They vary from gossip at the family dinner table and intimate 'keeping in touch' phone conversations, to interpersonally-focused talk in institutional settings, such as the government office and the university research seminar. Drawing on a range of methodological approaches, including Discourse Analysis and Pragmatics, Interpersonal Communication and Conversation Analysis, the author elevates small talk to a new status, as functionally multifaceted, but central to social interaction as a whole.

The book provides clear and easily-understandable guidelines on how to approach strangers and start an actual conversation that will be engaging and that will show to the other person that you are an interesting and funny person. It has two main parts, the first, where the theoretical background and importance of first impressions is explained, and the second that consists of the seven steps you need to follow in order to make successful first conversations with different people. The true first impression is actually made during the first 50 milliseconds from seeing someone, and that first impression will then guide how you approach that person. But the most fundamental first impression that is crucial to be done right in order for any future conversations to exist, is the impression you make with the first couple of sentences you say. Therefore, knowing how to start a conversation appropriately is the most important social skill you can have. What Makes This Book Different from Others in the Same Category?
