A Gendered Approach to the Syrian Refugee Crisis - Jane Freedman 2017-02-24

The refugee crisis that began in 2015 has seen thousands of refugees attempting to reach Europe, principally from Syria. The dangers and difficulties of this journey have been highlighted in the media, as have the political disagreements within Europe over the way to deal with the problem. However, despite the increasing number of women making this journey, there has been little or no analysis of women's experiences or of the particular difficulties and dangers they may face. A Gendered Approach to the Syrian Refugee Crisis examines women's experience at all stages of forced migration, from the conflict in Syria, to refugee camps in Lebanon or Turkey, on the journey to the European Union and on arrival

in an EU member state. The book deals with women's experiences, the changing nature of gender relations during forced migration, gendered representations of refugees, and the ways in which EU policies may impact differently on men and women. The book provides a nuanced and complex assessment of the refugee crisis, and shows the importance of analysing differences within the refugee population. Students and scholars of development studies, gender studies, security studies, politics and middle eastern studies will find this book an important guide to the evolving crisis.

COVID-19 and women's intersectionalities in Africa - Ashwanee Budoo-Scholtz 2023-05-23

COVID-19 has become one of the most severe issues dominating discussions on the

agendas of states globally, and across the African continent, since its emergence in 2019. The COVID-19 pandemic has regrettably brought into sharp focus the continued multiple and intersecting forms of discrimination faced by women and girls in Africa because of their intersecting identities. Yet, paradoxically, although African women are disproportionately affected by the crisis, they are largely invisible in the responses. Several African states and governments have taken different policy measures in response to the pandemic. These responses have taken different dimensions, including shutting down economies, imposition of lockdowns, coercive quarantine measures with police enforcement and criminal consequences for offenders violating these rules. Unfortunately, these responses have reinforced and amplified women's disproportionate disadvantage and gender inequalities in Africa. Against this backdrop, this book asks the intersectional question

about women's experiences during the COVID-19 pandemic in Africa. Applying an intersectional human rights lens involves questioning how the intersecting identities that African women embody affect their experiences of the COVID-19 pandemic.

Goddesses in Older Women -
Jean Shinoda Bolen 2001-03-06

At some point after fifty, every woman crosses a threshold into the third phase of her life. As she enters this uncharted territory -- one that is generally uncelebrated in popular culture -- she can choose to mourn what has gone before, or she can embrace the juicy crone years. In this celebration of Act 3, Jungian analyst Jean Shinoda Bolen names the powerful new energies and potentials, or archetypes, that come into the psyche at this momentous time, suggesting that women getting older have profound and exciting reasons for welcoming the other side of fifty. As Bolen

has explained in her remarkable body of work, there are goddesses in every woman, deep archetypal sources of wisdom, authenticity and spirituality that, once tapped, energize us and give us a sense of meaning and self-acceptance. The knowledge of which archetypes are active within us at each phase of life—maiden, mother (or matron), and cronesupports us in making choices that are true to who we are instead of conforming to others' ideas of who we should be. In Bolen's bestselling *Goddesses in Everywoman*, the classic work of the women's spirituality movement, the Greek goddesses personified these archetypes as they affected the first two phases of a woman's adult life. Now she explains that in the third stage, marked physiologically by menopause, there emerges a whole new cast of inner archetypes that a woman can draw on for guidance, creativity, personal integration, and joy. Once we learn to recognize these forces, we can feel empowered and

wise, introspective and spiritual, sexually bold and full of mirth. For it is in the "wisewoman" years, when a woman has lived long enough to resolve the tasks of younger and middle adulthood, that she can fully and authentically become who she deeply is. The generation of women who are approaching or who have reached the crone years is historically unique. Influenced by the women's movement, they have benefited from educational opportunities, women's support networks, and economic resources as excellent preparation for decades of active postmenopausal life. By recognizing the goddess archetypes that emerge in this phase, women of this special generation will be enabled to transform the crone years into the best years of their lives.

[The Older Woman in Recent Fiction](#) - Zoe Brennan

Barbara Pym—that feature female protagonists over the age of sixty. These novels’ discourses on aging contrast with those largely pejorative ones that dominate Western society. They break the silence that normally surrounds the lives of the aged, and this book investigates how older female protagonists are represented in relation to areas such as sexuality, dependence and everyday life. Beginning with an investigation of popular opinions about aging and a survey of hypotheses from disciplines including gerontology, psychology and feminism, the text reviews literary critical attitudes toward fictions of aging; analyzes representations of physically dependent characters, whose anger over their failing bodies is often eased by relationships with their female friends; discusses how paradigms of female sexuality exclude the possibility of older women being sexually desirable; examines characters that live a contented life, finding a more polemical side

to them than is noted in more conventional literary critiques; and analyzes the aged sleuth in classical detective fiction.

An Evidence-based Approach to the Treatment and Care of the Older Adult with Cancer - Diane G. Cope

2006

"Description: The book offers a comprehensive overview of the treatment and care of the older adult with cancer. The evidence-based practice approach is timely and provides the foundation for nursing practice that is the expected standard of care. The use of the case study at the end of each chapter assists the reader in the synthesis and application of the information. The book addresses every aspect of the care and treatment of not only the cancer patient, but also the family. The chapter on complementary therapy is a bonus. Purpose: The purpose is to focus on the unique aspects of treatment and care that the older adult with cancer requires. Addressing the older adult with cancer is of

paramount importance to not only the health of the individual but of the family, community, and society. The book meets the author's objectives.

Audience: This is written for all healthcare providers. The authors have written a book that can be used by gerontology nurses, but it is appropriate for the multidisciplinary team that provides care to the older adult with cancer. The authors have the professional background with applicable experience to edit this book. **Features:** This book covers more than the care and treatment of cancer in the older adult. It provides necessary background information that demonstrates the impact of cancer on the older patient and their significant others. The assessment information is useful for both experienced and novice nurses. The use of chapter case studies enables healthcare providers to apply the chapter content. The use of an evidence-based practice approach to delivering healthcare is essential. The

information allows nurses to use the findings from reviewed research literature in providing the best care for their patients in an efficient manner that also considers patient preferences, the risks, and the benefits of treatment or lack thereof.

Assessment: This book provides guidance to novice to expert nurses in the treatment and care of the older adult cancer patient using a holistic approach. The chapters are well written by authors who are experts in their field. The Cochrane Guidelines are considered the gold standard for evaluating research that impacts treatment selection and care of all patients. Their use in the reference materials lends credibility to the information that is presented in the book." -- Publisher.

Health Management for Older Adults Developing an Interdisciplinary Approach -

David G Satin, MD 2009-01-21

The health care of a growing older adult population is a crucial issue, and one of increasing concern and cost. This text explores the health system's effect on health care and professional practice on societal, institutional, and health team levels. It also clarifies models of disciplinary collaboration, and the contributions of the interdisciplinary model. It relates clinical and non-clinical disciplines and facilitates change toward a more synergistic and effective health system. This book addresses its key issues in two ways: First, it explores the present health care system and how it shapes the health care that older adults receive and the

practices of their health professionals. Second, it explores five models of collaboration among health disciplines and how they differ in terms of mutual understanding, extent of collaboration, overlap and flexibility of roles, and openness to incorporating knowledge and skills from one another. This text aims to help health professionals, policy makers, and citizens understand the health system, how it shapes the health care they receive and can provide, and how to improve it. It also introduces clinicians and non-clinicians to one another's responsibilities and functions so that they can develop a more synergistic and harmonious health system.

Older Women in Europe -

majority of older people. The book describes instances of age and gender discrimination and examples of social inclusion and protagonism of older women in Europe. It solicits a change in perspective, focusing on the necessary societal changes to make space to older people and older women in particular. How is society going to address age and gender discrimination in social and institutional settings? How should work settings change to effectively make space to older workers and in particular older women? How should the pension system change? How could public health systems could provide effective care to older people and be sustainable? This edited collection focuses on older women's rights rather than their needs, adopting a human rights based approach. Preservation of older women's dignity, autonomy and security is its central topic, that is, ensuring that their rights are recognised. This collection offers insights valuable to a wide array of human rights

activists, professionals, policymakers and social scientists, and older women themselves.

ministry among Muslim women. Using original field research from eight different language and culture groups, the book explores a variety of ministries among Muslim women and provides tools to analyze their effectiveness. With contributions from scholars, field workers and agency administrators, readers are encouraged in a holistic Muslim ministry perspective through in-depth studies in Muslim beliefs, anthropological tools, worldview analyses, and explorations in strategic issues and discipleship. The book concludes with case studies and discussion questions to provide a comprehensive training manual for workers and students alike.

The Book of Old Ladies - Ruth O. Saxton 2020-09-05
This is a book that champions older women's stories and challenges the limiting outcomes we seem to hold for them. The Book of Old Ladies introduces readers to thirty stories featuring fictional "women of a certain age" who increasingly become their

truest selves. Their stories will entertain and provide insight into the stories we tell ourselves about the limits and opportunities of aging. A celebration of women who push back against the limiting stereotypes regarding older women's possibility, *The Book of Old Ladies* is a book lover's guide to approaching old age and dealing with its losses while still embracing beauty, creativity, connection, and wonder.

From Old Woman to Older Women - Sally Chivers 2003
Drawing on the perspective of aging bodies in order to approach the study of contemporary Canadian women's fiction, the author seeks to understand body criticism in general because elderly physical experiences lay bare crucial assumptions of thinking through the body. It also investigates the mechanisms and effects of constructions of aging in order to combat the automatically negative reactions most readers have to the topic of old age.

Facing Danger In The Helping Professions: A Skilled Approach - Bourne, Iain
2013-03-01

This book will help both students and practitioners in various disciplines deal with stressful and dangerous situations. The book's focus is on the immediate face-to-face management of interpersonal

Women's Health - Judith A. Lewis 1996

This book provides an integrated, multidisciplinary approach to women's health. Historical, sociocultural, psychological and biophysiological aspects of women's development are woven together to provide a complete women-centered perspective of health. While several excellent books in print provide information on diagnosis and treatment of women and address women's growth and development, Lewis and Bernstein strive to fill a void by marrying these perspectives. The book also offers a thorough investigation into the life cycle of women, And The roles of women as individuals and members of

their communities and

cultures.
