Criminal Psychology and the Criminal Justice System in India and Beyond - Sanjeev P. Sahni 2021-10-01

This book provides a focused and comprehensive overview of criminal psychology in different socio-economic and psycho-sociological contexts. It informs readers on the role of psychology in the various aspects of the criminal justice process, starting from the investigation of a crime to the rehabilitation or reintegration of the offender. Current research in criminology and psychology has been discussed to understand the minds of various offenders, how to interact with them during investigation and conviction effectively and how to bring about positive changes in various stages of the criminal justice process—investigation, prosecution, incarceration, rehabilitation—to increase the efficacy of the correctional system and improve public confidence in the justice system. It thoroughly addresses the bigger issues of holistically reducing the increase in crime rates and susceptibility in society. Each chapter builds on leading scholarship in this field from Western scholars and supplements these theories with research findings from a South Asian perspective, particularly in the Indian criminal justice system. This book successfully encapsulates the foundations of criminal psychology literature while incorporating interdisciplinary avenues of study into criminal behaviour and legal psychology, bringing into the provincial discourse lacunas of the justice system and avenues for alternative correctional and rehabilitative programs.

Aarushi - Avirook Sen 2015-07-05

The murders that gripped the nation Seven years ago a teenage girl, Aarushi Talwar, was found murdered in her bedroom in Noida, a middle-class suburb of Delhi. The body of the prime suspect—the family servant, Hemraj—was discovered a day later. Who had committed the double murders, and why? Within weeks, Aarushi's parents, the Talwars, were accused; four years later, they went on trial and were convicted. But did they do it? Avirook Sen attended the trial, accessed important documents and interviewed all the players—from Aarushi's friends to Hemraj's old boss, from the investigators to the forensic scientists—to write a meticulous and chilling book that reads like a thriller but also tells a story that is horrifyingly true. Aarushi is the definitive account of a sensational crime, and the investigation and trial that followed.

A Time Outside This Time - Amitava Kumar 2022-01-06

From the acclaimed author of *Immigrant*, Montana comes a one-of-a-kind novel about memory, politics, a world of lies, and the ways in which truth can be not only stranger than fiction, but a fiction of its own. When a writer named Satya attends a prestigious artists' retreat, he finds the pressures of the outside world won't let up: the US president rages online; a dangerous virus envelops the globe; and the twenty-four-hour news cycle throws fuel on every fire. These Orwellian interruptions begin to crystallize into an idea for his new novel, *Enemies of the People*, about the lies we tell ourselves and each other. Satya scours his life for moments where truth bends toward the imagined, and misinformation is mistaken as fact. As Satya sifts through newspaper clippings, the

President's tweets, childhood memories from India, and experiences as an immigrant, a husband, father, and teacher, Amitava Kumar's *A Time Outside This Time* captures our feverish political moment with a precisely observant intelligence and an eye for the uncanny. A brilliant meditation on life in a post-truth era, this piercing novel captures the sentiment on all our minds, of how impossible it can feel to remember, or to imagine, a time outside of this one.

The Killing of Aarushi and the Murder of Justice - Rajesh TALWAR 2017-08-20

The Aarushi Talwar murder case gripped the imagination of the nation for the better part of a decade, and is likely to remain a running story for many more years. The case involved the shocking and heinous murder of a young teenage girl, Aarushi and the family servant Hemraj, and was first investigated by the state police that allowed the crime scene to be heavily contaminated and robbed of all direct evidence. The case took many twists and turns, which were widely reported in the media. Initially the Talwars, Nupur and Rajesh, dentists and parents of the young girl were suspected of the crime by the state police, but subsequently when investigation was handed over to the Central Bureau of Investigation (CBI), the country's premier investigative agency, the first team investigating the matter reached the conclusion that the Talwars were innocent and it was Hemraj's associates that had committed the murders. The case took another turn when a fresh investigating team was put in charge following the appointment of a new director. This new team exonerated the servants and directed the needle of suspicion once more towards the Talwars. In the trial that followed the Talwars were found guilty and sentenced to life imprisonment. Many questions, however, still remain. This book considers some of those unanswered questions, examines the judgement and related material closely in the context of three possible scenarios, and concludes that the Talwars were probably innocent and should at any rate been given the benefit of reasonable doubt. The author of a bestselling book on the Nirbhaya case makes a compelling case as to why the Aarushi Talwar murder case remains one of the most debated, but ultimately unsolved, crimes of this century. Be that as it may, the country now awaits the verdict of the Allahabad High Court.

Justice Delayed and Denied in India - Dr. V.V.L.N. Sastry 2020-04-03

The wheels of justice turn slowly. This increases the costs of accessing justice in addition to hampering people's ability to access justice from the courts. India is one of the countries whose inefficient justice systems are legendary. Most cases lag for years and in so doing delaying people justice. A significant number of all the cases filed in Indian courts remain unresolved for at least five years - the number has become increasingly alarming over the years. Some cases may take as much as 20 years to resolve. During this period, the people who required justice are deprived of it. In some instances, the accused persons died before the cases are resolved. Examples of cases that have taken an extremely long time to resolve include the Bhopal Disaster, Aarushi Murder Case, Pallavi

Purkayastha Murder Case, Jayalalita DA Case, Hashimpura Massacre, Raja Radhakrishna Deb Land Case, Aadhaar Scheme, 1992 Babri Masjid Demolition, Uphar Cinema Fire Case, and 1984 Anti-Sikh Riots Case. These cases highlight some of the reasons as to why the Indian judicial system is highly inefficient. They also highlight the untold suffering that the delay of justice causes certain people while propagating the culture of impunity in the Indian society where the powerful and well-connected can get away with anything at the expense of the weak and vulnerable. Generally, the factors lead to the delay of justice in the Indian judiciary include inadequate staff, lack of enough fast track courts, corruption, archaic laws, lack of technology, lack of public education, lack of adequate integration of technology in the judicial system, inadequate Lok Adalat courts, poor staff training and management, and the court appellate structure and management. These factors increase the duration of lawsuits and reduce the access of justice to common Indians. They also increase the cost of access to justice. This book addresses these issues in relation to the Indian judiciary system and proposes measures that may be taken to tackle these challenges.

The Fluid Frame in Cinema - Pradipta Mukherjee 2021-08-13

This book is a passionate rendezvous with cinema, the most collaborative of art forms. The essays here explore the possibilities offered by a close reading of cinema that keeps cultural contexts and their socio-historical roots firmly in sight. This collection does not consider the "frame", that oft-referenced basic unit of vision in films, as a limiting structure. Rather, it brings into purview what is left out. Divided into three sections, the essays look firstly at Indian cinema, both Bollywood and regional films, tracing the journey of Indian cinema from the periphery to the center. The second section focuses on Adaptation Studies and takes an unorthodox look at classic adaptations of literature. The final section is a reappraisal of directors like Alfred Hitchcock and Stanley Kubrick. The essays propose that, even though the film as an artwork does not change fundamentally over time, it still strikes a contemporary critical gaze differently.

House of Evil - John Dean 2008-07-29

Details the brutal 1965 torture slaying of Sylvia Likens and the abuse to which the victim had been subjected by Gertrude Baniszewski, the woman with whom she had been staying, as well as some of Gertrude's children and neighbors.

Lunch With a Bigot - Amitava Kumar 2015-04-24

To be a writer, Amitava Kumar says, is to be an observer. The twenty-six essays in *Lunch with a Bigot* are Kumar's observations of the world put into words. A mix of memoir, reportage, and criticism, the essays include encounters with writers Salman Rushdie and Arundhati Roy, discussions on the craft of writing, and a portrait of the struggles of a Bollywood actor. The title essay is Kumar's account of his visit to a member of an ultra-right Hindu organization who put him on a hit-list. In these and other essays, Kumar tells a broader story of immigration, change, and a shift to a more globalized existence, all the while demonstrating how he practices being a writer in the world.

Crime Scene Management within Forensic Science - Jaskaran Singh 2022-03-23

This book, the second volume of *Crime Scene Management in Forensic Sciences*, reviews the role and impact of forensic evidence in criminal investigations. It also addresses the importance of post mortem examination in criminal cases. The book investigates the use of insects and arthropods to estimate post mortem intervals during forensic investigations. Further, it discusses the physiological effects of xenobiotics at the time of death, based on their concentration and distribution in the body at autopsy. Importantly, it also discusses digital forensic investigation, which can be used for the analysis of digital evidence produced at a court of law. Lastly, it defines the structure and legal framework of these forensic evidences for the effective administration of the criminal justice system. It is an excellent source of information for forensics scientists and legal professionals.

Calculated Risks - Gerd Gigerenzer 2002

At the beginning of the twentieth century, H. G. Wells predicted that statistical thinking would be as necessary for citizenship in a technological world as the ability to read and write. But in the twenty-first century, we are often overwhelmed by a baffling array of percentages and probabilities as we try to navigate in a world dominated by statistics. Cognitive scientist Gerd Gigerenzer says that because we haven't learned statistical thinking, we don't understand risk and uncertainty. In order to assess risk -- everything from the risk of an automobile accident to the certainty or uncertainty of some common medical screening tests -- we need a basic understanding of statistics. Astonishingly, doctors and lawyers don't understand risk any better than anyone else. Gigerenzer reports a study in which doctors were told the results of breast cancer screenings and then were asked to explain the risks of contracting breast cancer to a woman who received a positive result from a screening. The actual risk was small because the test gives many false positives. But nearly every physician in the study overstated the risk. Yet many people will have to make important health decisions based on such information and the interpretation of that information by their doctors. Gigerenzer explains that a major obstacle to our understanding of numbers is that we live with an illusion of certainty. Many of us believe that HIV tests, DNA fingerprinting, and the growing number of genetic tests are absolutely certain. But even DNA evidence can produce spurious matches. We cling to our illusion of certainty because the medical industry, insurance companies, investment advisers, and election campaigns have become purveyors of certainty, marketing it like a commodity. To avoid confusion, says Gigerenzer, we should rely on more understandable representations of risk, such as absolute risks. For example, it is said that a mammography screening reduces the risk of breast cancer by 25 percent. But in absolute risks, that means that out of every 1,000 women who do not participate in screening, 4 will die; while out of 1,000 women who do, 3 will die. A 25 percent risk reduction sounds much more significant than a benefit that 1 out of 1,000 women will reap. This eye-opening book explains how we can overcome our ignorance of numbers and better understand the risks we may be taking with our money, our health, and our lives.

Regrets, None - Dolly Thakore 2021-09-05

Written with wit, humour and candour, *Regrets, None* is a rare memoir that is unafraid to bare it all. It follows veteran theatre personality Dolly Thakore's life and career -- growing up in Delhi and an assortment of Air Force stations, getting her start in theatre in college, her time in London, involvement with social issues, casting for Gandhi and filming it across India, working in radio, television and advertising while returning always to her first love, theatre. Dolly Thakore brings alive another era -- the glitz, the glamour, the struggles. She speaks candidly about love, sex, infidelity, motherhood, commitment, the ecstasy and the heartbreaks. She emerges as a true-blooded embodiment of what it means to be a strong, empowered, vulnerable, courageous (and sometimes outrageous) woman.

Redhanded - Suruthi Bala 2021-09-16

The instant Sunday Times bestseller from the UK's number one true crime podcast, *RedHanded!* What is it about killers, cults, and cannibals that capture our imaginations even as they terrify and disturb us? How do we carefully consume these cases and what can they teach us about what makes victims and their murderers our collective responsibility? *RedHanded* rejects the outdated narrative of killers as monsters and that a victim 'was just in the wrong place at the wrong time.' Instead, it dissects the stories of killers in a way that challenges perceptions and asks the hard questions about society, gender, poverty, culture, and even our politics. With Bala and Maguire's trademark humour, research on real-life cases, and unflinching analysis of what makes a criminal, the authors take you through the societal, behavioural, and cultural drivers of the most extreme of human behaviour to find out once and for all: what makes a killer tick?

The Indian Evidence Act (I. of 1872) - James Fitzjames Stephen 1872

To Tell You the Truth - Aidan White 2008

Tabloid Tales - Colin Sparks 2000-03-22

Coverage of the Clinton-Lewinsky saga followed in a long trail of media exposures of the more personal details of the lives of public figures. Many commentators have seen stories like this, and TV shows like *Jerry Springer's*, as evidence of a decline in the standards of the mass media. This increasing interest in private lives and the falling off of coverage of serious news is often described as *Otabloidization*. The essays in this book are the first serious scholarly studies of what is going on and what

its implications are. Reality, it turns out, is much more complex than some of the laments suggest. As the contributors show, this is not just a U.S. problem but is repeated in country after country, and it is not certain that the media anywhere are getting more tabloid. What is more, there is no consensus about whether tabloidization is just Odumbing down or whether it is a necessary tactic for the mass media to engage with new audiences who do not have the news habit. *Tabloid Tales* will be of interest to students and scholars in journalism, mass communication, political science, and cultural and media studies.

Missing: Half the Story - Kalpana Sharma 2012-12-31

Toilets, trees and gender? Can there be a connection? Is there a gender angle to a business story? Is gender in politics only about how many women get elected to parliament? Is osteoporosis a women's disease?

Why do more women die in natural disasters? These are not the questions journalists usually ask when they set out to do their jobs as reporters, sub-editors, photographers or editors. Yet, by not asking, are they missing out on something, perhaps half the story? This is the question this book, edited and written by journalists, for journalists and the lay public interested in media, raises. Through examples from the media, and from their own experience, the contributors explain the concept of gender-sensitive journalism and look at a series of subjects that journalists have to cover - sexual assault, environment, development, business, politics, health, disasters, conflict - and set out a simple way of integrating a gendered lens into day-to-day journalism. Written in a non-academic, accessible style, this book is possibly the first of its kind in India - one that attempts to inject a gender perspective into journalism. Published by Zubaan.
