Managing Cultural Differences - Robert T. Moran 2014-02-24

The world of business for all organizations in the twenty-first century is global, interdependent, complex, and rapidly changing. That means sophisticated global leadership skills are required more than ever today. Individual and organizational success is no longer dependent solely on business acumen. Our ability to understand, communicate, and manage across borders, countries, and cultures has never been as important as it is now. The understanding and utilization of cultural differences as a business resource is a key building block as companies rely on their global reach to achieve the best profit and performance. For this reason, international business and cross-cultural management are key topics in undergraduate business, MBA, and executive education programs worldwide as companies and institutions prepare current and future business leaders for the global marketplace. This exciting new edition of the highly successful textbook, *Managing Cultural Differences*, seeks to guide students and any person with global responsibilities to understand how culture fits in a changing business world, how to gain a competitive advantage from effective cross-cultural management, and gives practical advice for doing business across the globe. With updated content, new case studies, and a new author team, *Managing Cultural Differences* is required course reading for undergraduates, postgraduates, and MBA students alike, as well as being of significant value for anyone who sells, purchases, travels, or works internationally.

Developing Nations and the Politics of Global Integration - Stephan Haggard 1995-04-01
Developing countries are becoming important players in the world economy. Although they were slow to liberalize trade, they are now joining the more economically advanced nations in implementing trade reforms and in taking steps to deepen global integration. The lowering of trade barriers and the growth of foreign investment have benefited the developing countries but have also created vulnerabilities, including risks of dependence and political interference. Is deeper integration in the best interest of developing countries? In this book, part of the *Integrating National Economies*

series, Stephen Haggard examines the position of the developing countries in the international trade regime. Focusing on the nations of East and Southeast Asia and Latin American, Haggard explores the cause of economic liberalization policies in the developing nations. He argues that various international constraints, such as economic shocks and political pressures from the economically advanced nations, pushed developing countries to open up to international competition and to pursue economic relations with advanced industrial states. Haggard addresses such central questions as: Will developing countries benefit from the deep integration agenda? Will they instead join closed regional blocs that fragment the international economy? Will the developing nations orient themselves toward the multilateral institutions, particularly the World Trade Organization, or will they gravitate toward regional arrangements. Haggard argues that the advanced developing countries have become strong supporters of the multilateral system and that the extent of regionalism has been overstated. He contends that a more serious threat is the lure of bilateralism and the effort of the advanced industrial states to impose standards on developing countries that are inappropriate or politically counterproductive. Culture, Religion and Conflict in Muslim Southeast Asia - Joseph A. Camilleri 2013

By examining the sometimes surprising and unexpected roles that culture and religion have played in mitigating or exacerbating conflicts,

this book explores the cultural repertoires from which Southeast Asian political actors have drawn to negotiate the pluralism that has so long been characteristic of the region. Focusing on the dynamics of identity politics and the range of responses to the socio-political challenges of religious and ethnic pluralism, the authors assembled in this book illuminate the principal regional discourses that attempt to make sense of conflict and tensions. They examine local notions of "dialogue," "reconciliation," "civility" and "conflict resolution" and show how varying interpretations of these terms have informed the responses of different social actors across Southeast Asia to the challenges of conflict, culture and religion. The book demonstrates how stumbling blocks to dialogue and reconciliation can and have been overcome in different parts of Southeast Asia and identifies a range of actors who might be well placed to make useful contributions, propose remedies, and initiate action towards negotiating the region's pluralism. This book provides a much needed regional and comparative analysis that makes a significant contribution to a better understanding of the interfaces between region and politics in Southeast Asia.
