John Marks ... reveals what was perhaps the most sinister activity ever engaged in by an organ of the United States government. He describes how the government conducted a series of secret programs to find ways to control human behavior. ... More than a spy story, John Marks has both documented a major portion of the concealed history of our time and spelled out the tragic costs of secrecy and lack of accountability to the democratic system.

Oswald's Trigger Films John Loken 2000 My book is titled, "Oswald's Trigger Films: The Manchurian Candidate, We Were Strangers, Suddenly?", and it was published last winter. I would like it to be catalogued/cross-referenced under the subjects of History, Politics, and Film. I also have a 25-word descriptive blurb for it, but am not sure if I should send the blurb to you or to a colleague. Please let me know. Oh, one final matter: originally I may have indicated that the book was 65 pages long, but that was a mistake, since the final version was/is 81 pages long. It has gotten very good comments so far.

Operation Mind Control (the Complete Edition) Walter H. Bowart 2017-12-26 Operation Mind Control - The CIA - The Making and Unmaking of a KILLER! This is the most terrifying true story ever to emerge from the United States. Walter Bowart has uncovered a huge government "cryptocracy" dedicated to controlling and manipulating human minds. Through hypnosis and drugs, ordinary citizens became CIA zombies, human computers, spies, trained assassins, with no control over their consciousness or consciousness of their actions. Only unexplained memory gaps, or a separate personality which emerged on a trigger cue, showed the victim that something else was amiss. Bowart's devastating account includes top secret documents cold-bloodedly outlining the cryptocracy's program, and startling new evidence to link Lee Harvey Oswald, James Earl Ray, and Sirhan Sirhan with Operation Mind Control. In the *Manchurian Candidate* that was fiction - OPERATION MIND CONTROL IS CHILLING FACT!

Brainwash Dominic Streatfeild 2008-05-27 What would it take to turn you into a suicide bomber? How would you interrogate a member of Al Qaeda? With access to formerly classified documentation and interviews from the CIA, the U.S. Army, MI5, MI6, and the British Intelligence Corps, acclaimed journalist Dominic Streatfeild traces the history of the world's most secret psychological procedure. From the cold war to the height of today's war on terror, groups as dissimilar as armies, religious cults, and advertising agencies have been accused of brainwashing. But what does this mean? Is it possible to erase memories or to implant them artificially? Do heavy-metal records contain subliminal messages? Do religious cults brainwash recruits? What were the CIA and MI6 doing with LSD in the 1950s? How far have the world's militaries really gone? From the author of the definitive history of cocaine, *Brainwash* is required reading in an era of cutting-edge and often controversial interrogation practices. More than just an examination of the techniques used by the CIA, the KGB, and the Taliban, it is also a gripping, full history of the heated efforts to master the elusive, secret techniques of mind control.

Four Trojan Horses of Humanism Harry Conn 1982 "Humanism is the most dangerous religion ever foisted upon mankind. It subtly attacks the very heart, mind and soul of people of all ages. Dissenting POWs Tom Wilber 2021-04-22 "Looking into the underlying factional divide between pro-war "hardliners" and anti-war "dissidents" among the POWs, authors Wilber and Lembcke delve into the postwar American culture that created the myths of the Hero-POW and the dissidents blamed for the loss of the war. What they found was that it was the class backgrounds of the captives and their pre-captive experience that drew the lines. After the war, the hardcore hero-holdouts, like John McCain, moved on to careers in politics and business, while the dissidents faded from view as the antiwar movement, that might otherwise have championed them, disbanded"--

Battle for the Mind William Sargant 1997 How can an evangelist convert a hardboiled sophisticate? Why does a prisoner of war sign a "confession" that he knows is false? How is a criminal pressured into admitting his guilt? Do the evangelist, the POW's captor, and the policeman use similar methods to gain their ends? These and other compelling questions are discussed in this definitive work by William Sargant, who for many years until his death in 1988 was a leading physician in psychological medicine. Sargant spells out and illustrates the basic technique used by evangelists, psychiatrists, and brainwashers to disperse the patterns of belief and behavior already established in the minds of their hearers, and to substitute new patterns for them.

The Manchurian Candidate Greil Marcus 2020-05-14 "It may be the most sophisticated political thriller ever made in Hollywood," film critic Pauline Kael wrote of John Frankenheimer's terrifying 1962 political thriller about an American serviceman brainwashed in Korea and made into an assassin. Sophisticated to be sure, it's also a headlong fall through the looking-glass of American politics and the most deeply prophetic film of the second half of the American century. As Greil Marcus reconstructs the drama, *The Manchurian Candidate* is a movie in which the director and actors, including Laurence Harvey, Frank Sinatra and Angela Lansbury in an Academy Award-nominated performance, were suddenly capable of anything,

beyond any expectations. This edition includes a new foreword highlighting the movie's terrifying contemporary relevance in the age of Trump and Russian interference in the US Presidential election.

The Shock Doctrine Naomi Klein 2014-10-02 'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent

Autobiography of a Sex Worker Nalini Jameela 2007 Sex workers are free in four respects: we don't have to cook for a husband; we don't have to wash his dirty clothes; we don't have to ask for his permission to raise our kids as we deem fit; we don't have to run after a husband claiming rights to his property.? Fiery, outspoken and often wickedly funny, this candid account of one woman's life as a sex worker in Kerala became a bestseller when it was first published in Malayalam. Nalini Jameela, who takes her name from both Hindu and Muslim traditions, worked as a child in the clay mines. She has been a wife, mother, successful business woman and social activist ? as well as a sex worker ? at different stages of her life. This is Nalini Jameela's story, told in her inimitably honest and down- to-earth style, of her search for dignity, empowerment and freedom on her own terms.

Chaos Tom O'Neill 2019-06-27 As featured on The Joe Rogan Experience _____ A journalist's twenty-year obsession with the Manson murders leads to shocking new conspiracy theories about the FBI's involvement in this fascinating re-evaluation of one of the most infamous cases in American history. Twenty years ago, reporting for a routine magazine piece about the infamous Manson murders, journalist Tom O'Neill didn't expect to find anything new. But the discovery of horrifying new evidence kick-started an obsession and his life's work. What had he unearthed and what did it mean: why was there surveillance by intelligence agents? Why did the police make these particular mistakes and why did Tom's greatest ally in this fight turn into his biggest foe? Chaos is an explosive read that will shock, grip and change our understanding of a case that has haunted the world for over fifty years. _____ 'Riveting ... Sensational revelations ... True crime fans will be enthralled.'

The CIA File Robert Borosage 1976

The Search for the "Manchurian Candidate" John D. Marks 1988-07-01 The CIA's attempt to find effective mind control techniques are recounted from their origins in the drug research of World War II, to their experiments on frequently unknowing subjects involving hypnosis and drugs such as LSD

The Assassination of Robert F. Kennedy William W. Turner 1978 Around midnight, shortly after claiming victory in the California presidential primary on June 5, 1968, Senator Robert Kennedy walked into a deadly spray of gunfire. Immediately the Los Angeles Police Department concluded that the assassin, Sirhan Sirhan, had acted alone. The FBI conducted a parallel inquiry and concurred. And the vast majority of the American people accepted their opinion. In this book -- mysteriously suppressed on its initial publication -- former FBI agent William Turner and investigative reporter Jonn Christian expose evidence that Sirhan did not act alone. Based on more than ten years of intensive research, Turner and Christian raise serious questions about RFK's murder: What was the virtually apolitical Sirhan's motive? Why, if Sirhan was standing in front of his victim, were the fatal wounds in the back of Kennedy's head? Why were there too many spent bullets (some the wrong size) for Sirhan's gun? Did the LAPD discredit witnesses, try to make them alter their stories, and destroy key records? Was Sirhan, in fact, a "Manchurian Candidate," programmed through hypnosis either to kill Kennedy or divert attention while others did the job? The Assassination of Robert F. Kennedy makes the case that the murder of RFK, and the subsequent police and government investigations, bear all the hallmarks of the conspiracy surrounding the assassination of John F. Kennedy and the resulting Warren Commission. It is a fascinating and chilling reexamination of the tragic events that undoubtedly changed the course of American history.

A Terrible Mistake H. P. Albarelli 2009-07-01 Following nearly a decade of research, this account solves the mysterious death of biochemist Frank Olson, revealing the identities of his murderers in shocking detail. It offers a unique and unprecedented look into the backgrounds of many former CIA, FBI, and Federal Narcotics Bureau officials—including several who actually oversaw the CIA's mind-control programs from the 1950s to the 1970s. In retracing these programs, a frequently bizarre and always frightening world is introduced, colored and dominated by many factors—Cold War fears, the secret relationship between the nation's drug enforcement agencies and the CIA, and the government's close collaboration with the Mafia.

Poisoner in Chief Stephen Kinzer 2019-09-10 The bestselling author of All the Shah's Men and The Brothers tells the astonishing story of the man who oversaw the CIA's secret drug and mind-control experiments of the 1950s and '60s. The visionary chemist Sidney Gottlieb was the CIA's master magician and gentlehearted torturer—the agency's "poisoner in chief." As head of the MK-ULTRA mind control project, he directed brutal experiments at secret prisons on three continents. He made pills, powders, and potions that could kill or maim without a trace—including some intended for Fidel Castro and other foreign leaders. He paid prostitutes to lure clients to CIA-run bordellos, where they were secretly dosed with mind-altering drugs. His experiments spread LSD across the United States, making him a hidden godfather of the 1960s counterculture. For years he was the chief supplier of spy tools used by CIA officers around the world. Stephen Kinzer, author of groundbreaking books about U.S. clandestine operations, draws on new documentary research and original interviews to bring to life one of the most powerful unknown Americans of the twentieth century. Gottlieb's reckless experiments on "expendable" human subjects destroyed many lives, yet he considered himself deeply spiritual. He lived in a remote cabin without running water, meditated, and rose before dawn to milk his goats. During his twenty-two years at the CIA, Gottlieb worked in the deepest secrecy. Only since his death has it become possible to piece together his astonishing career at the intersection of extreme science and covert action. Poisoner in Chief reveals him as a clandestine conjurer on an epic scale.

Banned Mind Control Techniques Unleashed Daniel Smith 2014-11-18 Mind control is a tool that one can use for good or evil purposes. It all depends on the type of mind control that is involved and the intent of the individual who wants to apply it. Cinema '62 Stephen Farber 2020-03-13 Lawrence of Arabia, The Miracle Worker, To Kill a Mockingbird, The Manchurian Candidate, Gypsy, Sweet Bird of Youth, The Longest Day, The Music Man, What Ever Happened to Baby Jane, and more. Most conventional film histories dismiss the early 1960s as a pallid era, a downtime between the heights of the classic studio system and the rise of New Hollywood directors like Scorsese and Altman in the 1970s. It seemed to be a moment when the movie industry was floundering as the popularity of television caused a downturn in cinema attendance. Cinema '62 challenges these assumptions by making the bold claim that 1962 was a peak year for film, with a high standard of quality that has not been equaled since. Stephen Farber and Michael McClellan show how 1962 saw great late-period work by classic Hollywood directors like John Ford, Howard Hawks, and John Huston, as well as stars like Bette Davis, James Stewart, Katharine Hepburn, and Barbara Stanwyck. Yet it was also a seminal year for talented young directors like Sidney Lumet, Sam Peckinpah, and Stanley Kubrick, not to mention rising stars like Warren Beatty, Jane Fonda, Robert Redford, Peter O'Toole, and Omar Sharif. Above all, 1962—the year of To Kill a Mockingbird and The Manchurian Candidate—gave cinema attendees the kinds of adult, artistic, and uncompromising visions they would never see on television, including classics from Fellini, Bergman, and Kurosawa. Culminating in an analysis of the year's Best Picture winner and top-grossing film, Lawrence of Arabia, and the factors that made that magnificent epic possible, Cinema '62 makes a strong case that the movies peaked in the Kennedy era.

Using Hypnotism: Expert Tips from the Creator of the Manchurian Candidate Or Mind-Controlled Assassin G. Estabrooks 2017-03-30 Since the days of Count Mesmer, discoverer of "mesmerism" (the name given to the strange condition of mind we now call the "hypnotic trance"), this mysterious force has been both exploited and discredited. The author of "Using Hypnotism," George H. Estabrooks (creator of the "Manchurian Candidate" or mind-controlled assassin for the U.S. military) does his best to bring credit to the field, despite its obvious exploitation. Estabrooks believes that hypnotism stands in the same category as chemistry, physics, and mathematics, and should not be shadowed by popular ignorance and suspicion. It is based on definite laws and principles, and has evolved as a true science - a branch of the great subject of the human brain and human consciousness. The main facts and rules upon which the science of hypnotism are based are presented in this book. However, certain highly specific technical applications of those rules are unsuited for popular consumption, and are only touched on lightly, such as the use of hypnotism in warfare. Despite the obvious dangers of such techniques, the author believes it is the duty of science to discover, analyze, and master the mechanisms involved, regardless of how the unscrupulous may use them. While Estabrooks explodes a good many myths and popular superstitions about hypnotism, he makes it clear that hypnotic trance can be easily induced in many people, even without their knowledge, and then used either for good and beneficent purposes or the opposite. To know the truth about this mysterious force is a vital matter for all of us.
