*Birth Settings in America - National Academies of Sciences, Engineering, and Medicine 2020-05-01*

The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

*Counselling for Maternal and Newborn Health Care - World Health Organization 2010*

The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. Counselling for Maternal and Newborn Health Care is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the

socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labor; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

If you answered yes to any of these questions, then you are going to want to keep reading. Many women dream of having a child. They think about how amazing it will be to watch their child grow up and become a fantastic adult. The one thing that is required, though, is not talked about a lot. That's the actual pregnancy. This practical guide will help midwives to have the necessary skills, resources and confidence to support homebirth. The book includes: the present birth choices a woman has the implications homebirth has upon midwifery practice how midwives can prepare and support women and their families the midwife's role and responsibilities national and local policies, guidelines and available resources pain management options With a range of recent home birth case studies brought together in the final chapter, this accessible text provides a valuable insight into those considering homebirth. **Am I Allowed?** - Beverley Ann Lawrence Beech 2021-05-16

Can I choose where to give birth to my baby? Why do I have to have an ultrasound examination? Induction of labour - do I need one? Can I decide who will be with me during my labour? How do I complain about the care I received? This book focuses, primarily, on the maternity rights of women in the UK. Much of the information is also appropriate for those in other high income countries. It sets out to help you to understand your options and rights through all stages of pregnancy, birth, and postnatally. It has been written by Beverley Lawrence Beech an author, birth activist, international speaker and is based on 40 years' experience challenging the over-medicalised, hospital-based, model of childbirth. Most women, trust the system to provide them with the best of care, 'What is must be best' (Macintyre 1984) and discover, too late, and to their cost, that the care was often based on routine and rules to which they were expected to conform. Although women are often told that 'every birth is different' there is within the hospital system an expectation that every birth will fit a specific set of rules or guidelines. If your pregnancy or birth is not conforming to the guidelines then you can find yourself at odds with the staff or agreeing to something with which you are not comfortable. This book explains the issues and what choices you have. It is your body, your baby, and you are the one who makes the decisions. The current fashion is for 'joint decision making' a subtle phrase that still suggests that the professionals are the ones to make the decision when, indeed, their role is to discuss with the woman the risks and benefits of any particular intervention so that the woman can then make a decision. Even if the woman's decision is 'you do what you think is best doctor'. That is a decision. It is not a 'joint decision'. Most women expect to have a happy and normal straightforward birth, but there is a possibility that this may not include you, in which case it is better to be forewarned and forearmed so that you are well-placed to make a decision that is best for you and your baby. In which case, this book is a must read for every woman.

**Childbirth Across Cultures** - Helaine Selin 2009-12-01

This book will explore the childbirth process through globally diverse perspectives in order to offer a broader context with which to think about birth. We will address multiple rituals and management models surrounding the labor and birth process from communities across the globe. Labor and birth are biocultural events that are managed in countless ways. We are particularly interested in the notion of power. Who controls the pregnancy and the birth? Is it the hospital, the doctor, or the in-laws, and in which cultures does the mother have the control? These decisions, regarding place of birth, position, who receives the baby and even how the mother may or may not behave during the actual delivery, are all part of the different ways that birth is conducted. One chapter of the book will be devoted to midwives and other birth

attendants. There will also be chapters on the Evolution of Birth, on Women's Birth Narratives, and on Child Spacing and Breastfeeding. This book will bring together global research conducted by professional anthropologists, midwives and doctors who work closely with the individuals from the cultures they are writing about, offering a unique perspective direct from the cultural group.

**Inducing Labour** - Sara Wickham 2018-04-30

When is it better to induce labour than to let a woman's body or baby decide the best time for birth? What are the pros and cons of waiting and of being induced? What about after the due date? When the baby is thought to be bigger than average? When the woman is older? If she had IVF? Or when her waters have broken earlier than usual? Induction of labour is an increasingly common recommendation and more and more women find themselves having to decide whether to let their body and baby go into labour spontaneously or agree to medical intervention. This book explains the process of induction of labour and shares information from research studies, debates and women's, midwives' and doctors' experiences to help women and families become more informed and

make the decision that is right for them.

*Supporting Women for Labour and Birth* - Nicky Leap 2022-01-12

This new edition provides an up-to-date and thoughtful guide to supporting women in labour, looking at a range of techniques and approaches that promote a safe and positive experience of birth for women and their families. Across the world, support in labour has been shown to reduce obstetric interventions and improve outcomes for women and babies. Written by two highly experienced midwifery authors, this text draws on a wide range of cutting-edge research on this topic, identifying how the evidence can be applied to everyday practice. Narratives from women and practitioners, including midwives, doulas, childbirth educators and students, are used to illustrate a range of situations where the quality of support is central to the quality of the experience and outcome. *Supporting Women for Labour and Birth* encourages readers to reflect on their experiences and examine the evidence provided by both research and experiences of women and practitioners in order to explore how this could be incorporated into their practice. The only book to deal directly with the practical and emotional issues associated with labour support, this is an ideal text for student midwives and an important reference for practising midwives, doulas and other childbirth practitioners.

**Birthing Normally After a Caesarean Or Two (2nd British Edition)**

- Helene Vadeboncoeur 2011-04

This book is for any woman considering a vaginal birth after one or more previous caesareans. What are the risks? What are the advantages? What is the best choice in your particular case? The author, H el ene Vadeboncoeur, takes you through the research and also gives you a glimpse into other women's experiences through the use of first-hand accounts. It was, in fact, the author's experience of two very different births (one a caesarean, the next a VBAC) that inspired her to get a PhD. In her thesis she explored how women experience giving birth in hospital. H el ene wanted to consider questions about birth because this is such an important event in women's lives. For over 10 years since then, she has divided her time between teaching and participating in research projects. (She is currently on the Board of the International MotherBaby Childbirth Organization.) She also regularly gives talks at conferences around the world. This means that you not only get the benefit of advice from a woman who's been through both a caesarean and a VBAC, you also get taken through the most up-to-date research (now updated for the 2nd edition). Serious information is presented in an upbeat, readable style. Comment from a consultant: "As a professional who is concerned about the risk in the caesarean rate I would like to suggest that all women who have anything to do with caesareans read this book. The author has collected research data and precious accounts, which will help women make an informed choice as to how to give birth to their babies." Feedback from a midwife: "H el ene Vadeboncoeur offers women an important tool to support them if they choose to give birth vaginally after a previous caesarean." Comment from a reader of the original, French edition: "This book is a response to questions. It will serve to demystify fears and inspire confidence."

**Like a Mother** - Angela Garbes 2018-05-29

A candid, feminist, and personal deep dive into the science and culture of pregnancy and motherhood Like most first-time mothers, Angela Garbes was filled with questions when she became pregnant. What exactly is a placenta and how does it function? How does a body go into labor? Why is breast best? Is wine totally off-limits? But as she soon discovered, it's not easy to find satisfying answers. Your obstetrician will cautiously quote statistics; online sources will scare you with conflicting and often inaccurate data; and even the most trusted books will offer information with a heavy dose of judgment. To educate herself, the food and culture writer embarked on an intensive journey of exploration, diving into the scientific mysteries and cultural attitudes that surround motherhood to find answers to questions that had only previously been given in the form of advice about what women ought to do—rather than allowing them the freedom to choose the right path for themselves. In *Like a Mother*, Garbes offers a rigorously researched and compelling look at the physiology, biology, and psychology of pregnancy and motherhood, informed by in-depth reportage and personal experience. With the curiosity of a journalist, the perspective of a feminist, and the intimacy and urgency of a mother, she explores the emerging science behind the pressing questions women have about everything from miscarriage to complicated labors to postpartum changes. The result is a visceral, full-frontal look at what's really happening during those nine life-altering months, and why women deserve access to better care, support, and information. Infused with humor and born out of awe, appreciation, and understanding of the female body and its strength, *Like a Mother* debunks common myths and dated assumptions, offering guidance and camaraderie to women navigating one of the biggest and most profound changes in their lives.
