Natural - Alan Levinovitz 2020-04-07

Illuminates the far-reaching harms of believing that natural means “good,” from misinformation about health choices to justifications for sexism, racism, and flawed economic policies. People love what’s natural: it’s the best way to eat, the best way to parent, even the best way to act—naturally, just as nature intended.

Appeals to the wisdom of nature are among the most powerful arguments in the history of human thought. Yet Nature (with a capital N) and natural goodness are not objective or scientific. In this groundbreaking book, scholar of religion Alan Levinovitz demonstrates that these beliefs are actually religious and highlights the many dangers of substituting simple myths for complicated realities. It may not seem like a

problem when it comes to paying a premium for organic food. But what about condemnations of “unnatural” sexual activity? The guilt that attends not having a “natural” birth? Economic deregulation justified by the inherent goodness of “natural” markets? In *Natural*, readers embark on an epic journey, from Peruvian rainforests to the backcountry in Yellowstone Park, from a “natural” bodybuilding competition to a “natural” cancer-curing clinic. The result is an essential new perspective that shatters faith in Nature’s goodness and points to a better alternative. We can love nature without worshipping it, and we can work toward a better world with humility and dialogue rather than taboos and zealotry.

[Young Sikhs in a Global World](#) - Knut A. Jacobsen 2016-03-09

In attempting to carve out a place for themselves in local and global contexts, young Sikhs mobilize efforts to construct, choose, and emphasize different aspects of religious and cultural identification depending on their social setting and context. *Young Sikhs in a Global World* presents current research on young Sikhs with multicultural and transnational life-styles and considers how they interpret, shape and negotiate religious identities, traditions, and authority on an individual and collective level. With a particular focus on the experiences of second generation Sikhs as they interact with various people in different social fields and cultural contexts, the book is constructed around three parts: 'family and home', 'public display and gender', and 'reflexivity and translations'. New scholarly voices and established academics present qualitative research and ethnographic fieldwork and analyse how young Sikhs try to solve social, intellectual and psychological tensions between the family and the expectations of the majority society, between Punjabi culture and religious values.
