***A Chicken's Guide to Talking Turkey with Your Kids About Sex*** Kevin Lemman 2009-10-14

You're already establishing a track record with your kid by how you listen, by what you say when you're angry, and by how you treat your spouse. We like to surprise parents who ask us, "When do I start talking about sex?" The answer is, you've already started. As difficult as talking with your child about sex, peer pressure, and self-image may seem, you can do it—and you must. Your child's future depends on it. Fortunately, you've got plenty of guidance and insight available in *A Chicken's Guide to Talking Turkey with Your Kids about Sex*. Family psychologist Dr. Kevin Lemman and sexuality educator Kathy Flores Bell guide you safely along the sometimes rocky road of pubescence as your child heads toward adolescence. This practical and engaging book covers his or her development not just from the waist down, but also from the neck up, where the important decisions about sex are made. Illustrated with real life scenarios, this book is filled with practical knowledge and biblical wisdom. It is a book of firsts: first bra, first shave, first period, first nocturnal emission, first school dance, first discussion about relating to the opposite sex. *A Chicken's Guide* takes on the difficult things parents face with their kids today, such as dating relationships, sexual activity and "rite of passage" attitudes, STDs, molestation, and more. Lemman and Bell take you beyond sex education and frank conversations to cultivating a relationship with your child. Get ready to acquire some unanticipated life skills in the process. Moms, discover how to buy that first athletic supporter for your son in Little League. Dads, learn how to navigate the feminine hygiene aisle at the supermarket for your daughter. You'll do more than meet your child's physical needs. You'll create the trust, support, and security he or she needs in your relationship. And in turn, you'll gain a credible voice on such intimate topics as what sexual intercourse is and why to abstain from sex until marriage. With Bell's expert yet simple knowledge of the dynamics of human sexuality and Dr. Lemman's winsome, lighthearted approach, you'll gain confidence for those difficult but essential

talks. Here are the tools you need to help your kids not only understand their growing bodies, but cope with the temptations and social pressures that go with them.

**Warrior Guardian's Guide: Children's Abduction and Molestation Prevention Skills** Kenneth R. Haslam 2017-02 This to the point instruction book explains from the first chapter the essential ideas a parent, guardian or anyone working with children must teach to keep children safe from fear and violence in today's world. This is a straightforward reality-based instruction on the aspects of abduction and molestation prevention as taught by Professor Kenneth R. Haslam, World Martial Arts Hall of Fame Inductee who has been teaching parents and thousands of children over the last five decades. 1 in 5 girls and 1 in 7 boys succumb to sexual assault today, and 1 in 42 children go missing. Over 30% of sexual abuse is with children under 12 years of age. But, this is not a book of statistic or psychology, but a practical guide to what to teach and how. As a busy parent or guardian, you must get the facts and implement the safety tools without the need for hours of research. The work has been done for you. The ideas in this book can be use immediately. While this book is a quick read, every topic associated with abduction and molestation prevention has been discussed. The four steps in the ladder of protection, how to leave a veil of protection that no predator will dare try to pierce when you leave a child with others, how to discuss nudity and sex your way, so your child does not learn things someone else's way, teaching your child without fear, safety on the internet, what to do if your child is lost, what to do if your child is abducted, what are the symptoms to tell if a child is believed to be being molested, fifteen action steps your child must learn to prevent themselves from becoming a victim in the first place. These actions are described in detail, so you know exactly what to teach a child and these actions all come with support tools such as rhymes for little ones to learn. "If you touch me I will tell if you touch me I will yell," "Adults don't ask children for help, adults ask adults for help," are examples of the many tools a parent can use to teach their child without fear at an early age. More, the ten lures predators use to trick children are not only discussed but how to role-play (another valuable tool) to help guarantee your child understands and will carry out the tasks which will keep them safe. Included are the mistakes parents make every day as parents are unaware of the dangers in places taken for granted to be safe. Also, discussed are the mistakes other instructors teach such as the secret word which is an absolute dangerous tool and should not be used. A scenario-based method of teaching a child is presented to parents so a parent can take random opportunities throughout the day to teach valuable lessons through simple observations of others and quick conversations with their child. Additionally, there are thirty-four guidelines for keeping a child safe from both abduction and molestation. This book was written as the need became obvious as I was teaching children martial arts that preventing abduction and molestation was the reality for self-defense in a child's world. While a child could not physically box an adult there were many strategies a child could learn to prevent abduction and molestation, and none were about martial art fighting skills. This book is not about psychology, social science or theory but the tools I personally have used for over five decades that I taught my four children that I am sure will work and help guarantee the safety of your children. Professor Kenneth R. Haslam Founder of the 360X DEFENSE Smart N' Safe Children's Program and has taught thousands of children and adults over his five-decade career in reality-based martial arts. He is also the author of C.A.R.E.S., Children's Action Response and Escapes Skills, how to escape predators once it gets physical and the soon to be released book B.R.A.V.E., Bully Response, Attitudes, Value, and Empowerment.

*Parenting Matters* National Academies of Sciences, Engineering, and Medicine 2016-12-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
