The Boston Pearl - 1836

The Entomologist's Record and Journal of Variation - 1893

Surfing Uncertainty - Andy Clark 2016

This title brings together work on embodiment, action, and the predictive mind. At the core is the vision of human minds as prediction machines - devices that constantly try to stay one step ahead of the breaking waves of sensory stimulation, by actively predicting the incoming flow. In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage. The book shows in detail how this strange but potent strategy of self-anticipation ushers perception, understanding, and imagination simultaneously onto the cognitive stage.

American Insects - Ross H. Arnett, Jr. 2000-07-28

Offering a complete accounting of the insects of North America, this handbook is an up-dated edition of the first handbook ever compiled in the history of American entomology. By using *American Insects, A Handbook of the Insects of America North of Mexico, Second Edition*, readers can quickly determine the taxonomic position of any species, genus, or higher taxon of insect known to occur in America and Canada. Every order, family, and genus is conveniently numbered and indexed, making this volume the only complete single source for all of the names of orders, families, and genera currently available. This book fills the need for an accurate way to identify, with the several hundred drawings and photos, the common insects of all orders. Now there is a tool available to those working without a major collection and library; and those who would like to have a general knowledge of insect life without becoming overwhelmed by the vast number of minute insect species. This usable guide provides sizes, shapes, color patterns and salient features of some species of each major family by pointing out those groups most likely to be encountered, including all North America pests. What's New in this Edition? Researchers in many orders use the results of cladistics, a new tool for determining the relationship of orders, families, genera, and species of organisms, including plants as well as animals. Specialists have provided lengthy lists of generic changes. Many of the identification keys have been revised by adding more illustrations and making sure all description terms are in the Glossary. The bibliographies of each Order section have been updated to include all important works that have appeared since the original edition.

Gender and Spoken Interaction - P. Pichler 2009-02-12

This diverse collection of gender research with an exclusive focus on spoken interaction explores how gender is reflected and accomplished in relation to other situational and larger-scale sociocultural practices,

identities and structures.

Sexing the Body - Anne Fausto-Sterling 2020-06-30

Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

Diet and Health - National Research Council 1989-01-01

Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today: atherosclerotic cardiovascular diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries.

Mammals of Illinois - Donald F. Hoffmeister 2002

Hoffmeister (natural history-emeritus-U. of Illinois) presents the culmination of a lifetime of work. Here are 55 color and 192 bandw photos, drawings, distribution maps, and detailed keys. A model of natural history writing. Annotation copyrighted by Book News, Inc., Portland, OR

Lyman Entomological Museum and Research Laboratory Memoir - Lyman Entomological Museum and Research Laboratory 1974

The History of the Franks - Saint Gregory (Bishop of Tours) 1927

The Bad Bug Book - FDA 2004

The Bad Bug was created from the materials assembled at the FDA website of the same name. This handbook provides basic facts regarding foodborne pathogenic microorganisms and natural toxins. It brings together in one place information from the Food & Drug Administration, the Centers for Disease Control & Prevention, the USDA Food Safety Inspection Service, and the National Institutes of Health.

Alden's Cyclopaedia of Natural History - 1893

The aquatic and semi-aquatic bugs (Heteroptera: Nepomorpha & Gerromorpha) of Malesia - Ping-ping Chen 2021-10-18

This volume deals with the Heteroptera aquatica, or water bugs, known from Malesia, a region holding almost 1000 species belonging to seventeen families. The book includes keys to all families and genera, and provides information on their taxonomy, morphology, biology, distribution and economic importance. A checklist of the species recorded from Malesia and nearby areas, with references to original descriptions of all taxa, is included. The book is illustrated by more than 500 drawings and 35 distribution maps. A glossary explains the technical terms is employed. An extensive list of references will enable readers to trace all pertinent taxonomic literature published up to the end of 2003.
