Radical Knowing - Christian de Quincey 2005-08-16

A radical reassessment of what we mean by "consciousness" and how we experience it in relation to others • Shows the importance of integrating different ways of knowing--such as feeling and intuition, reason and the senses--in our approach to life • Discusses the technique of Bohmian Dialogue where you can learn not only to "feel your thinking," but also to experience true communion with others In *Radical Knowing* Christian de Quincey makes a provocative claim: We are not who we think we are. Instead, we are what we feel. Giving disciplined attention to feelings reveals the most fundamental fact of life and reality: We are our relationships. Most of us think we are individuals first and foremost who then come

together to form relationships. De Quincey turns this "obvious fact" on its head and shows that relationship comes first, and that our individual sense of self--our "private" consciousness--actually arises from shared consciousness. This shared, collective consciousness is at the heart of indigenous ways of life and their worldviews. De Quincey explains that participating in shared consciousness literally builds the fabric of reality, and that understanding this process is key to unlocking our potential for higher consciousness and spiritual evolution. He presents the technique of Bohmian Dialogue, developed by groundbreaking quantum physicist David Bohm, as one method for experiencing this powerful process. He also

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

explores the mystery of synchronicity, offering a new understanding of the relationship between matter and mind and the underlying nature of reality.

Radical Happiness: A Guide to Awakening - Gina Lake

2007-09

Radical Happiness is for seekers who are ready to be finders and anyone asking the question, Who am I really? Radical Happiness provides the keys to experiencing the happiness that is always present and not dependent on circumstances. This happiness doesn't come from getting what you want but from wanting what already is. It comes from realizing that who you think you are is not who you really are. This is a radical perspective! Radical Happiness describes the nature of the egoic state of consciousness, the mind's role in maintaining it, how this interferes with happiness, what awakening and enlightenment are, and how to live in this world following awakening. Exercises are included to help you apply

the information and transform your experience of life--and become happier.

I Am the Word - Paul Selig 2010-06-24

The channeled Guides of I Am the Word provide a concise and immensely powerful program in self-awareness that can ease negative complexes and align your existence with its highest purpose. Humanity has lost itself. Both as individuals and as a world culture, we have forgotten our true nature. In I Am the Word, writer and medium Paul Selig has recorded an extraordinary program for self-realization, as dispensed through beings of higher intelligence, sometimes called Guides or Ascended Masters. These figures seek, as they have in the past, to assist men and women in discovering the higher, purposeful nature--or "Christed Self"--that lies dormant within us all. In a series of enticing, irresistibly practical dialogues, the Guides of I Am the Word identify the emotional "boulders" that displace our authentic selves and consume our potential. The

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

Guides provide to-the-point psychological and existential insights, along with self-developing exercises and affirmations, which begin to strip away residues of fear, self-doubt, and self-suffocating habits.

Deep Spirit - Christian de Quincey 2008-05-28

"A narrative exploration of the evolution of consciousness, the future of humanity, and different ways of knowing."--

Provided by publisher

A Spirituality Named Compassion - Matthew Fox 1999-09-01

- Fox marries mysticism with social justice, leading the way toward a gentler and more ecological spirituality and an acceptance of our interdependence
- A road map to fulfillment for the coming century

In *A Spirituality Named Compassion*, Matthew Fox, the popular and controversial author, establishes a spirituality for the future that promises personal, social, and global healing. Using his own experiences with the pain and lifestyle changes

that resulted from an accident, Fox has written an uplifting book on the issues of ecological justice, the suffering of Earth, and the rights of her nonhuman citizens. Fox defines compassion as creativity put to the service of justice and argues that we can achieve compassion for both humanity and the environment as we recognize the interconnectedness of all things. Working toward the creation of a gentler, ecological, and feminist Christianity, Fox marries mysticism and social justice, emphasizing that as we enter a new millennium society needs to realize that spirituality's purpose is to guide us on a path that leads to a genuine love of all our relations and a love for our shared interdependence.

The Flip - Jeffrey J. Kripal 2020-04-23

'Mindblowing' Michael Pollan Why do we know so much more about the cosmos than our own consciousness? Are there limits to the scientific method? Why do we assume that only

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

science, mathematics and

technology reveal truth? The Flip shows us what happens when we realise that consciousness is fundamental to the cosmos and not some random evolutionary accident or surface cognitive illusion; that everything is alive, connected, and 'one'. We meet the people who have made this visionary, intuitive leap towards new forms of knowledge: Mark Twain's prophetic dreams, Marie Curie's séances, Einstein's cosmically attuned mind. But these forms of knowledge are not archaic; indeed, they are essential in a universe that has evolved specifically to be understandable by the consciousnesses we inhabit. The Flip peels back the layers of our beliefs about the world to reveal a visionary, new way of understanding ourselves and everything around us, with huge repercussions for how we live our lives. After all, once we have flipped, we understand that the cosmos is not just human. The human is also cosmic.

~~The Global Thinking~~

Community - Sylvester L.

Steffen 2010-07

The book chronicles exchanges between the author and bloggers on the NCR (National Catholic Reporter) blog site (now discontinued.) Exchanges are over upfront religious/ social issues. While strong and varied views are aired they are respectful-perhaps something of model how to reduce heat and increase light. Traditional religions define faith/ belief doctrinally, dogmatically, and exercise control over belief and behavior. As history shows, faith and politics intertwine and agitate differences hurtful to people and nature. Modern calamities can be redeemed only from within. Our times confront traditions more radically than ever before, namely, To awaken to sustainable perspectives of quantum physical/ psychical evolution. Remembrances from the past advance in genetic codes and are "prospective", open to hope. Leaves are genetic lexicons on the Tree of Life. We need to learn nature's

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

economies of building on consciousness. The important patterns of sustainable energy use. Evolution's learning lets us anticipate the future and avoid imprisonment of thought fixation. Evolution is symbiotic intelligence, nature's pattern, God's design. Evolution opens to symbiotic solutions only if culture, religion and politics are open to evolution. Evolution's outcome of processing interdependent life and consciousness doesn't have to be terminally wasteful rather it can uplift, enlighten and expose wrongdoing; and importantly, help end bad habits, choose right thinking and keep hope alive. In regards to thought-processing, latest thinking is a recapitulation (reformulation) of prior thinking. Thought-updating includes reformulations of faith, which is how faith remains vital and religion is redeemed. If one is of a mind to move beyond fixations of faith/ religion, one must admit the inadequacy of belief constrained by fixations and recognize the need for moving on to evolutionary

next step is to take action, not alone, but collaboratively by group study and action-the point of the Evolution Trilogies. *Love and Surrender* - Gina Lake 2014-09-28
Love and Surrender explains the important role that surrender plays in releasing us from bondage to our conditioning into the freedom and love of our true nature. Surrender is the "miracle" that occurs when we are finally able to let go and let things be as they are. When this happens, we are Home, and love naturally flows to ourselves, to others, and to life. This is our natural state and the direction and goal for every human life. But how do we surrender? In *Love and Surrender*, Jesus, as dictated to Gina Lake, unveils this great mystery so that you can more easily live your life from a place of love, acceptance, peace, and happiness. This book is one in a trilogy of books by Jesus, which includes *Choice and Will* and *Beliefs, Emotions, and the Creation of Reality*. The books

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

in the trilogy can be read in

any order. They are also available in a single volume called The Jesus Trilogy. From Love and Surrender: "Surrender is the means by which you come to know Love, or God... Love and surrender are important because they bring you your deepest heart's desire as a human being. You are meant to be happy, to love, to be at peace, and to be free. You are meant to move from fear, contraction, hopelessness, anger, victimization, and hate to trust, expansion, strength, courage, joy, peace, and love. This transformation comes about through surrender. All of the spiritual practices ever invented are designed to accomplish this one thing. Surrender is the boat that takes you from one shore to another, from the limited human experience to the experience of the Divine incarnate. This was my message in times gone by, and it is my message today: You are not only human but divine, and you are meant to flourish and love one another."

~~The Origin of Consciousness~~

in the Breakdown of the

Bicameral Mind - Julian

Jaynes 2000-08-15

National Book Award Finalist:

"This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth

century."—Columbus Dispatch
At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

~~“When Julian Jaynes . . .~~

speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, The New Yorker “He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior.”—American Journal of Psychiatry

Jesus Speaking - Gina Lake
2018-04-26

Jesus still exists and is and has always been available to those who are devoted to him. This book is Jesus speaking from another dimension today. What we know about Jesus and what is obvious from the messages in this book is that Jesus is about love. His purpose in speaking to us today through these messages is to awaken the love within us that is our true nature. These messages are also intended to give you the experience of having a relationship with this wise and

~~loving being we've known as~~

Jesus the Christ, as he speaks to you as if you were sitting in his presence. The channeled messages from Jesus, which this book is based on, were part of weekly online video meetings, where Gina Lake and her husband, who is also a nondual spiritual teacher, give what they call Christ Consciousness energy transmissions. The channeled messages from Jesus were given before the transmission to prepare, teach, and inspire those who are there to receive the transmission. Many report feeling a transmission come through these channeled messages as well.

**Consciousness from
Zombies to Angels** - Christian
de Quincey 2008-12-15

A user-friendly, step-by-step guide to understanding the mind • Presents a practical journey into understanding consciousness--philosophy's hardest problem, science's final frontier, and spirituality's deepest mystery • Offers 7 steps to transform your life using the shadow and the light

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

of consciousness

"consciousness talk", how the

Consciousness from Zombies to Angels presents a practical, step-by-step "owner's guide" for the mind that sorts out philosophy's hardest problem, science's final frontier, and spirituality's deepest mystery-- what consciousness is, how it works, and why it's important. Christian de Quincey presents seven simple steps for understanding consciousness and how it can lead to spiritual awareness: observe your language, identify the problem, learn how to look, recognize your patterns, know yourself, embrace your shadow, and practice transformation. All of us exhibit both shadow and light, aspects of ourselves we fear and deny (our inner Zombies) as well as qualities we admire and want to radiate (our inner Angels). The key to a creative and fulfilled life is to integrate both. De Quincey reveals that the way to transformation is to accept ourselves exactly as we are--a work in progress. Readers will learn the difference between "energy talk" and

body affects the mind, and vice versa; and where to go for help to develop consciousness, heal emotions, or grow spiritually. De Quincey shows how to recognize and break habits and patterns that run your life, how to find out who you really are, and why facing up to your darkest fears will liberate your brightest light as you learn to embrace all of your humanity and experience the power of transformation.

Radical Philosophy - 2010

Beckett and French Theory -

Eric Migernier 2006

Samuel Beckett's works have spawned a great variety of critical - sometimes contradictory - interpretations, most recently ones stemming from postmodern theories of literature. In keeping with this trend, this book probes the relationship between Beckett's fiction and the work of a number of contemporary French thinkers, such as Maurice Blanchot and Gilles Deleuze, which demonstrates how concepts such as «the

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

thought of the outside» and «the simulacrum» also generate Beckett's transgressive narrative. Beckett and French Theory provides valuable new knowledge and understanding to teachers and students of both Beckett's fiction and recent French critical theory.

The Other Side - Stephen Shaw 2014-05-01

The Other Side explores the most fundamental question in each reality. What happens when the physical body dies? Where do you go? Open your perception. Expand your awareness. Journey deep into the Mystery.

The Literary and Legal Genealogy of Native

American Dispossession -

George D Pappas 2017-07-14

The Literary and Legal Genealogy of Native American Dispossession offers a unique interpretation of how literary and public discourses influenced three U.S. Supreme Court Rulings written by Chief Justice John Marshall with respect to Native Americans. These cases, Johnson v.

M'Intosh (1823), Cherokee

Nation v. Georgia (1831) and Worcester v. Georgia (1832), collectively known as the Marshall Trilogy, have formed the legal basis for the dispossession of indigenous populations throughout the Commonwealth. The Trilogy cases are usually approached as 'pure' legal judgments. This book maintains, however, that it was the literary and public discourses from the early sixteenth through to the early nineteenth centuries that established a discursive tradition which, in part, transformed the American Indians from owners to 'mere occupants' of their land.

Exploring the literary genesis of Marshall's judgments, George Pappas draws on the work of Michel Foucault, Edward Said and Homi Bhabha, to analyse how these formative U.S. Supreme Court rulings blurred the distinction between literature and law.

Return to Essence: How to Be in the Flow and Fulfill Your

Life's Purpose - Gina Lake

2007-02

Radical Knowing Understanding Consciousness Through Relationship Radical Consciousness Trilogy

Return to Essence describes

2021-10-15

how to get into the flow and stay there and how to live life from there. Being in the flow and not being in the flow are two very different states. One is dominated by the ego-driven mind, which is the cause of suffering, while the other is the domain of essence, the divine within each of us. We are meant to live in the flow. The flow is the experience of essence--our true self--as it lives life through us and fulfills its purpose for this life. You will learn: - What the flow is, how it feels, and what you find there - How the ego/mind and conditioning keep you out of the flow - How to get back into the flow - How action, talking, knowing, and choosing come out of the flow - How to discover where the flow is going - How to find and fulfill your life's purpose. Exercises throughout provide an opportunity for practicing and integrating the understanding.
American Book Publishing Record - 2005

God 4.0 - Robert Ornstein

A provocative new view of "God" centers on our innate quiescent faculty that, if developed, can help to dissolve religious, tribal and cultural biases and usher in a higher level of conscious connection- a new "spiritual literacy."

Radical Nature - Christian de Quincey 2010-02-22

An exploration of consciousness in all matter-- from quantum to cosmos • Outlines theories of consciousness in ancient and modern philosophy from before Plato to Alfred North Whitehead • Reveals the importance of understanding mind-in-matter for our relationships with the environment, with other people, even with ourselves
Are rocks conscious? Do animals or plants have souls? Can trees feel pleasure or pain? Where in the great unfolding of life did consciousness first appear? How we answer such questions can dramatically affect the way we live our lives, how we treat the world of nature, and even

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

how we relate to our own

"genius" and a "renegade

bodies. In this new edition of the award-winning Radical Nature, Christian de Quincey explores the "hard problem" of philosophy--how mind and matter are related--and proposes a radical and surprising answer: that matter itself tingles with consciousness at the deepest level. It's there in the cells of every living creature, even in molecules and atoms. Tracing the lineage of this idea through Western philosophy and science, he shows that it has a very noble history--from before Plato to Alfred North Whitehead. He reveals that the way to God is through nature and that understanding how body and soul fit together has surprising consequences for our relationships with our environment, with other people, and even with ourselves.

Biocentrism - Robert Lanza
2010-02-02

Robert Lanza is one of the most respected scientists in the world — a US News & World Report cover story called him a

thinker," even likening him to Einstein. Lanza has teamed with Bob Berman, the most widely read astronomer in the world, to produce Biocentrism, a revolutionary new view of the universe. Every now and then a simple yet radical idea shakes the very foundations of knowledge. The startling discovery that the world was not flat challenged and ultimately changed the way people perceived themselves and their relationship with the world. For most humans of the 15th century, the notion of Earth as ball of rock was nonsense. The whole of Western, natural philosophy is undergoing a sea change again, increasingly being forced upon us by the experimental findings of quantum theory, and at the same time, towards doubt and uncertainty in the physical explanations of the universe's genesis and structure.

Biocentrism completes this shift in worldview, turning the planet upside down again with the revolutionary view that life

Radical Knowing Understanding Consciousness Through

Relationship Radical Consciousness Trilogy

~~creates the universe instead of~~ being merely the activity of an
the other way around. In this paradigm, life is not an accidental byproduct of the laws of physics. Biocentrism takes the reader on a seemingly improbable but ultimately inescapable journey through a foreign universe—our own—from the viewpoints of an acclaimed biologist and a leading astronomer. Switching perspective from physics to biology unlocks the cages in which Western science has unwittingly managed to confine itself. Biocentrism will shatter the reader's ideas of life--time and space, and even death. At the same time it will release us from the dull worldview of life

admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal. The 21st century is predicted to be the Century of Biology, a shift from the previous century dominated by physics. It seems fitting, then, to begin the century by turning the universe outside-in and unifying the foundations of science with a simple idea discovered by one of the leading life-scientists of our age. Biocentrism awakens in readers a new sense of possibility, and is full of so many shocking new perspectives that the reader will never see reality the same way again.
