

Human Animal Relationships In Equestrian Sport And Leisure Katherine Dashper

The Meaning of Horses - Dona Davis 2016-03-17

The Meaning of Horses: Biosocial Encounters examines some of the engagements or entanglements that link the lived experiences of human and non-human animals. The contributors discuss horse-human relationships in multiple contexts, times and places, highlighting variations in the meaning of horses as well as universals of 'horsiness'. They consider how horses are unlike other animals, and cover topics such as commodification, identity, communication and performance. This collection emphasises the agency of the horse and a need to move beyond anthropocentric studies, with a theoretical approach that features naturecultures, co-being and biosocial encounters as interactive forms of becoming. Rooted in anthropology and multispecies ethnography, this book introduces new questions and areas for consideration in the field of animals and society.

Seeking the Senses in Physical Culture - Andrew C. Sparkes 2017-02-24

The sensory revolution in the social sciences is transforming the ways in which the senses and the sensorium are studied and understood in relation to bodies in action. This is the first book to investigate the impact, and challenges, of this revolution for those interested in physical culture. Providing vivid examples of sensory scholarship in action from sport, physical activity, leisure and recreation, this book brings together leading figures to discuss how we go about seeking the senses, how we engage in somatic work, and how we create meanings and come to understand ourselves and others as embodied beings in a variety of social settings over time. Featuring original reflections on athletics, running, cycling, sailing, kayaking, windsurfing, glow sports, jiu jitsu, mixed martial arts and yoga, this ground breaking collection showcases the latest sensory research in physical culture as well as paving the way both conceptually and methodologically for future work in this area. Seeking the Senses in Physical Culture: Sensuous scholarship in action is fascinating reading for all those interested in physical cultural and body studies; the sociology, psychology and philosophy of sport; leisure and recreation studies; and physical education.

Sport and English National Identity in a 'Disunited Kingdom' - Tom Gibbons 2017-02-17

Given sport's centrality in English society, what role does it play in symbolising contemporary English national identity? This comprehensive study explores the complex set of relationships between sport and what it means to be English in the twenty-first century. The bond between sport and nationalism has long been recognised, but with increasingly vociferous separatist nationalisms threatening the dismantling of the United Kingdom, a closer analysis is timely. Part one addresses key debates regarding English national identity within the specific sporting contexts of association football, cricket, tennis, cycling and rugby. Part two discusses the complex relationship between religion, sport and English national identity as well as the attitudes and experiences of traditionally marginalized groups, including women, minority ethnic groups and disabled people. Part three considers the perspectives of the other UK nations on the link between sport and English national identity. Sport and English National Identity in a 'Disunited Kingdom' is fascinating reading for all those with an interest in the sociology, politics and history of sport, and the study of nations, nationalism and national identity.

Embodying Brazil - Sara Delamont 2017-01-06

The practice of capoeira, the Brazilian dance-fight-game, has grown rapidly in recent years. It has become a popular leisure activity in many cultures, as well as a career for Brazilians in countries across the world including the US, the UK, Canada and Australia. This original ethnographic study draws on the latest research conducted on capoeira in the UK to understand this global phenomenon. It not only presents an in-depth investigation of the martial art, but also provides a wealth of data on masculinities, performativity, embodiment, globalisation and rites of passage. Centred in cultural sociology, while drawing on anthropology and the sociology of sport and dance, the book explores the experiences of those learning and teaching capoeira at a variety of levels. From beginners' first encounters with this martial art to the

perspectives of more advanced students, it also sheds light on how teachers experience their own re-enculturation as they embody the exotic 'other'. Embodying Brazil: An Ethnography of Diasporic Capoeira is fascinating reading for all capoeira enthusiasts, as well as for anyone interested in the sociology of sport, sport and social theory, sport, race and ethnicity, or Latin-American Studies.

The Global Horseracing Industry - Phil McManus 2013

Horseracing, thoroughbred breeding and gambling on racing are global industries worth several hundred billion dollars. They are also industries facing serious challenges, from the rise of alternative forms of leisure gambling to concerns about the ethical treatment of animals in all equestrian sports. This book offers a broad-ranging examination of the contemporary horseracing industry, from geographical, economic, social, ethical and environmental perspectives. The book draws on in-depth, mixed-method research into the racing and breeding industries in the US, Australia, the UK, Canada and New Zealand, and includes comparative material on other key racing centres, such as Ireland, Singapore and Hong Kong. It explores the economic structure of the global racing business, including comparisons with other major international sport businesses and other equestrian sports. It examines the social and cultural roots of the sport through its association with, and impact on, rural places, communities and environments from Kentucky to Newmarket - highlighting racing's particular blend of tradition and scientific and technological innovation. The book also explores the ethical issues at the heart of horseracing, from reproduction to the use of the whip, and the inescapable tension between the horse as an instrumentally valuable commodity and the horse as an intrinsically valuable animal with needs and interests. The Global Horseracing Industry concludes by considering alternative futures for this major international sports business. The book is illuminating reading for anybody with an interest in sport, business, cultural geography, animal studies, or environmental studies.

Sport, Medicine and Health - Dominic Malcolm 2016-12-01

The relationship between sport, medicine and health in our society is becoming increasingly complex. This important and timely study explores this relationship through an analysis of changing political economies, altered perceptions of the body and science's developing contribution to the human condition. Surveying the various ways in which medicine interacts with the world of sport, it examines the changing practices and purposes of sports medicine today. Drawing on the latest research in the sociology of sport, this book investigates the scientific discourse underlying the promotion of physical activity to reveal the political context in which medical knowledge and public policies emerge. It considers the incongruities between these policies and their attempts to regulate the supply of and demand for sports medicine. Through a series of original case studies, this book exposes the social construction of sports medical knowledge and questions the potential for medicine to influence athletes' well-being both positively and negatively. Sport, Medicine and Health: The medicalization of sport? provides valuable insights for all students and scholars interested in sports medicine, sports policy, public health and the sociology of sport.

Phenomenology and the Extreme Sport Experience - Eric Brymer 2017-03-27

Understanding the motivations behind those who partake in extreme sports can be difficult for some. If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one's life, then this confusion will continue to exist. However, an in-depth examination of the phenomenology of the extreme sport experience yields a much more complex picture. This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death. Extreme sports are not necessarily synonymous with risk and participation may not be about risk-taking. Participants report deep inner transformations that influence world views and meaningfulness, feelings of coming home and authentic integration as well as a freedom beyond the everyday. Phenomenologically, these experiences have been interpreted as transcendent of time, other,

space and body. Extreme sport participation therefore points to a more potent, life-enhancing endeavour worthy of further investigation. This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk-taking, the death wish and the concept of "No Fear" in extreme sports, and repositions the experience in a previously unexplored manner. This is valuable reading for students and academics interested in Sports Psychology, Social Psychology, Health Psychology, Tourism, Leisure Studies and the practical applications of phenomenology.

Environmental and Animal Abuse Denial - Tomaž Grušovnik 2020-11-24

The staggering rate of environmental pollution and animal abuse despite constant efforts to educate the public and raise awareness challenges the prevailing belief that the absence of serious action is a consequence of a poorly informed public. In recent decades alternative explanations of social and political inaction have emerged, including denialism. Challenging the information-deficit model, denialism proposes that people actively avoid unpleasant information that threatens their established worldviews, lifestyles, and identities. *Environmental and Animal Abuse Denial: Averting Our Gaze* analyzes how people avoid awareness of climate change, environmental pollution, animal abuse, and the animal industrial complex. The contributors examine the theory of denialism in regards to environmental pollution and animal abuse through a range of disciplines, including social psychology, sociology, anthropology, philosophy, cultural history and law.

Leisure Activities in the Outdoors - Mandi Baker 2021-10-13

The benefits of being outdoors in a leisure context are widely acknowledged across a range of disciplinary perspectives (including tourism, therapeutics, education and recreation). These benefits include the development of: health and wellbeing; social skills; leadership and facilitation skills; personal, emotional and reflective abilities; confidence and identity creation. Drawing on a variety of perspectives, geographies and approaches, this book explores the opportunities that leisure in the outdoors provides for learning, developing and challenging. The authors in this collection challenge dominant discourses of outdoor leisure through their selection of outdoor activities, theoretical approaches and modes of representation. All offer fresh insights and thinking into how leisure in the outdoors can be understood. The book covers a range of outdoor conceptualisations that challenge the reader to think deeply and broadly about the common threads which bind the broad field of outdoor leisure together. The experiences explored in this book range from suburban outdoors to wild places, surfing to mindful reflection, and trail walking to Nordic skiing, and encompass a broad spectrum of people.

Human-Animal Relationships in Equestrian Sport and Leisure - Katherine Dashper 2016-10-04

Riding, training and caring for horses are visceral experiences that require the immersion of both body and mind. This book provides an in-depth understanding of human-horse relationships and interactions as embodied in equestrian sport and leisure. As a closely focused ethnographic study of the horse world, it explores the key themes of partnership and collaboration in human-horse communication, the formation of individual and collective identities performed through involvement in the horse world, and human-horse interaction as an embodied way of being. This book argues that encounters between humans and horses can reveal the ways that human society has been and continues to be structured through intersection with nonhuman others. Equestrian sport and leisure provides an apt context for considering how such concepts of interspecies communication and collaboration are negotiated, managed, (mis)understood and performed, resulting in a uniquely embodied way of knowing and being in the world. *Human-Animal Relationships in Equestrian Sport and Leisure* is fascinating reading for anyone interested in equestrianism, human-animal studies, theories of embodiment, the sociology of sport, or sport and social theory.

[Sex Integration in Sport and Physical Culture](#) - Alex Channon 2018-10-11

Scholars working in the academic field of sport studies have long debated the relationship between sport and gender. Modern sport forms, along with many related activities, have been shown to have historically supported ideals of male superiority, by largely excluding women and/or celebrating only men's athletic achievements. While the growth of women's sport throughout the 20th and 21st centuries has extinguished the notion of female frailty, revealing that women can embody athletic qualities previously thought exclusive to men, the continuation of sex segregation in many settings has left something of a discursive 'back door' through which ideals of male athletic superiority can escape unscathed, retaining their

influence over wider cultural belief systems. However, sex-integrated sport potentially offers a radical departure from such beliefs, as it challenges us to reject assumptions of male superiority, entertaining very different visions of sex difference and gender relations to those typically constructed through traditional models of physical culture. This comprehensive collection offers a diverse range of international case studies that reaffirm the contemporary relevance of sex integration debates, and also articulate the possibility of sport acting as a legitimate space for political struggle, resistance and change. This book was originally published as a special issue of *Sport in Society*.

Human-Horse Relations and the Ethics of Knowing - Rosalie Jones McVey 2023-03-31

This book explores how equestrians are highly invested in the idea of profound connection between horse and human and focuses on the ethical problem of knowing horses. In describing how 'true' connection with horses matters, Rosalie Jones McVey investigates what sort of thing comes to count as a 'good relationship' and how riders work to get there. Drawing on fieldwork in the British horse world, she illuminates the ways in which equestrian culture instils the idea that horse people should know their horses better. Using horsemanship as one exemplary instance where 'truth' holds ethical traction, the book demonstrates the importance of epistemology in late modern ethical life. It also raises the question of whether, and how, the concept of truth should matter to multispecies ethnographers in their ethnographic representations of animals.

[A Genealogy of Male Bodybuilding](#) - Dimitris Liokaftos 2017-02-03

Bodybuilding has become an increasingly dominant part of popular gym culture within the last century. Developing muscles is now seen as essential for both general health and high performance sport. At the more extreme end, the monstrous built body has become a pop icon that continues to provoke fascination. This original and engaging study explores the development of male bodybuilding culture from the nineteenth century to the present day, tracing its transformations and offering a new perspective on its current extreme direction. Drawing on archival research, interviews, participant observation, and discourse analysis, this book presents a critical mapping of bodybuilding's trajectory. Following this trajectory through the wider sociocultural changes it has been a part of, a unique combination of historical and empirical data is used to investigate the aesthetics of bodybuilding and the shifting notions of the good body and human nature they reflect. This book will be fascinating reading for all those interested in the history and culture of bodybuilding, as well as for students and researchers of the sociology of sport, gender and the body.

The Rugby World in the Professional Era - John Nauright 2017-02-17

Twenty years of professionalism has seen rugby union undergo dramatic transformations, from changes to everyday training cultures to the growth of the Rugby World Cup into one of the largest global sporting events. *The Rugby World in the Professional Era* is the first book to examine the effect that professionalism has had across a number of different aspects of the game and the wider socio-cultural significance of these changes through case studies from across the globe. Drawing on contributions from scholars from across the rugby-playing world, the book explores the role of rugby's professionalisation through a number of social-scientific lenses, including: labour migration race and indigenous populations the globalisation of the game mega-event management male sexualities media representations of rugby - from broadcasting matches to rugby in museums and on stage and screen Offering insights into under-researched areas of the sport, such as the growth of Rugby Sevens into an Olympic sport, and providing the most up-to-date recent history of the sport available, *The Rugby World in the Professional Era* is essential reading for anyone with an academic interest in rugby, and any student or scholar with interests in sports history, sports sociology, sport management or the economics of professional sport.

[The International Olympic Committee, Law, and Accountability](#) - Ryan Gauthier 2016-12-19

The Olympic Games is unquestionably the largest and most important sporting event in the world. Yet who exactly is accountable for its successes and failures? This book examines the legitimacy and accountability of the International Olympic Committee (IOC). This non-governmental organisation wields extraordinary power, but there is no democratic basis for its authority. This study questions the supremacy of the IOC, arguing that there is a significant accountability deficit. Investigating the conduct of the IOC from an international legal perspective, the book moves beyond a critique of the IOC to explore potential avenues

for reform, means of improving democratic procedures and increasing accountability. If the Olympics are to continue to be our most celebrated sporting event, those who organise them must be answerable to the citizens that they can potentially harm as well as benefit. Full of original insights into the inner workings of the IOC, this book is essential reading for all those interested in the Olympics, sport policy, sport management, sport mega-events, and the law.

Human-Animal Relationships in Equestrian Sport and Leisure - Katherine Dashper 2016-10-04

Riding, training and caring for horses are visceral experiences that require the immersion of both body and mind. This book provides an in-depth understanding of human-horse relationships and interactions as embodied in equestrian sport and leisure. As a closely focused ethnographic study of the horse world, it explores the key themes of partnership and collaboration in human-horse communication, the formation of individual and collective identities performed through involvement in the horse world, and human-horse interaction as an embodied way of being. This book argues that encounters between humans and horses can reveal the ways that human society has been and continues to be structured through intersection with nonhuman others. Equestrian sport and leisure provides an apt context for considering how such concepts of interspecies communication and collaboration are negotiated, managed, (mis)understood and performed, resulting in a uniquely embodied way of knowing and being in the world. Human-Animal Relationships in Equestrian Sport and Leisure is fascinating reading for anyone interested in equestrianism, human-animal studies, theories of embodiment, the sociology of sport, or sport and social theory.

Rural Tourism - Katherine Dashper 2015-01-12

Rural regions are experiencing fundamental challenges to their ways of life and social fabric, as traditional land-based occupations are in decline and younger and better-educated rural residents migrate to cities for greater work, social and cultural opportunities. Rural tourism offers a possible solution to the problems associated with lost economic opportunities and population decline that accompany the waning of agriculture. Many governments and regional authorities have embraced rural tourism as an opportunity to bring new money into rural regions, stimulating growth, providing employment opportunities and thus beginning to halt rural decline. However, the possibilities of rural tourism to promote rural regeneration have been criticised for being over-stated and unrealistic. Rural tourism has frequently been found to under-deliver in terms of expected economic benefits and job creation, and may sometimes exacerbate local hierarchies and inequalities. This edited collection questions the contribution tourism can and does make to rural regions. Drawing on a range of geographically diverse, research-driven case studies, the book is thematically organised to explore a variety of issues relevant to rural tourism, from the perspectives of local communities, businesses, government/policy makers and the tourists themselves.

Humans, Horses and Events Management - Katherine Dashper 2021-03-12

Horses are perhaps the most common non-human animal to feature in planned events, but although there is considerable research on equestrian sport, there is virtually none on equestrian events. This book begins to address this gap, using the National Championships of the Icelandic Horse as an extended case study to

explain in depth the process of managing an event, as well as the larger theoretical implications of events management. Drawing on diverse viewpoints and theoretical perspectives, the book draws wider comparisons to connect events management to larger themes in the social sciences, such as human-animal relations; nationalism; place branding; event impacts; event experience; and inclusion and exclusion. The book is a contribution to two fields. In relation to human-animal studies, it focuses on how the Icelandic horse breed is marketed and celebrated through top-tier competition; whereas from an events management perspective, it considers the role of the event in community building, the practical and theoretical aspects of running a sustainable equestrian event, and the issues that arise in multispecies event contexts.

Sport and Discrimination - Daniel Kilvington 2017-01-20

Despite campaigns to educate and increase awareness, discrimination continues to be a deep-rooted problem in sport. This book provides an international, interdisciplinary and critical discussion of various forms of discrimination in sport today, with contributions from world-leading academics and high-profile campaigners. Divided into five sections, the book explores racism, sexism, homophobia, disability, and the role of media in both perpetuating and tackling discrimination across a variety of sports and sporting events around the world. Drawing on examples from football, rugby, cricket, tennis, climbing, the Olympics and the Paralympics, it offers a critical review of current debates and discusses the latest empirical research on the changing nature of discrimination in sport. Taking into account the experiences of athletes and coaches across all performance levels, it presents recommendations for further action and directions for future research. A timely and challenging study, *Sport and Discrimination* is essential reading for all students and scholars of sports studies with an interest in the sociology of sport and the relationship between sport, society and the media.

Multispecies Leisure: Human-Animal Interactions in Leisure Landscapes - Paula Danby 2021-05-13

Multispecies Leisure: Human-Animal Interactions in Leisure Landscapes seeks to 'bring the animal in' to the leisure studies domain and contribute to greater understanding of leisure as a complex, interwoven multispecies phenomenon. The emerging multidisciplinary field of human-animal studies encourages researchers to move beyond narrow focus on human-centric practices and ways of being in the world, and to recognise that human and non-human beings are positioned within shared ecological, social, cultural and political spaces. With some exceptions, leisure studies has been slow to embrace the 'animal turn' and consider how leisure actions, experiences and landscapes are shaped through multispecies encounters between humans, other animals, birds and insects, plants and environment. This book begins to address this gap by presenting research that considers leisure as more-than-human experiences. The authors consider leisure with nonhuman others (e.g. dogs, horses), affecting those others (e.g. environmental concerns) and affected by the non-human (e.g. landscape, weather), by exploring the 'contact zones' between humans and other species. Thus, this work contributes to greater understanding of leisure as a complex, multispecies phenomenon. The chapters in this book were originally published as a Special Issue of the *Leisure Studies*.
