Bright Light City - Larry Gragg 2013-04-04

When Elvis crooned "Bright light city . . . gonna set my soul on fire," he voiced and embraced the siren call of a glittering urban utopia that continues to mesmerize millions. Call it Sin City or Lost Wages, Las Vegas definitely deserves its rapturous "Viva!" Larry Gragg, however, invites readers to view Las Vegas in an entirely new way. While countless other authors have focused on its history or gaming industry or entertainment ties, Gragg considers how popular culture has depicted the city and its powerful allure over its first century. Drawing on hundreds of films, television programs, novels, and articles, Gragg identifies changing trends in the city's portraits. Until the 1940s, boosters promoted it as the "last frontier town," a place where prospectors and cowboys enjoyed liquor, women, and wide-open gambling. Then in the early 1950s commentators increasingly characterized Las Vegas as a sophisticated resort city in the desert, and ever since then journalists, filmmakers, and novelists have depicted a city largely built by organized crime and featuring non-stop entertainment, gambling, luxury, and, of course, beautiful-and available-women. In Gragg's narrative, these images form a kaleidoscope of lights, sounds, characters, and ultimately amazement about this neon oasis. In these pages, readers will meet gangsters like Bugsy Siegel, Tony Spilotro, and Lefty Rosenthal, as well as Las Vegas's most popular entertainers: Elvis Presley, Sinatra's Rat Pack, Liberace, and Wayne Newton, not to mention the Folies Bergere showgirls. And Gragg's skillful interweaving of fictional and journalistic accounts of organized crime shows just how mutually reinforcing they have become over the years. Vegas will always make people's eyes light up as bright as the Strip, witness the new TV show Vegas or the recent film The Hangover. For everyone entranced by its glitter and

glamour, Bright Light City is a must read boasting color photos and bursting with insider details: an eclectic blend of stories, people, sights, and sounds that together make up this desert city's extraordinary appeal.

21: Bringing Down the House - Ben Mezrich 2012-02-29

Real-life all too rarely offers stories that are quite as satisfying as fiction. Bringing Down the House is one of the exceptions. Cheating in casinos is illegal; card-counting - making a record of what cards have so far been dealt to enable the player to make some prediction of what cards remain in the deck - is not. But casinos understandably dislike the practice and make every effort to keep card-counters out of their premises. Bringing Down the House tells the true story of the most successful scam ever, in which teams of brilliant young mathematicians and physicists won millions of dollars from the casinos of Las Vegas, being drawn in the process into the high-life of drugs, high-spending and sex. Bringing Down the House is as readable and as fascinating as Liar's Poker or Barbarians At the Gate, an insight into a closed, excessive and utterly corrupt world.

Falling Awake - Todd L. Blattner 2016-11-29

Waking is a natural shift from unconsciousness to awareness. Falling awake is a special case of waking where we relax out of old patterns, ease out of resistance, and surrender to the grace and love that are always present beneath the surface of appearances. Although falling awake, like falling asleep, cannot be forced, it can be prepared for. Integrating perspectives from physical, social and psychological sciences, philosophy, religion and energy awareness, and calling on many years of experience as a teacher, counsellor and Buddhist monk, Blattner takes us step by step into an expanded understanding of the universe in which we live, the mind/body system that we call "self", and that which may lie beyond. With gentleness and kindness, *Falling Awake* shows us how to move beyond the programs and limiting belief systems that support the problems in our lives, and awaken into an increasingly gentle, joyful, and expanded experience of the art of living....

Healthy Aging - Patrick P. Coll 2019-03-29

This book weaves all of these factors together to engage in and promote medical, biomedical and psychosocial interventions, including lifestyle changes, for healthier aging outcomes. The text begins with an introduction to age-related changes that increase in disease and disability commonly associated with old age. Written by experts in healthy aging, the text approaches the principles of disease and disability prevention via specific health issues. Each chapter highlights the challenge of not just increasing life expectancy but also decreasing disease burden and disability in old age. The text then shifts into the whole-person implications for clinicians working with older patients, including the social and cultural considerations that are necessary for improved outcomes as Baby Boomers age and healthcare systems worldwide adjust. *Healthy Aging* is an important resource for those working with older patients, including geriatricians, family medicine physicians, nurses, gerontologists, students, public health administrators, and all other medical professionals.

Guide to Psychological Assessment with Asians - Lorraine T. Benuto 2014-06-26

To effectively serve minority clients, clinicians require a double understanding: of both evidence-based practice and the cultures involved. This particularly holds true when working with Asian-Americans, a diverse and growing population. The Guide to Psychological Assessment with Asians synthesizes real-world challenges, empirical findings, clinical knowledge and common-sense advice to create a comprehensive framework for practice. This informed resource is geared toward evaluation of first-generation Asian Americans and recent immigrants across assessment methods (self-report measures, projective tests), settings (school, forensic) and classes of disorders (eating, substance, sexual). While the Guide details cross-cultural considerations for working with Chinese-, Japanese-, Korean and Indian-American clients, best practices are also included for assessing members of less populous groups without underestimating, overstating or stereotyping the role of ethnicity in the findings. In addition, contributors discuss diversity of presentation within groups and identify ways that language may present obstacles to accurate evaluation. Among the areas covered in this up-to-date reference: Structured and semi-structured clinical interviews. Assessment of acculturation, enculturation and culture. IQ testing. Personality disorders. Cognitive decline and dementia. Mood disorders and suicidality. Neuropsychological assessment of children, adolescents and adults. Culture-bound syndromes. Designed for practitioners new to working with Asian clients as well as those familiar with the population, the Guide to Psychological Assessment with Asians is exceedingly useful to neuropsychologists, clinical psychologists, health psychologists and clinical social workers.
