Period Power - Nadya Okamoto 2018-10-16

PERIOD founder and Harvard College student Nadya Okamoto offers a manifesto on menstruation and why we can no longer silence those who bleed—and how to engage in youth activism. Throughout history, periods have been hidden from the public. They're taboo. They're embarrassing. They're gross. And due to a crumbling or nonexistent national sex ed program, they are misunderstood. Because of these stigmas, a status quo has been established to exclude people who menstruate from the seat at the decision-making table, creating discriminations like the tampon tax, medicines that favor male biology, and more. Period Power aims to explain what menstruation is, shed light on the stigmas and resulting biases, and create a strategy to end the silence and prompt conversation about periods.

The Modern Period - Lara Freidenfelds
2009-06-15

Winner, 2010 Emily Toth Award for Best Book in Women’s Studies, Popular Culture

Association/American Culture Association The Modern Period examines how and why Americans adopted radically new methods of managing and thinking about menstruation during the twentieth century. In the early twentieth century women typically used homemade cloth “diapers” to absorb menstrual blood, avoided chills during their periods to protect their health, and counted themselves lucky if they knew something about menstruation before menarche. New expectations at school, at play, and in the workplace, however, made these menstrual traditions problematic, and middle-class women quickly sought new information and products that would make their monthly periods less disruptive to everyday life. Lara Freidenfelds traces this cultural shift, showing how Americans reframed their thinking about menstruation. She explains how women and men collaborated with sex educators, menstrual product manufacturers, advertisers, physical education teachers, and doctors to create a modern understanding of menstruation. Excerpts from seventy-five interviews—accounts by turns funny and moving—help readers to identify with the experiences of the ordinary people who engineered these changes. The Modern Period ties historical changes in menstrual practices to a much broader

argument about American popular modernity in the twentieth century. Freidenfelds explores what it meant to be modern and middle class and how those ideals were reflected in the menstrual practices and beliefs of the time. This accessible study sheds new light on the history of popular modernity, the rise of the middle class, and the relationship of these phenomena to how Americans have cared for and managed their bodies.

Seeing Red - Kirsten Karchmer 2019-11-12

A world-renowned women’s health expert reveals a bold, practical, and data-driven handbook for menstrual periods that provides an easy-to-navigate roadmap for improving your reproductive health—and your everyday quality of life. We’ve been lied to about periods. PMS, cramping, bloating, migraines, irritability, and anxiety may be extremely common, but contrary to popular belief, they aren’t normal. And they certainly aren’t “just part of being a woman,” despite the fact that this is what we’ve been told time and time again—by friends, family, and even doctors. After dedicating her entire clinical career to deconstructing the menstrual cycle, women’s health expert Kirsten Karchmer knows better. During her more than twenty years of

research and treating thousands of patients, Karchmer found that most period problems women experience—even the most painful ones—are totally correctable and more surprisingly reflective of overall health and fertility. In this forthright, spirited, and all-encompassing guide, Karchmer draws on her decades' worth of experience as a women's health expert to break down the myths so many women have been led to believe about their periods. For the more than 82 million women in the world who suffer from menstrual conditions, *Seeing Red* explains the importance of a healthy menstrual cycle (and how to achieve it) and why it is important to the women's movement. Menstrual cycles are not a curse, but an instrument providing women with one of the most valuable, regularly occurring, and free diagnostic tools they have, giving them access to unprecedented health and power.

The Curse - Janice Delaney 1988

"In its hard headed, richly documented concreteness, it is worth a thousand polemics." -- New York Times, from a review of the first edition "The Curse deserves a place in every women's studies library collection." -- Sharon Golub, editor of *Lifting the curse of Menstruation* "A stimulating and useful book, both for the scholarly and the general reader." -- Paula A. Treichler, co-author of *A Feminist Dictionary*

Everyday Discourses of Menstruation - Victoria Louise Newton 2016-05-24
Menstruation is a topic which is both everyday and sensitive. From Leviticus to Pliny, to

twentieth-century debates around 'menotoxin', to advertising and 'having the painters in', Victoria Newton's book offers a lively and innovative exploration of the social and cultural dimensions of menstruation. Through in-depth interviews with men and women, the book explores the many different ways in which this sensitive topic is spoken about in British culture. Looking specifically at euphemism, jokes, popular knowledge, everyday experience and folklore, the book provides original insights into the different discourses acting on the menstruating body and encourages debate about how these help to shape our everyday attitudes towards menstruation.

Blood Magic - Thomas Buckley 2023-04-28
Examining cultures as diverse as long-house dwellers in North Borneo, African farmers, Welsh housewives, and postindustrial American workers, this volume dramatically redefines the anthropological study of menstrual customs. It challenges the widespread image of a universal "menstrual taboo" as well as the common assumption of universal female subordination which underlies it. Contributing important new material and perspectives to our understanding of comparative gender politics and symbolism, it is of particular importance to those interested in anthropology, women's studies, religion, and comparative health systems.
