Beauty and Business - Philip Scranton

2014-03-05

Beauty seems simple; we know it when we see it. But of course our ideas about what is attractive are influenced by a broad range of social and economic factors, and in *Beauty and Business* leading historians set out to provide this important cultural context. How have retailers shaped popular consciousness about beauty? And how, in turn, have cultural assumptions influenced the commodification of beauty? The contributors here look to particular examples in

order to address these questions, turning their attention to topics ranging from the social role of the African American hair salon, and the sexual dynamics of bathing suits and shirtcollars, to the deeper meanings of corsets and what the Avon lady tells us about changing American values. As a whole, these essays force us to reckon with the ways that beauty has been made, bought, and sold in modern America.

The Naked Man - Desmond Morris 2012-08-31
Following on from the international success of *The Naked Woman*, bestselling zoologist Desmond Morris turns his attention to the human male. *The Naked Man* is a study of the masculine body from head to toe, exploring how biological features have been modified, suppressed or exaggerated by customs and changes in social fashions. Packed full of scientific fact, engaging anecdote and thought-provoking conclusions, including a controversial chapter examining male sexuality, *The Naked Man* is a must-read for anyone interested in this far from rare, but nevertheless endangered species.

The last taboo - Karin Lesnik-Oberstein

2013-07-19

This is the first academic book ever written on women and body hair, which has been seen until now as too trivial, ridiculous or revolting to write about. Even feminist writers or researchers on the body have found remarkably little to say about body hair, usually ignoring it completely. It would appear that the only texts to elaborate on body hair are guides on how to remove it, medical texts on 'hirsutism', or fetishistic pornography on 'hairy' women. The last taboo also questions how and why any particular issue can become defined as 'self-evidently' too silly or too mad to write about. Using a wide range of thinking from gender theory, queer theory, critical and literary theory, history, art history, anthropology and psychology, the contributors argue that in fact body hair plays a central role in constructing masculinity and femininity and sexual and cultural identities. It is sure to provide many academic researchers with a completely fresh perspective on all of the fields

From Television to the Internet - Wiley Lee Umphlett 2006

This book complements and expands on the commentary and conclusions of the author's initial inquiry into the modern era of media-made culture in *The Visual Focus of American Media Culture in the Twentieth Century* (FDUP, 2004). From the 1890s on to the 1920s and the Depression and World War II years, society's pervasively communal focus demanded idealized images and romanticized interpretations of life. But the communal imperative, as it was impacted on by evolving social change, harbored the seeds of its own disintegration.

Contemporary Australian Feminism - Kate Pritchard Hughes 1994

Text for undergraduate women's studies students. Consists of 9 articles, by a range of writers and academics, addressing issues such

as the relationships between gender, ethnicity and class, body image, the ideology of the family, gender roles, reproductive technology and the history of the women's liberation movement in Australia during the 1970s and 1980s. Includes chapter notes, references and an index. The editor teaches women's studies at Victoria University of Technology.

The Importance of Wearing Clothes - Lawrence Langner 1991

Lipstick - Jessica Pallingston 1999

Lipstick may just be a concoction of grease and pigment in a fancy tube to some, but for any serious girl it is so much more than a simple cosmetic. Lipstick, more than any other item of make-up, represents hopes, dreams, sex appeal, confidence, daring, make-believe. Lipstick IS womanhood and many women would not dream of facing the world without their lipstick carefully applied. Every time a woman purchases a lipstick she is buying into the dream that this

particular shade and texture will make her lips look sexier and more alluring than she had ever dared imagine, even though she probably has several lipsticks in much the same shade. It is no surprise that lipstick sales outnumber those for other beauty products by 4 to 1. Now comes a fitting homage to this most sensual of beauty products from a self-confessed lipstickaholic. LIPSTICK the book is much like the product - fun, sensual, daring, wicked and, of course, KNOWING. From the history of lipstick from Egyptian times onwards, to the allure of lipstick from a man's point of view, to lipstick in movies, art and history, this is a semi-serious study of what many would consider the ultimate accessory and an unsung influence in our culture. LIPSTICK also provides practical tips on how to buy and apply lipstick, what your lipstick shape says about you, what exactly it is made of, how to make your own, how companies name lipsticks and all the other tricks of the trade. Beautifully illustrated with a plethora of pouting

lips, and designed to look cute and desirable, this is the ultimate valentine to this emotionally powerful component of a woman's life.

Body Packaging - Julian Robinson 1988

An examination of costume, sex customs and symbolism from codpieces and penile sheaths to high-heeled shoes and French knickers, uniforms and bondage gear, wedding dresses, tail coats and jeans. Fine illustrations. Robinson, ousted for teaching his version of fashion and textiles, dedicates this learned and witty book "to the chairman and principal of the Sydney College of the Arts for their generous financial settlement..." masculine dress. Interwoven throughout the study is also an examination of how these most intimate forms of men's clothing not only reflected society but also how the evolution of styles inexorably influenced social change, especially notions of masculinity, modesty, and erotic exhibitionism. In addition, Daniel Delis Hill looks at more than 100 years of the mass marketing of men's underwear and swimwear, especially the progression of visual presentation and the written message in the era of mass production and mass communication. Cover to cover, the second edition of *History of Men's Underwear and Swimwear* is richly illustrated in color throughout with over 200 period photos and artwork, many never published before.

The Visual Focus of American Media Culture in the Twentieth Century - Wiley Lee Umphlett 2004

This is a sociocultural history of the visually

oriented mass media forms that beguiled American society from the 1890s to the end of World War II. The purpose of the work is to show how revolutionary technological advances during these years were instrumental in helping create a unique culture of media-made origins. By focusing on the communal appeal of both traditional and new modes of visual expression as welcome diversions from the harsh realities of life, this book also attends to the American people's affinity for those special individuals whose talent, vision, and lifestyle introduced daring new ways to avoid the ordinariness of life by fantasizing it. Also examined is the sociocultural impact of an ongoing democratization process that through its nurturing of a responsive media culture gradually eroded the polar postures of the elite and mass cultures so that by the mid-1940s signs of a coming postmodern alliance were in the air. Illustrated. Before his retirement Wiley Lee Umphlett served as an
