The Decline in Marriage Among African Americans M. Belinda Tucker 1995-07-13 In a time when the American family has undergone dramatic evolution, change among African Americans has been particularly rapid and acute. African Americans now marry later than any other major ethnic group, and while in earlier decades nearly 95 percent of black women eventually married, today 30 percent are expected to remain single. The black divorce rate has increased nearly five-fold over the last thirty years, and is double the rate of the general population. The result, according to *The Decline in Marriage Among African Americans*, is a greater share of family responsibilities being borne by women, an increased vulnerability to poverty and violence, and an erosion of community ties. The original, often controversial, research presented in this book links marital decline to a pivotal drop in the pool of marriageable black males. Increased joblessness has robbed many black men of their economic viability, rendering them not only less desirable as mates, but also less inclined to take on the responsibility of marriage. Higher death rates resulting from disease, poor health care, and violent crime, as well as evergrowing incarceration rates, have further depleted the male population. Editors M. Belinda Tucker and Claudia Mitchell-Kernan and the contributors take a hard look at the effects of chronic economic instability and cultural attitudes toward the male role as family provider. Their cogent historical analyses suggest that the influence of external circumstances over marriage preferences stems in large part from the profoundly damaging experience of slavery. This book firmly positions declining marriage within an ominous cycle of economic and social erosion. The authors propose policies for relieving the problems associated the changing marital behavior, focusing on support for single parent families, public education, and increased employment for African American men.

The House Church Del Birkey 2019-04-15 In this book the author proposes the house church structure as a key to continuing renewal in the church today. After a biblical and historical look at the significance of the house church, the author looks at a model of ministry appropriate to that structure. In light of this model, the author develops a theology of renewal through the servant leadership of both women and men, personal and corporate giftedness, participatory worship, and community commitment.

Love as Passion Niklas Luhmann 2014-12-08 In this important book Niklas Luhmann - one of the leading social thinkers of the late 20th century - analyses the emergence of 'love' as the basis of personal relationships in modern societies. He argues that, while family systems remained intact in the transition from traditional to modern societies, a semantics for love developed to accommodate extra-marital relationships; this semantics was then transferred back into marriage and eventually transformed marriage itself. Drawing on a diverse range of historical and literary sources, Luhmann retraces the emergence and evolution of the special semantics of passionate love that has come to form the basis of modern forms of intimacy and personal relationships. This classic book by Luhmann has been widely recognized as a work of major importance. It is an outstanding contribution to social theory and it provides an original and illuminating perspective on the nature of modern marriage and sexuality.

Designing Families John Scanzoni 2000 *Designing Families* is a thought-provoking examination of the challenges facing the nuclear family as it enters the new millennium. Sexual Bargaining in the Digital Era John H. Scanzoni 2021-10-05 *Sexual Bargaining in the Digital Era* follows the evolution of genders/sexualities and so on away from their Old Normal (ON) pattern, which prevailed during the Agricultural Age and the Industrial Age, and into the New Normal (NN) pattern which is currently surfacing in concert with an emerging Digital Era. ON was based on the ancient traditional script governing how women, men, children ought to behave within the spheres of genders/marriages/families/relationships/sexualities. Over the centuries, ON eventually modified into the familiar 1950s' style (nuclear) patriarchal, cisgender, husband/wife/with children and family. And now that style itself is fading away into NN. NN is based not on script but on improvisation—it is essentially a continual work-in-progress. To make it function the partners engage in ongoing negotiation governed by the principle that “everything is negotiable except the principle that everything is negotiable.” NN has thus far been pursued most frequently by persons (New Lights) who are educated and relatively advantaged. ON has been pursued mostly by persons (Old Lights) who are less educated and relatively less advantaged. ON is also strongly embraced by persons of a traditional religious bent—persons who tend to be rigid and unbending in their religious views. Currently, they tend to be extremely right-wing evangelicals and extremely right-wing Catholics. Importantly, their political clout far exceeds their relatively modest numbers within the larger population. In brief, the shift from ON to NN is a move away from the sanctity of a particular structure to the primacy of persons engaged in ongoing processes of inventing (and reinventing) certain arrangements of genders/marriages/families/relationships/sexualities, enabling them to fulfil their needs for primary (intrinsic/emotional) satisfactions such as liking, loving, empathy, companionship, sexual and so forth. Among other things, this shift replaces the preeminence of the historic binary or cisgender approach—heterosexual, legal, children and so on—in favor of the diversity/variety/multiplicity approach which incorporates under one conceptual umbrella all persons of whatever genders, sexualities and so on. All persons are thus engaged in a common struggle to achieve personal satisfactions as well as contribute to the Greater Good.

Why Gender Matters in Economics Mukesh Eswaran 2020-05-26 An economic way of thinking about the gender issues confronting women around the world Gender matters in economics—for even with today's technology, fertility choices, market opportunities, and improved social norms, economic outcomes for women remain markedly worse than for men. Drawing on insights from feminism, postmodernism, psychology, evolutionary biology, Marxism, and politics, this textbook provides a rigorous economic look at issues confronting women throughout the world—including nonmarket scenarios, such as marriage, family, fertility choice, and bargaining within households, as well as market areas, like those pertaining to labor and credit markets and globalization. Mukesh Eswaran examines how women's behavioral responses in economic situations and their bargaining power within the household differ from those of men. Eswaran then delves into the far-reaching consequences of these differences in both market and nonmarket domains. The author considers how women may be discriminated against in labor and credit markets, how their family and market circumstances interact, and how globalization has influenced their lives. Eswaran also investigates how women have been empowered through access to education, credit, healthcare, and birth control; changes in ownership laws; the acquisition of suffrage; and political representation. Throughout, Eswaran applies sound economic analysis and new modeling approaches, and each chapter concludes with exercises and discussion questions. This textbook gives readers the necessary tools for thinking about gender from an economic perspective. Addresses economic issues for women throughout the world, in both developed and developing countries Looks at both market and nonmarket domains Requires only a background in basic economic principles Includes the most recent research on the economics of gender in a range of areas Concludes each chapter with exercises and discussion questions

Handbook of Family Theories Mark A. Fine 2013-03-05 Organized by content areas rather than by theory, this comprehensive, accessible handbook helps readers gain greater insight into how key theories have impacted today's family research. Most competing books, organized by theory, do not

provide a strong sense of the links between theory and research. Using the 2000 and 2010 decade-in-review issues of the Journal of Marriage and Family as a resource, the book addresses the most important topics impacting family studies research today. The introductory chapter, written by the editors, provides an overview of the role family theories have had on the field. This chapter is followed by 23 others on family-related content areas written by renowned scholars in the field. The book is organized around the most important domains in the field: parenting and parent-child relationships, romantic relationships, conflict and aggression, structural variation and transitions, demographic variations, and families and extra-familial institutions. Each of the contributors describes how theory has been used to generate new knowledge in the field and suggests future directions for how theory may be used to extend our knowledge base. The book helps readers acquire a working knowledge of the key family science theories, findings, and issues and understand how researchers make use of these theories in their empirical efforts. To maximize accessibility, each of the renowned contributors addresses a common set of issues in their chapter: • Introduction to the content area • Review of the key topics, issues, and findings • A description of each of the major theories used to study that particular content area • Limitations of the theories • Suggestions for better use of the theories and/or new theoretical advances • Conclusions about future theoretical developments. An ideal text for graduate and/or advanced undergraduate family theories courses, this book's unique organization also lends itself to use in content-based family studies/science courses taught in family studies, human development, psychology, sociology, communication, education, and nursing. Due to its comprehensive and current approach, the book also appeals to scholars and researchers in these areas.

Biblical Counseling with African-Americans Clarence Earl Walker 1992 This book fills a long-existing need for a guide to Biblical counseling with African Americans that is written by one who lives and understands the black experience. Walker uses the story of Philip and the Ethiopian in Acts 8 as a model for outlining the principles and issues that arise in counseling African Americans.

Investigating Social Problems A. Javier Trevino 2014-08-08 Each chapter in this innovative social problems text is written by a specialist or pair of specialists from appropriate subfields within sociology. The typical single-author approach is limiting given the complexity of the contemporary issues surrounding each social problem discussed. Involving many content experts ensures that the theories, research, and examples used in each chapter will be as current and relevant as possible. Chapters open with personal statements from the contributing authors, discussing how they got involved with studying the problem they are writing about. Javier Trevino serves as the general editor, making sure that each author follows the chapter template and maintains a consistency in level and style.

Sex Differences in Social Behavior Alice H. Eagly 2013-05-13 In presenting an innovative theory of sex differences in the social context, this volume applies social-role theory and meta-analytic techniques to research in aggression, social influence, helping, nonverbal, and group behavior. Eagly's findings show that gender stereotypic behavior results from different male and female role expectations, and that the disparity between these gender stereotypes and actual sex differences is not as great as is often believed.

Families, Labour and Love Maureen Baker 2001 Annotation "We think of family life as very personal, but in fact it is shaped by influences well beyond our control. Families, Labour and Love identifies the ways in which family and personal life in three 'settler' societies - Australia, New Zealand, and Canada - have been shaped by colonization, immigration, globalization, demographic changes, law, and policy." "Baker shows that these three countries, each a former colony, developed similar family trends and similar family policies. The family practices of indigenous people were largely overlooked, as were those of recent immigrant groups. Strongly gendered patterns of paid and unpaid work played a major role in family life. Nevertheless, local conditions also produced significant differences in family experiences among the three countries." "Containing numerous examples, comparative data, and textual sources, Families, Labour and Love provides a wide-ranging analysis of the family that will appeal to students, researchers, and policy-makers."--BOOK JACKET. Hard Choices Kathleen Gerson 1986-03-17 How do women choose between work and family commitments? And what are the causes, limits, and consequences of the "subtle revolution" in women's choices over the 1960s and 1970s? To answer these questions, Kathleen Gerson analyzes the experiences of a carefully selected group of middle-class and working-class women who were young adults in the 1970s. Their informative life histories reveal the emerging social forces in American society that have led today's women to face several difficult choices.

Sourcebook of Family Theories and Methods Pauline Boss 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots (i.e., sources) from which these orientations and strategies flow. Thus, an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself. A goal was thus set to write a book that, like Janus, would face both backward and forward a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project: The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964; the two Contemporary Theories about the Family volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979; and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz, then in production.

Beyond Equilibrium Theory M. Ross DeWitt 2000 Beyond Equilibrium Theory is a fundamentally new interpretation of social reality that introduces theories of social formation and transformation, for micro- and macro-analysis of action systems and social movements. Equilibrium and conflict are viewed as societal variants rather than as ideal or natural states. Classical theorists are placed within a common theoretical framework, in an analysis of social order and social change as separate continua. Multiple path models trace changing patterns of partnering and power sharing. Hypotheses are tested with field-collected survey data, regression analysis of higher-order interactions, and comparisons of means adjusted for other effects. Researchers are provided with detailed methods of integrating theory and research, including nonlinear models and new logics of causality.

Sex and Gender Hilary M. Lips 2017-05-19 Are sex and gender really two different things? How malleable is gender identity? Should we emphasize gender differences? These are only some of the questions Hilary Lips addresses regarding one of the most important dimensions of human life since time immemorial. Stereotypes, gender roles, and how social relationships function all combine to assign meanings to the male-female distinction that affects all aspects of social life. Taking advantage of the abundance of current research that reevaluates and resituates the major issues of sex and gender, the Sixth Edition collects and distills this scholarship into a book that is readily accessible and relevant to today's readers. Lips incorporates knowledge gained from a range of social sciences, taking a critical approach to empirical research. Throughout the book, she emphasizes culturally, racially, and sexually diverse perspectives. A discussion of the role that gender plays in social relationships and power hierarchies illuminates the experience of inequality between men and women in business, education, politics, and the media. The ideas presented in *Sex and Gender* will raise readers' awareness of the issues contributing to that major social problem.

International Handbook of Chinese Families Chan Kwok-bun 2012-12-09 Families are the cornerstone of Chinese society, whether in mainland China, in Taiwan, Hong Kong, Macao, Singapore, Malaysia, or in the Chinese diaspora the world over. *Handbook of the Chinese Family* provides an overview of economics, politics, race, ethnicity, and culture within and external to the Chinese family as a social institution. While simultaneously evaluating its own methodological tools, this book will set current knowledge in the context of what has been previously studied as well as future research directions. It will examine inter-family relationships and politics as well as childrearing, education, and family economics to provide a rounded and in-depth view.

Advances in Personal Relationships Warren H. Jones 1992 Recent research has made it increasingly clear that close personal relationships are the cornerstone of interpersonal behaviour and social contact and that such relationships are more than merely common in human experience, they are necessary for survival. Research indicating that the quality of one's intimate relationships predict the frequency, severity, and prognosis of both psychological and medical complaints and also possibly mediate the influence of environmental stress on adjustment and well-being. It is clear that much work needs to be done in order to fully understand the nature and influence of relationships in our lives.

Intimacy Martin Fisher 2012-12-06 Intimacy is a complex and heterogeneous concept that has generated a variety of definitions, theories, and philosophies over the years. Although there is much disagreement about the essential meaning of the term, there seems to be a consensus that intimacy, whatever it may be, is of central importance in human relationships, and specifically, in the theory and practice of psychotherapy. One approach to intimacy focuses on an intrapsychic conception. Intimacy occurs when an individual achieves full self-knowledge, and is fully in touch with his or her feelings and wishes. From this viewpoint, an intimate act occurs when a person is willing to share these feelings and wishes with another, so that self-disclosure becomes an important index of intimacy. This definition also implies that intimacy need not be reciprocal, so that a therapeutic relationship can achieve a good deal of intimacy without the therapist engaging in self-disclosure. An alternate approach to intimacy stresses the interpersonal nature of the concept. Intimacy is seen as the product of an interaction, and can only occur between people. Each one is able to touch something meaningful in the other, whether at a conscious, behavioral level or an unconscious and inferential level. Therapists seeking intimacy in these terms would probably be a good deal more active, and consider it more important to reveal something of the substance of their own persons, if not the facts of their lives.

The Divorce Process Craig Everett 2021-03-24 Professionals who work with divorcing couples and their families will be inspired by this important book on effective clinical assessment and intervention. The book blends a variety of expert contributions--descriptive, theoretical, and empirical--into a practical handbook that focuses on resources for dealing with the anger and pain of parting spouses and disrupted childhoods. A rich array of clinically useful materials is provided. The book covers background theory, marital interaction, the definition of clinical dysfunctions in children of divorce, specific clinical features of childhood developmental levels, post-divorce reorganization, and models of group work.

For Richer, For Poorer Demie Kurz 2013-12-02 *For Richer, For Poorer* provides a new perspective on the impact of divorce on women. Based on interviews with a random sample of divorced mothers, this book identifies their real concerns: inadequate resources from their ex-husbands and the state, and unequal social policies. Presenting accounts of how they manage the divorce process, divorced women of diverse background describe their attempts to rebuild their own lives and those of their families. Demie Kurz proposes a reversal of policies which penalize the single-parent family by failing to provide mothers and children with adequate resources.
