Called to Heal the Brokenhearted - William H. Barnwell 2016-03-21

In this stirring book, William H. Barnwell tells the stories of prison inmates and the Kairos Prison Ministry volunteers who work with them. Set mostly at the huge Louisiana State Penitentiary at Angola, Barnwell's narrative illustrates how offenders who have done the worst can and do change, becoming model inmates and, if released, productive citizens. The stories also reveal how Kairos volunteers have found healing for broken hearts. Given that the United States incarcerates more people per capita than any country in the world, reformers are seeking radically new ways to reduce our prison populations. Kairos volunteers and inmates alike have much to contribute to the ongoing reform discussions. Now serving 300 state and federal prisons, 30,000 Kairos volunteers work with 20,000 inmates each year. They take part in long weekend retreats with the inmates and follow up with regular prison visits. Since its beginning in 1976, Kairos has served over 250,000 inmates. Broad-based, nondenominational, and nonjudgmental Christian, Kairos seeks to carry out its slogan—"listen, listen, love, love"—among inmates who have had few to listen to them, and fewer still to love them. In *Called to Heal the Brokenhearted* are stories of undeniable redemption. They point the way to personal transformation for the inmates and the volunteers. One Kairos inmate speaks of the change this way: he makes guitars out of the good wood "hidden beneath the surface" of throwaway pianos. "I find my work incredibly fulfilling," he says. "I see myself in every piano, discarded by society but redeemed and put to use in a new way."

Trespasser - Paul Doiron 2012-10-18
While on patrol on foggy March evening, Mike

Bowditch receives a call for help. A woman has reportedly struck a deer on a lonely coast road. When the game warden arrives on the scene, he finds blood in the road - but both the driver and deer have vanished. The details of the disappearance seem eerily familiar. Seven years earlier, a jury convicted Erland Jefferts of the rape and murder of a college student and sentenced him to a life in prison. But when the missing woman is found brutalized in a manner that suggests Jefferts may have been framed, Bowditch receives a warning from state prosecutors to stop asking questions. For Bowditch, doing nothing is not an option. And as he closes in on his quarry, he suddenly discovers how dangerous his opponents are, and how far they will go to prevent him from bringing a killer to justice. Praise for *The Poacher's Son*: An excellent debut - filled with murder, betrayal and a terrific sense of place. C.J. Box. A stunning debut...At its heart this is a tale of bitter betrayal, lost hopes and broken dreams. The book has a tautness that is impossible to forget and which left me close to tears. It is also the first in a series. Its successor, *Trespasser*, also featuring Bowditch, is on the way. Grab him now. Daily Mail. Stunning vistas...eye popping scenes - The New York Times Book Review. This is a compelling, moving and utterly impressive debut - Andre Dubus III, author of *House of Sand and Fog*. *The Poacher's Son* is one of the best written debut novels I have read in years. This novel has it all - a great plot, a wonderful Maine woods setting and a truly remarkable and believable cast of characters. - Nelson de Mille. [No Dig, No Fly, No Go](#) - Mark Monmonier 2010-05-15

Some maps help us find our way; others restrict where we go and what we do. These maps control behavior, regulating activities from flying to fishing, prohibiting students from one part of town from being schooled on the other, and banishing certain individuals and industries to the periphery. This restrictive cartography has boomed in recent decades as governments

seek regulate activities as diverse as hiking, building a residence, opening a store, locating a chemical plant, or painting your house anything but regulation colors. It is this aspect of mapping—its power to prohibit—that celebrated geographer Mark Monmonier tackles in *No Dig, No Fly, No Go*. Rooted in ancient Egypt's need to reestablish property boundaries following the annual retreat of the Nile's floodwaters, restrictive mapping has been indispensable in settling the American West, claiming slices of Antarctica, protecting fragile ocean fisheries, and keeping sex offenders away from playgrounds. But it has also been used for opprobrium: during one of the darkest moments in American history, cartographic exclusion orders helped send thousands of Japanese Americans to remote detention camps. Tracing the power of prohibitive mapping at multiple levels—from regional to international—and multiple dimensions—from property to cyberspace—Monmonier demonstrates how much boundaries influence our experience—from homeownership and voting to taxation and airline travel. A worthy successor to his critically acclaimed *How to Lie with Maps*, the book is replete with all of the hallmarks of a Monmonier classic, including the wry observations and witty humor. In the end, Monmonier looks far beyond the lines on the page to observe that mapped boundaries, however persuasive their appearance, are not always as permanent and impermeable as their cartographic lines might suggest. Written for anyone who votes, owns a home, or aspires to be an informed citizen, *No Dig, No Fly, No Go* will change the way we look at maps forever.

[Broadband Telecommunications and Regional Development](#) - Tony H. Grubescic 2015-09-07
Broadband is one of the most transformative technologies of the 21st century, yet our understanding of its regional impacts remains somewhat rudimentary. Not only are issues of broadband pricing and speed relevant in this context, but the overall quality of service for broadband can often dictate its impacts on regional development. This book illuminates the regional impacts of this pervasive and important technology. The principle aim of this book is to deepen our understanding of broadband and its connections to regional development. First, it

uses a geospatial lens to explore how the relationship between broadband and regional development influences access to technology platforms, dictates provision patterns, and facilitates the shrinkage of space and time in non-uniform and sometimes unexpected ways. Second, it book provides a comprehensive guide that details the strengths and weaknesses of publically available broadband data and their associated uncertainties, allowing regional development professionals and researchers to make more informed decisions regarding data use, analytical models and policy recommendations. Finally, this book is the first to detail the growing importance of broadband to digital innovation and entrepreneurship in regions. This book will be of interest to regional development professionals and researchers in economics, public policy, geography, regional science and planning.

Jumping at Shadows - Sasha Abramsky
2017-09-05

Why is an unarmed young black woman who knocks on a stranger's front door to ask for help after her car breaks down perceived to be so threatening that he shoots her dead? Why do we fear infrequent acts of terrorism more far more common acts of violence? Why does a disease like Ebola, which killed only a handful of Americans, provoke panic, whereas the flu—which kills tens of thousands each year—is dismissed with a yawn? *Jumping at Shadows* is Sasha Abramsky's searing account of America's most dangerous epidemic: irrational fear. Taking readers on a dramatic journey through a divided nation, where everything from immigration to disease, gun control to health care has become fodder for fearmongers and conspiracists, he delivers an eye-popping analysis of our misconceptions about risk and threats. What emerges is a shocking portrait of a political and cultural landscape that is, increasingly, defined by our worst fears and rampant anxieties. Ultimately, Abramsky shows that how we calculate risk and deal with fear can teach us a great deal about ourselves, exposing deeply ingrained strains of racism, classism, and xenophobia within our culture, as well as our growing susceptibility to the toxic messages of demagogues.

The Destroying Angel - Shirley Turner 2017-08-10

A blistering story of surviving, and overcoming, the worst kinds of abuse: physical, emotional, sexual. Shirley Turner tells her own story, from a squalid childhood in Maine, to a forced marriage and motherhood, constantly moving from place to place with her controlling husband. Ironically, it is becoming a mother that brings her greatest happiness, and also her greatest tragedy. This is a journey of triumph, a story that exalts the incredible courage of one human being who refused to buckle under a barrage of despair, hatred, and trauma, inspired by the one pure love of her life.

The Evil and the Innocent - Senator Bill Diamond 2012-03

"The potential interest in this book could be measured by the fact that for the past 3 years the online website for the Maine Sex Offender Registry has had 8 million hits each year. *The Evil and the Innocent* presents a real life and true inside look at the tragedies and suffering of the victims of sexual assault. Those who committed these crimes against the innocent are described and discussed in detail revealing the sadistic fantasies that swirl in the heads of child sex offenders and how these fantasies manifest themselves into reality with total disregard for the pain and suffering inflicted on the victims - the children. These real and actual cases expose heartbreaking and sometimes nauseating facts of sexual assaults and molestations. As difficult as it may be for the reader, these documented details are openly displayed in the book and will stay with the reader for a long time. Seeing the dead eyes and helpless faces of little children who suffered the onslaught of cruel and

inhumane acts are necessary ingredients if change is to occur. The book may startle and sicken you because of the cold, hard, facts that until now have been hidden from you. Why? to protect you. Real life suffering must be brought to the light of day so the collective you demands that it stop - no matter the cost.'-- Wheelers.co.nz.

Maine - Miranda Gardiner 2009-04

When I first took notice of the overbearing blue sign with its stark white letters placed near the state line along the Maine Turnpike, my first thought was, According to whom? Miranda Gardiner's tumultuous lifetime of searching for hope in all the wrong places leads her to question the avenue of justice she has always trod down. Set up for failure in youth by emotionally and physically abusive relationships, Miranda's voyage didn't get easier with age. Finding the motto advertised along the Maine state border to be further from reality when the neighbors of a close-knit community take her and her family on a ride of injustice and greed, Miranda seeks justice from the government only to find fairness to be more of a fantasy than fact. It is then Miranda decides to give in to the only law she knows will not falter "the Law of Love. Bypassing the bitterness and anger of a hardened soul by moving forward towards a new journey of forgiveness, grace, and faith allows Miranda to find her home in Maine, *The Way Life Should Be.*"

Sex Crimes and Paraphilia - Eric W. Hickey 2006

This book covers an array of sex crimes, sex offenders, and their victims. It provides an in-depth examination of the role fantasy and paraphilia play in the production of sex offending. While many paraphilia may not be considered criminal, others can be viewed as preparatory behavior that become foundational for violent sex crimes.
