In Defense of Single-Parent Families - Nancy E. Dowd 1999-05

Dowd (law, U. of Florida) argues that the justifications for stigmatizing single-parent families are founded on myths used to rationalize harshly punitive social policies that hit children hardest. She says that many two-parent families in fact function as single-caregiving environments anyway, that the two kind of families have some unique and some common problems, that the failure or success of a family has little to do with its form, and that single-parent children often grow up with more admirable traits than their more conventional contemporaries. She looks hard at how the laws and other policies lay extra burdens on families, and recommends reforms. Annotation copyrighted by Book News, Inc., Portland, OR

Generation Unbound - Isabel V. Sawhill 2014-09-25

Over half of all births to young adults in the United States now occur outside of marriage, and many are unplanned. The result is increased poverty and inequality for children. The left argues for more social support for unmarried parents; the right argues for a return to traditional marriage. In *Generation Unbound*, Isabel V. Sawhill offers a third approach: change "drifters" into "planners." In a well-written and accessible survey of the impact of family structure on child well-being, Sawhill contrasts "planners," who are delaying parenthood until after they marry, with "drifters," who are having unplanned children early and outside of marriage. These two distinct patterns are contributing to an emerging class divide and threatening social mobility in the United States. Sawhill draws on insights from the new field of behavioral economics, showing that it is possible, by changing the default, to move from a culture that accepts a high number of unplanned pregnancies to a culture in which adults only have children when they are ready to be a parent.

The Secret Sex Life of a Single Mom - Delaine Moore 2012-03-06

For seven years, Delaine Moore devoted herself to being the perfect wife and stay-at-home mom. Then, one day, she discovers her husband's infidelities, and suddenly she finds herself in a new role: 37 years old, mother of three . . . and going through a divorce. In the midst of this emotional turmoil, Moore discovers that her long-dormant libido has suddenly come alive—and, surprising even herself, she decides to listen to what it's saying. *The Secret Sex Life of a Single Mom* is the funny and empowering story of the physical and spiritual self-discovery that results from Moore's sexual awakening. Connecting with a fiery, daring side of her personality that has been subsumed by motherhood and marriage, Moore tries out everything from sex clubs and young gigolos to bondage and multi-partner sex—testing her limits, reclaiming her body, and taking control of her life along the way. More than the story of a woman's breaking and remaking after divorce, *The Secret Sex Life of a Single Mom* is a humorous, thoughtful exploration of what it means to be

a mother and a sexual being, and a reminder that when life slams you down, a little fire won't burn you—it will awaken you.

We Are Family - Susan Golombok 2020-07-02

Our understanding of what makes a family has undergone a revolution in the last few decades, from same-sex parenthood to surrogacy, donor conception, and IVF. But what has the impact been on children? In *We Are Family*, Professor Susan Golombok visits lesbian mothers, gay fathers, single parents, donor conception parents, co-parents, trans parents, surrogates, and donors, and, more importantly, their children, to find out if they are as well-adjusted, happy, and emotionally stable as children from traditional nuclear families. And she discovers that the answer is yes — and sometimes even more so. Susan's work at the Centre for Family Research at Cambridge proves that any family set-up can provide a loving, secure home for a child — although, the children from these families will often face prejudiced attitudes from others. Since the 1970s, when she was first drawn to this area of research after reading about lesbian mothers whose children were being removed from their care, Susan has worked tirelessly to challenge outdated attitudes and prevent families being split up for no good reason. This book tells the stories of those families — their struggles and their triumphs — while celebrating love and family in all its wonderful variations.

Single Mother - Jane Juffer 2006-04

Long perceived as the ultimate symbol of social breakdown and sexual irresponsibility, the single mother is now, in the context of welfare-to-work policies, often hailed as the new spokesperson for hard work and self-sufficiency. A dozen years after Dan Quayle denounced the television

character Murphy Brown for making the decision to become a single mother “just another lifestyle choice,” President George W. Bush applauded single mothers for “heroic work,” and positive on-screen representations of single mothers abound, from *The Gilmore Girls* to *Sex and the City* to *American Idol*. *Single Mother* describes the recent cultural valorization of this figure that—in the midst of demographic changes in the U.S.—has emerged as the unlikely heroic and seductive voice of the new American family. Drawing on her own life as a single mother, interviews with dozens of other single mothers, cultural representations, and policies on welfare, immigration, childcare, and child custody, Juffer analyzes this contingent acceptance of single mothers. Finally, critiquing the relentless emphasis on self-sufficiency to the exclusion of community, Juffer shows the remarkable organizing skills of these new mothers of invention. At a moment when one-third of all babies are born to single moms, *Single Mother* is a fascinating and necessary examination of these new “domestic intellectuals.”

[Sex Role Patterns of School Age Children in Time Used for Household Work](#) - Jeanne M. Peters 1985

Systems theory and role theory were used in this study to develop a management model, integrating the managerial and psycho-social subsystems of the family system. The integrated theory and model were used to derive hypotheses concerning whether or not type of task and actual/relative amount of time spent on household tasks performed by school age children varied according to the sex of the child, attitude

toward feminism of the homemaker, number of parents, and employment status of the homemaker. Whether parents were more sex-segregated than school age children in the performance of household tasks was also assessed. The sample used in this study included 325 school age children from 79 single parent families and 208 two parent families interviewed for the Northeastern Regional Research Project, 113: "An Interstate Urban/Rural Comparison of Families Time Use." Families included in this study were limited to those with at least one school age child, since time data were not collected for children Less than six years of age. Data were collected using two face-to-face interviews, and three instruments: a survey questionnaire, a time-use chart, and a 20-item attitude toward feminism scale. The data were evaluated using both univariate and multivariate analyses. Conclusions reached on the basis of the data analyses were: (1) increased demands in the households of employed women and single parent homemakers were associated with more relative time spent on household tasks by their children, (2) boys in single parent families were more traditional in sex role behavior in the performance of household work than boys in two parent families, (3) girls in single parent families were undifferentiated in sex role behavior in the performance of household work, (4) children in both single parent and two parent families were less sex-segregated than parents in the performance of household work, and (5) the homemaker's attitude toward feminism was not directly related to children's time use in the performance of household work. The results of this study have provided baseline data for examining changing sex roles and time use for household work in the next generation of adults.
