The Godman and the Sea Michael J. Thate 2019-10-04 If scholars no longer necessarily find the essence and origins of what came to be known as Christianity in the personality of a historical figure known as Jesus of Nazareth, it nevertheless remains the case that the study of early Christianity is dominated by an assumption of the force of Jesus's personality on divergent communities. In *The Godman and the Sea*, Michael J. Thate shifts the terms of this study by focusing on the Gospel of Mark, which ends when Mary Magdalene, Mary the mother of James, and Salome discover a few days after the crucifixion that Jesus's tomb has been opened but the corpse is not there. Unlike the other gospels, Mark does not include the resurrection, portraying instead loss, puzzlement, and despair in the face of the empty tomb. Reading Mark's Gospel as an exemplary text, Thate examines what he considers to be retellings of other traumatic experiences—the stories of Jesus's exorcising demons out of a man and into a herd of swine, his stilling of the storm, and his walking on the water. Drawing widely on a diverse set of resources that include the canon of western fiction, classical literature, the psychological study of trauma, phenomenological philosophy, the new materialism, psychoanalytic theory, poststructural philosophy, and Hebrew Bible scholarship, as well as the expected catalog of New Testament tools of biblical criticism in general and Markan scholarship in particular, *The Godman and the Sea* is an experimental reading of the Gospel of Mark and the social force of the sea within its traumatized world. More fundamentally, however, it attempts to position this reading as a story of trauma, ecstasy, and what has become through the ruins of past pain.

An Introduction to Mormonism Douglas James Davies 2003 Although one of the fastest growing religious movements in the world, the Church of Jesus Christ of Latter-day Saints remains a mystery in terms of its core beliefs and theological structure. This timely book provides an important introduction to the basic history, doctrines and practices of The LDS--the "Mormon" Church. Emphasizing sacred texts and prophecies as well as the crucial Temple rituals of endowments, marriage and baptism, it is written by a non-believer, who describes Mormonism in ways that non-Mormons can understand.

When Prophecy Fails Leon Festinger 2021-11-08 2021 Hardcover Reprint of the 1956 First edition. *When Prophecy Fails* [1956] is a classic text in social psychology authored by Leon Festinger, Henry Riecken, and Stanley Schachter. It chronicles the experience of a UFO cult that believed the end of the world was at hand. In effect, it is a social and psychological study of a modern group that predicted the destruction of the world, and the adjustments made when the prediction failed to materialize. "The authors have done something as laudable as it is unusual for social psychologists. They espied a fleeting social movement important to a line of research they were interested in and took after it. They recruited a team of observers, joined the movement, and watched it from within under great difficulties until its crisis came and went. Their report is of interest as much for the method as for the substance."-Everett C. Hughes, *The American Journal of Sociology*.

She concludes that the profession is a difficult one due to complex explicit and unwritten rules and practices. Spanning many world cultures it documents regional histories, ideological movements and leading individuals that fostered cremation whilst also presenting cremation as a universal practice. Tracing ancient and classical cremation sites, historical and contemporary cremation processes and procedures of both scientific and legal kind, the encyclopedia also includes sections on specific cremation rituals, architecture, art and text. Features in the volume include: a general introduction and editorial introductions to sub-sections by Douglas Davies, an international specialist in death studies; appendices of world cremation statistics and a chronology of cremation; cross-referencing pathways through the entries via the index; individual entry bibliographies; and illustrations. Anthropology and Biblical Studies 2019-05-21 This volume presents the findings of an international research symposium, held at St Andrews University, Scotland, in July 2003. Contributors include both biblical scholars and anthropologists. The essays presented variously explore and review interdisciplinary links, innovations and developments between anthropology and biblical studies in reference to interpretation of both the OT and NT and pseudepigraphal works. Explored are methodological issues, the use of anthropological concepts in biblical studies (identity; purity boundaries; virtuoso religion; spiritual experience; sacred space) and more 'field orientated' work of bible translators in different cultures.

Death, Ritual and Belief Douglas Davies 2017-11-02 Death, Ritual and Belief, now in its third edition, explores many important issues related to death and dying, from a religious studies perspective, including anthropology and sociology. Using the motif of 'words against death' it depicts human responses to grief by surveying the many ways in which people have not let death have the last word, not simply in terms of funeral rites but also in memorials, graves, and in ideas of ancestors, souls, gods, reincarnation and resurrection, whether in the great religious traditions of the world or in more local customs. He also examines bereavement and grief, experiences of the presence of dead, near-death experiences, pet-death and the symbolic death played out in religious rites. Updated chapters have taken into account new research and include additional topics in this new edition, notably assisted dying, terrorism, green burial, material culture, death online, and the emergence of Death Studies as a distinctive field. Case studies range from Anders Breivik in Norway, to the Princess of Wales, and to the Rapture in the USA. A new perspective is also brought to his account of grief theories. Providing an introduction to key authors and authorities on death beliefs, bereavement, grief and ritual-symbolism, Death, Ritual and Belief is an authoritative guide to the perspectives of major religious and secular worldviews.

Studying Local Churches Helen Cameron 2005-03-31 This practical handbook - aimed at final year undergraduates, Masters-level students, student ministers, church leaders and policy makers interested in local faith communities - guides readers through the various tools, methods of analysis and research skills needed for studying local churches. This resource takes full account of the UK context and is an ideal basis for students undertaking research projects and dissertations. After an historical overview, the handbook identifies theoretical foundations for the study of local churches, drawing on the 4 disciplines of anthropology, sociology, organisational studies and theology. Guidance is provided on both quantitative and qualitative research methods. Research processes covered include such issues as selecting a church, gaining access, selecting methods, analysing data, maintaining confidentiality, research reflexivity, and completing the final report. There is also a critical review of existing literature, as well as case studies and worked examples, demonstrating how key concepts from the 4 disciplines apply to actual local churches. The handbook contains a wide range of contributors with extensive theoretical and practical experience of studying local churches.

Canterbury Tales Geoffrey Chaucer 1903

The Freedom of the Christian Martin Luther 2020-10-15 The Freedom of the Christian was Martin Luther's first public defense of the doctrine of justification by grace through faith on account of Christ alone. Luther's explosive rediscovery of the Gospel of Jesus Christ shattered the Church of Rome's foundation of works, which considered good works a part of salvation instead of a result of it. Here, Luther constructed a rich theology that relies on the full power of the Gospel, which not only grants saving faith but also nurtures that faith through good works done in the freest service. This new abridged translation from Adam Francisco, featuring a brief essay from Scott Keith, leaves no doubt that the Christian, secure in Christ, is truly free-free from sin, death, and the devil, and free to serve their neighbor.

Anthropology and Theology Douglas James Davies 2002 Anthropology and Christian Theology have traditionally interpreted religion in quite different ways and have often been thought of as hostile to one another. In fact, a fundamental concern for human experience lies at the heart of both disciplines. This innovative book takes a new look at key anthropological and theological themes, and explores the intricacies of their interplay throughout history and in the present. Sacrifice, embodiment, ritual, incarnation, symbolism, gift and power are all related in ways that shed new light on religious behaviour and belief. Detailed analysis of fundamental Christian rites shows how they help generate emotional meaning and inspire philosophical ideas, and demonstrates how the body serves as a vehicle for religious beliefs. Through an examination of these issues and much more, Davies reveals how religious rituals help people to become secure in their sense of identity. This accessible foray into new territory is essential reading for anthropologists, theologians, or anyone interested in religion who is seeking new interpretations of familiar themes.

Large-Scale Parallel Data Mining Mohammed J. Zaki 2003-07-31 With the unprecedented growth-rate at which data is being collected and stored electronically today in almost all fields of human endeavor, the efficient extraction of useful information from the data available is becoming an increasing scientific challenge and a massive economic need. This book presents thoroughly reviewed and revised full versions of papers presented at a workshop on the topic held during KDD'99 in San Diego, California, USA in August 1999 complemented by several invited chapters and a detailed introductory survey in order to provide complete coverage of the relevant issues. The contributions presented cover all major tasks in data mining including parallel and distributed mining frameworks, associations, sequences, clustering, and classification. All in all, the volume presents the state of the art in the young and dynamic field of parallel and distributed data mining methods. It will be a valuable source of reference for researchers and professionals.
