

# Sex To Induce Labour At 36 Weeks

*WHO Global Report on Traditional and Complementary Medicine 2019* World Health Organization 2019-05-16 This report is structured in five parts: national framework for traditional and complementary medicine (T&CM); product regulation; practices and practitioners; the challenges faced by countries; and finally the country profiles. Apart from the section on practices and practitioners the report is consistent with the format of the report of the first global survey in order to provide a useful comparison. The section on practices and practitioners which covers providers education and health insurance is a new section incorporated to reflect the emerging trends in T&CM and to gather new information regarding these topics at a national level. All new information received has been incorporated into individual country profiles and data graphs. The report captures the three phases of progress made by Member States; that is before and after the first WHO Traditional Medicine Strategy (1999?2005) from the first global survey to the second global survey (2005?2012) and from the second survey to the most recent timeline (2012?2018).

**Obstetrics by Ten Teachers** Louise C. Kenny 2017-05-18 First published in 1917 as 'Midwifery', *Obstetrics by Ten Teachers* is well established as a concise, yet comprehensive, guide within its field. The twentieth edition has been thoroughly updated by a new team of 'teachers', integrating clinical material with the latest scientific developments that underpin patient care. Each chapter is highly structured, with learning objectives, definitions, aetiology, clinical features, investigations, treatments, case histories and key point summaries and additional reading where appropriate. New themes for this edition include 'professionalism' and 'global health' and information specific to both areas is threaded throughout the text. Along with its companion *Gynaecology by Ten Teachers* the book will continue to provide an accessible 'one stop shop' in obstetrics and gynaecology for a new generation of doctors.

**Midwifery and Sexuality** Sam Geuens 2023-03-09 This first open-access book on midwifery and sexuality integrates sexual health into the care for the pregnant and postpartum couple. It addresses sexuality and intimacy from an education and prevention perspective instead of just focusing on treating problems, aiming to foster the development of sexual well-being and happy couplehood. Sexuality and intimacy are essential elements in the bonding of the couple and the parents-to-be. That process can be seriously hampered by sexual problems due to mutual misunderstanding, fear and sexual troubles (especially when the natural processes of conceiving, pregnancy and delivery are disturbed). In this phase of life, disruption of intimacy, sexuality and sexual relationship is a significant risk factor for

developing couple and family problems. The need for such a book stems from the very limited attention given to this health area in the daily practice of most midwives and related healthcare professionals. In building a close relationship with the couple through frequent, intense, longstanding contact, the midwife acquires a perfect position to address sexuality and intimacy. With 36 authors from 14 countries, the book comprises five modules: 1. Sexuality; 2. Sexual aspects of the various phases of reproduction when things develop without complications; 3. Sexual aspects when those same phases deviate from physiology; 4. Special topics on sexuality relevant to daily midwifery practice; 5. Teaching, learning, skills and competencies with regard to sexuality. This new practical textbook guides healthcare professionals such as midwives, obstetricians, gynaecologists, nurses, general practitioners, pelvic floor therapists, etc., by offering both basic knowledge and skills on sexual health and wellbeing, combined with modern sexological knowledge, like the entirely new topic of sexual aspects of preconception care.

*Disease Control Priorities, Third Edition (Volume 2)* Robert Black

2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and

Dear Nicholas Sparks Dawn Torrence Ireland 2016-09-26 On January 1, 2015 an open letter blog was created in high hopes that one mom, along with other determined parents and friends, could implore author Nicholas Sparks to write a book about a family dealing with Congenital Diaphragmatic Hernia (CDH) to raise awareness of this birth defect CDH affects 1600 babies each year in the United States, taking the lives of 800 of these children. The cause is unknown and there is little awareness and virtually no research funding. CDH is as common as Spina Bifida and Cystic Fibrosis. Ms. Ireland founded CHERUBS in 1995, yet the world still does not know about this monster. It was her wild idea to convince Nicholas Sparks to support the cause and give these children a voice. To do what she hasn't been able to do - tell the world about Congenital Diaphragmatic Hernia. One book by Mr. Sparks that includes CDH can open doors to save the lives of 1000's of these children. 1 year, 365 letters, 1 goal - to save these invisible children. The save the cherubs.

God doesn't waste our pain because He transforms the shattered pieces of life into a beautiful masterpiece. It is only by being Beautifully Broken that Rhonda has learned to minister to those who have the same hurts, fears, and dreams. Inducing Labour Sara Wickham 2018-04-30 When is it better to induce labour than to let a woman's body or baby decide the best time for birth? What are the pros and cons of waiting and of being induced? What about after the due date? When the baby is thought to be bigger than average? When the woman is older? If she had IVF? Or when her waters have broken earlier than usual? Induction of labour is an increasingly common recommendation and more and more women find themselves having to decide whether to let their body and baby go into labour spontaneously

**Expecting Better** Emily Oster 2013-08-22 FREAKONOMICS meets WHAT TO EXPECT WHEN YOU'RE EXPECTING in this groundbreaking guidebook. Award-winning Emily Oster debunks myths about pregnancy to empower women while they're expecting. Pregnancy is full of rules. Pregnant women are often treated as if they were children, given long lists of items to avoid- alcohol, caffeine, sushi- without any real explanation from their doctors about why. They hear frightening and contradictory myths about everything from weight gain to sleeping on your back to bed rest from friends and pregnancy books. In EXPECTING BETTER, Oster shows that the information given to pregnant women is sometimes wrong and almost always oversimplified. When Oster was expecting her first child, she felt powerless to make the right decisions for her pregnancy so Oster drew on her own experience and went in search of the real facts about pregnancy using an economist's tools. Economics is the science of determining value and making informed decisions. To make a good decision, you need to understand the information available to you and to know what it means to you as an individual. EXPECTING BETTER overturns standard recommendations for alcohol, caffeine, sushi, bed rest, and induction while putting in context the blanket guidelines for fetal testing, weight gain, risks of pregnancy over the age of thirty-five, and nausea, among others. Oster offers the real-world advice one

**Oh Baby** Kathy Fray 2016-02-29 Much-recommended by new mothers, this is the only book you'll need for the best baby advice. Now completely revised and updated. Refreshingly honest, openly frank and candidly blunt, this book has been written by a mother (who is also an experienced midwife) for other mothers. It oozes warm fuzzies, exudes realism in every paragraph and is refreshing in its guiltless honesty. Modern first-time mothers are often alone - devoid of once-traditional motherhood knowledge and practical support. Often previously self-confident women find themselves isolated, fumbling over everyday mothering tasks, enduring sleep deprivation, feeling desperately despondent - and aching and leaking everywhere. This book provides supportive, caring advice - one mum to another - while at the same time serving as an encyclopaedic medical reference regarding the mother and baby. Checked thoroughly by medical professionals, this book is a unique blend, like having access to a kind and gentle GP as well as to all the gems of wisdom of years of mothers' coffee groups. This title clearly and compassionately explains the ups as well as the downs which are perfectly normal aspects of giving birth and mothering in today's society.
