how repressive regimes were ended and democracy took hold. In probing conversations with Fernando Henrique Cardoso, Patricio Aylwin, Ricardo Lagos, John Kufuor, Jerry Rawlings, B. J. Habibie, Ernesto Zedillo, Fidel V. Ramos, Aleksander Kwasniewski, Tadeusz Mazowiecki, F. W. de Klerk,

Thabo Mbeki, and Felipe González, editors Sergio Bitar and Abraham F. Lowenthal focused on each leader's principal challenges and goals as well as their strategies to end authoritarian rule and construct democratic governance. Context-setting introductions by country experts highlight each nation's unique experience as well as recurrent challenges all transitions faced. A chapter by Georgina Waylen analyzes the role of women leaders, often underestimated. A foreword by Tunisia's former president, Mohamed Moncef Marzouki, underlines the book's relevance in North Africa, West Asia, and beyond. The editors' conclusion distills lessons about how democratic transitions have been and can be carried out in a changing world, emphasizing the importance of political leadership. This unique book should be valuable for political leaders, civil society activists, journalists, scholars, and all who want to support democratic transitions.

*The Child-Centered School* - H. Rugg 1980-06

*Old Age and Other Essays* - Norberto Bobbio 2017-06-06

This book by one of Italy's oldest and wisest intellectuals is a philosophical and personal meditation on ageing. The question of old age has preoccupied writers from Cicero to Amery, but in this volume Norberto Bobbio produces an account that is specific to our times. Born in 1909, Bobbio has lived through the major events of the past century, and his experiences of Fascism, Communism and the Cold War lend his reflections a melancholy that distinguishes them from earlier eulogies on old age and death. Bobbio's conclusions are often sobering, yet his investigation into memory and mortality is written with both humour and emotion. In the opening chapter, Bobbio reassesses the notion of progress from the perspective of an old man. Arguing for an understanding of historical change as the transfer between generations, Bobbio explains how the elderly are increasingly marginalized in contemporary society. Referring to the traditional idea of old age as the 'age of wisdom', Bobbio argues that our ever-accelerating technological progress has dramatically shifted the power of knowledge from old to young. This discussion of old age as a social problem is accompanied by a reflection on old age as a personal predicament. In his elegant and lucid prose, Bobbio confronts the facts of decrepitude and death. In taking stock of his life, he argues once again for the importance of democracy and human rights. This is a beautifully written book that will be of great interest to the academic and general reader alike. Its intellectual content renders it of particular value to students in the fields of philosophy, politics and the social sciences.
