Aesthetic Practices and Politics in Media, Music, and Art - Rocío G. Davis 2010-09-13
This volume analyzes innovative forms of media and music (art installations, television commercials,

photography, films, songs, telenovelas) to examine the performance of migration in contemporary culture. Though migration studies and media studies are ostensibly different fields, this transnational collection of

essays addresses how their interconnection has shaped our understanding of the paradigms through which we think about migration, ethnicity, nation, and the transnational. Cultural representations intervene in collective beliefs. Art and media clearly influence the ways the experience of migration is articulated and recalled, intervening in individual perceptions as well as public policy. To understand the connection between migration and diverse media, the authors examine how migration is represented in film, television, music, and art, but also how media shape the ways in which host country and homeland are imagined. Among the topics considered are new mediated forms for representing migration, widening the perspective on the ways these representations may be analyzed; readings of enactments of memory in trans- and interdisciplinary ways; and discussions of globalization and transnationalism, inviting us to rethink traditional borders in respect to migration, nation states, as well as disciplines.

Understanding the Effects of Child Sexual Abuse - Sam Warner 2009-01-13

Child sexual abuse is a global problem that negatively affects many women and girls. As such, it has long been of concern to feminists, and more recently mental health activists. This book draws on this revolutionary legacy, feminism and post-structuralism to critically examine current perceptions of women, girls and child abuse in psychology, psychiatry and the mass media, and to re-evaluate mainstream and feminist approaches to this subject. The book aims to contribute to the ongoing development of a knowledge-base for working with abused women and girls, and demonstrates the need to question the use of formulaic methods in working with abused women and girls. It calls for an explicit concern with politics, principles and ethics in the related areas of theory, research and practice. Using research into women who have been sexually abused in childhood, and who are detained in maximum security mental health care, Sam Warner explores and identifies key principles for practice. A social recovery model of intervention is developed, and case study examples are used to demonstrate its applicability in a range of practice areas. These include abuse psychotherapy; expert witness reports in child protection; with mothers of abused girls; and with women and girls in secure care contexts. This thorough investigation of this emotive issue provides a clear theoretical and practical framework for understanding and coping with child sexual abuse. This book will be of interest to anyone who works with children and adults who have been abused. This includes clinical psychologists, therapists and other professionals that work in mental health, psychotherapy and social services; and legal settings within both community and secure care contexts. It should also be essential reading for students and academics in this area.

The Etherized Wife - Leslie Margolin 2021

"The Etherized Wife provides a comprehensive examination of the evolution of sex therapy through the prism of gender. The book makes the argument that in sex therapy, like other domains of life in which men set the standard of normality, women have been judged normal to the degree they match men's expectations. What is particularly striking about this bias is that it contradicts therapists' overt identification with feminism and the battle against women's inequality. To support these claims, Leslie Margolin maps a series of case studies drawn from the discipline's own literature—the articles and books that have been, and continue to be treated as exemplars of the discipline's collective consciousness. Through examination of case studies which focus on discrepancies in sexual desire, where the man wants more sex and the woman less, the book shows how therapists have favoured the man's side. The Etherized Wife shows how the sex therapy discipline has unintentionally enshrined male sexuality as the model of normal, natural, healthy sexuality"--

Impotence - Angus McLaren 2008-09-15

As anyone who has watched television in recent years can attest, we live in the age of Viagra. From Bob Dole to Mike Ditka to late-night comedians, our culture has been engaged in one long, frank, and very public talk about impotence—and our newfound pharmaceutical solutions. But as Angus McLaren shows us in *Impotence*, the first cultural history of the subject, the failure of men to rise to the occasion has been a recurrent topic since the dawn of human culture. Drawing on a dazzling range of sources from across centuries, McLaren demonstrates how male sexuality was constructed around the idea of potency, from times past when it was essential for the purpose of siring children, to today, when successful sex is viewed as a component of a healthy emotional life. Along the way, *Impotence* enlightens and fascinates with tales of sexual failure and its remedies—for example, had Ditka lived in ancient Mesopotamia, he might have

recited spells while eating roots and plants rather than pills—and explanations, which over the years have included witchcraft, shell-shock, masturbation, feminism, and the Oedipal complex. McLaren also explores the surprising political and social effects of impotence, from the revolutionary unrest fueled by Louis XVI's failure to consummate his marriage to the boost given the fledgling American republic by George Washington's failure to found a dynasty. Each age, McLaren shows, turns impotence to its own purposes, using it to help define what is normal and healthy for men, their relationships, and society. From marriage manuals to metrosexuals, from Renaissance Italy to Hollywood movies, *Impotence* is a serious but highly entertaining examination of a problem that humanity has simultaneously regarded as life's greatest tragedy and its greatest joke.

Body Work - Sylvia K. Blood 2004-03

Experimental psychology formulates and resolves research questions about 'body image' in terms of the pathology of particular women. What it does not focus on, however, are the discursive practices at work in its own assumptions.

The Science/Fiction of Sex - Annie Potts 2014-02-25

What can we learn from exploring the differences in male and female orgasmic experience? Is the penis an entity with a mind of its own? These issues and others, such as the popular portrayals of male sexuality as active and outwardly focused and female sexuality as passive and internally located, are discussed in *The Science/Fiction of Sex*. Contemporary feminist and poststructuralist theories of sex and gender are explored alongside an investigation of how people make sense of such concepts as heterosexuality, orgasm, sexual dysfunction, femininity and masculinity, and safer sex practice. Potts asks men and women about their actual experiences of heterosex. This interview material, combined with excerpts from sexological and medical texts and features from film and television, draws attention to the ways in which western cultural constructs influence our ideas and experiences of the body, sex, and gender. Potts also uses deconstructive theory as a textual tool, concentrating on how binary oppositions such as inside/outside and mind/body impact on our understandings of heterosex, and affect the power relations between women and men. She also examines how the radical postmodern theories of the body and sexuality proposed by Irigaray, Lyotard, and Deleuze and Guattari disrupt such dualistic modes of understanding and experiencing sexualized bodies. *The Science/Fiction of Sex* will be of interest to those studying women and psychology as well as gender studies, cultural studies, feminist studies, sociology, philosophy, public health and education.

Feminist Periodicals - 2004

Sex and the Body - Annie Potts 2004

Sex and the body presents an exciting showcase of original work by feminist scholars from Aotearoa New Zealand.

Encyclopedia of Social Theory - Austin Harrington 2006

"The *Encyclopedia of Social Theory* provides a reference source for students and academics, embracing all major aspects of the field. Written by more than 200 internationally distinguished scholars, almost 500 entries cover core contemporary topics, concepts, schools, debates, and personalities in the history of the discipline. Special attention is paid to leading schools and debates, with shorter entries reserved for biographies of key theorists and definitions of key terms. Entries are fully cross-referenced and contain concise listings for further reading. A comprehensive index guides the reader to further divisions of contents."--BOOK JACKET.

Phoebe - 2006

Do Androids Sleep with Electric Sheep? - Johannes Grenzfurthner 2009

As the official artists' collective representing Vienna at the São Paulo Art Biennial in 2002, the monochrom group -- Johannes Grenzfurthner, Günther Friesinger, and Daniel Fabry -- invented an artist called Georg Paul Thomann and carried off the exhibition as a very elaborate prank. The trio, aided by philosopher Thomas Ballhausen, brings that same sense of the cutting-edge and the carnivalesque to this collection exploring erotica, science fiction, and technology. A bracing mix of literary forms, the book shows why the fantasy genre is especially suited to the investigation of the transgressive realms of sexuality and

pornography. Here questions of science, research, and technologization are examined, along with the complex surrounding urbanism, artificiality, and control (or the loss of control). Provocative and penetrating, *Do Androids Sleep with Electric Sheep?* reveals a wealth of depictions of the future and shows the many ways in which they also address the present.

Sex and Sexualities - Valerie Walkerdine 2001

This is the third issue of the journal. It brings together a selection of papers which tackle sex and sexualities from a variety of perspectives - sexual abuse, gay and lesbian sexuality, transexuality, the sexually assertive heterosexual woman and the philosophy of Deleuze and Guattari. The contributors in this issue focus on the psychologization of sexuality; this is not a new topic but it is a crucial one for critical psychologists, given the regulative role of psychological practices at present. desire; Paula Reavey and Sam Warner on women survivors of child sexual abuse; Peter Emerson and Stephen Frosh on sexually abusive boys; Katrina Roen on the interpretation of transexuality as being in the wrong body; Nicola Gavey and Marion Doherty on the sexually assertive heterosexual woman; Annie Potts on the place of orgasm in the work of Deleuze and Guattari.

Science/Fiction of Sex - Annie Potts 2014

Sanctioning Pregnancy - Harriet Gross 2007-05-07

Pregnancy provides a very public, visual confirmation of femininity. It is a time of rapid physical and psychological adjustment for women and is surrounded by stereotyping, taboos and social expectations. This book seeks to examine these popular attitudes towards pregnancy and to consider how they influence women's experiences of being pregnant. *Sanctioning Pregnancy* offers a unique critique of sociocultural constructions of pregnancy and the ways in which it is represented in contemporary culture, and examines the common myths which exist about diet, exercise and work in pregnancy, alongside notions of risk and media portrayals of pregnant women. Topics covered include: Do pregnant women change their diet and why? Is memory really impaired in pregnancy? How risky behaviour is defined from exercise to employment The biomedical domination of pregnancy research. Different theoretical standpoints are critically examined, including a medico-scientific model, feminist perspectives and bio-psychosocial and psychodynamic approaches.

How Sex Got Screwed Up: The Ghosts that Haunt Our Sexual Pleasure - Book Two - Jon Knowles 2019-03-31

The ghosts that haunt our sexual pleasure were born in the Stone Age. Sex and gender taboos were used by tribes to differentiate themselves from one another. These taboos filtered into the lives of Bronze and Iron Age men and women who lived in city-states and empires. For the early Christians, all sex play was turned into sin, instilled with guilt, and punished severely. With the invention of sin came the construction of women as subordinate beings to men. Despite the birth of romance in the late middle ages, Renaissance churches held inquisitions to seek out and destroy sex sinners, all of whom it saw as heretics. The Age of Reason saw the demise of these inquisitions. But, it was doctors who would take over the roles of priests and ministers as sex became defined by discourses of crime, degeneracy, and sickness. The middle of the 20th century saw these medical and religious teachings challenged for the first time as activists, such as Alfred Kinsey and Margaret Sanger, sought to carve out a place for sexual freedom in society. However, strong opposition to their beliefs and the growing exploitation of sex by the media at the close of the century would ultimately shape 21st century sexual ambivalence. Book Two of this two-part publication traces the history of sex from the Victorian Era to present day. Interspersed with 'personal hauntings' from his own life and the lives of friends and relatives, Knowles reveals how historical discourses of sex continue to haunt us today. This book is a page-turner in simple and plain language about 'how sex got screwed up' for millennia. For Knowles, if we know the history of sex, we can get over it.

The Sex Myth - Rachel Hills 2015-08-04

From a bold new feminist voice, a book that will change the way you think about your sex life. Fifty years after the sexual revolution, we are told that we live in a time of unprecedented sexual freedom; that if anything, we are too free now. But beneath the veneer of glossy hedonism, millennial journalist Rachel Hills argues that we are controlled by a new brand of sexual convention: one which influences all of us—woman

or man, straight or gay, liberal or conservative. At the root of this silent code lies the Sex Myth—the defining significance we invest in sexuality that once meant we were dirty if we did have sex, and now means we are defective if we don't do it enough. Equal parts social commentary, pop culture, and powerful personal anecdotes from people across the English-speaking world, *The Sex Myth* exposes the invisible norms and unspoken assumptions that shape the way we think about sex today.

The Science/fiction of Sex - Annie Potts 1999

Sex Scene - Eric Schaefer 2014-03-24

Sex Scene suggests that what we have come to understand as the sexual revolution of the late 1960s and early 1970s was actually a media revolution. In lively essays, the contributors examine a range of mass media—film and television, recorded sound, and publishing—that provide evidence of the circulation of sex in the public sphere, from the mainstream to the fringe. They discuss art films such as *I am Curious (Yellow)*, mainstream movies including *Midnight Cowboy*, exploitation films such as *Mantis in Lace*, the emergence of erotic film festivals and of gay pornography, the use of multimedia in sex education, and the sexual innuendo of *The Love Boat*. Scholars of cultural studies, history, and media studies, the contributors bring shared concerns to their diverse topics. They highlight the increasingly fluid divide between public and private, the rise of consumer and therapeutic cultures, and the relationship between identity politics and individual rights. The provocative surveys and case studies in this nuanced cultural history reframe the "sexual revolution" as the mass sexualization of our mediated world. Contributors. Joseph Lam Duong, Jeffrey Escoffier, Kevin M. Flanagan, Elena Gorfinkel, Raymond J. Haberski Jr., Joan Hawkins, Kevin Heffernan, Eithne Johnson, Arthur Knight, Elana Levine, Christie Milliken, Eric Schaefer, Jeffrey Sconce, Jacob Smith, Leigh Ann Wheeler, Linda Williams

Contesting Illness - Katherine Anne Teghtsoonian 2008

The relationship between power and illness is the subject of limited discussion despite it being one of the most important issues in health-related policies and services. In an effort to correct this, *Contesting Illness* engages critically with processes through which the meanings and effects of illness shape and are shaped by specific sets of practices. Featuring original contributions by researchers working in a number of disciplines, this collection examines intersections of power, contestation, and illness with the aid of various critical theoretical frameworks and methodological approaches. The contributors explore experiences of illness, diagnosis, and treatment, and analyse wider discursive and policy contexts within which people become ill and engage with health care systems. Though each essay is unique in its approach, they are linked together by a shared focus on contestation as a conceptual tool in considering the relationship between power and illness. Rather than focus on a single example, the contributors address different contested illnesses (chronic fatigue syndrome and environmental illness, for instance) as well as the contested dimensions of illnesses that are accepted as legitimate such as cancer and autism. *Contesting Illness* offers valuable insights into the assumptions, practices, and interactions that shape illness in the twenty-first century. Contributors Jan Angus Pia H. Bülow Peter Conrad Joyce Davidson Helen Gremillion Maren Klawiter Joshua Kelley Steve Kroll-Smith Katherine Lippel Pamela Moss Michael Orsini Michael J. Prince Annie Potts Mary Ellen Purkis Sharon Dale Stone Cheryl Stults Katherine Teghtsoonian Jane M. Ussher Catherine van Mossel

Psychological Perspectives on Sexual Problems - Jane M. Ussher 1993

The regulation of sexuality and the careful distinction between normality and abnormality has a long and checkered history—with psychologists at the forefront of this debate. Yet any attempt to identify a simple and unitary 'psychology of sexual problems' inevitably becomes the focus of a great deal of criticism, particularly from the disciplines of psychoanalysis and feminism. The aim of *Psychological Perspectives on Sexual Problems* is both to provoke and to promote a glasnost between those whose work directly involves research and intervention in the arena of sexuality, and those who would deconstruct, criticize, and reframe any understanding of sexuality outside of the dominant discourse of psychology. The contributors examine the psychological theories associated with sexuality and sexual problems and at the same time present examples of positive and empowering practice with groups of individuals whose sexuality is often ignored or marginalized. These individuals include those with learning difficulties or physical disabilities, sex

offenders, gay men with AIDS, and women with eating disorders. Psychological Perspectives on Sexual

Problems is the first text to integrate critical theory and current clinical practice, in an attempt to arrive at a revolutionary approach to the psychology of sexuality.
