As a medium of communication, Love's silent language predates speech by millions of years. Today, we still express emotions and

feelings largely apart from words. The postures, gestures, and facial cues of attraction are universal, in all societies and cultures. According to Dr. Givens, courtship moves slowly through five distinct phases: attracting attention, recognition phase, conversation phase, touching phase, making love. Since potential mates "test" each other before uniting as one, courtship is a choreographed give and take of signs granting physical and emotional closeness. Love Signals is part ethnography and part how-to. Dr. Givens documents the little courting rituals witnessed in elevators, on subways, and in the workplace. He examines the essential role the face plays in courtship and how it can be optimally displayed. He decodes the body to find silent messages given off by shoulders, neck, arms, hands, waist, calves, ankles, feet, and toes. Dr. Givens analyzes expressive shapes, colors, and markings encoded in arm wear, shoulder wear, leg wear, and shoes. He deciphers the background messages of spaces, places and interiors to learn how environs help or hinder in the meeting process. Chemical cues emanating from aromas, tastes, steroids, sterols, and hormones strongly shape a partner's feelings, so they are explored as well. The book suggests ways to gaze, ways to read eyes across a room, and ways to sit, stand, align, walk dress, and lift a drink to participate in the fascinating adventure of finding, winning, and keeping a mate. Knowing the unspoken vocabulary of love signals will give readers an edge. What this means for courtship is that the reader becomes able to read unspoken motives, emotions, and feelings with great clarity and precision. The more readers know about the nonverbal idiom of attraction, the more likely they will find a loving, lasting partner.

grade: 1,0, University of Education in Schwäbisch Gmünd,
language: English, abstract: The aim of this thesis is to give teachers the right and applicable knowledge about body language to make their lessons a success. But what exactly is a successful lesson? In this thesis, success and therefore a successful lesson is defined as following: To communicate the subject matter in the most efficient and the most understandable way possible and to ensure that the subject matter is presented in the most understandable way possible is mostly up to the teacher. He needs to know what he is talking about and must be able to communicate it in a way to make it understandable for everyone in the class. Besides the verbal communication, the nonverbal communication is also of importance in this aspect. Effective Teaching is the last body language chapter in this thesis, which is all about postures, mimics and gestures that make the verbal message more understandable and interesting. By using the information contained in the following chapters, the teacher can analyze, based on the student's body language, if they engage in the desired behavior. If this is not the case, this thesis provides body language signs for the educator to use, that will cause students to respond with the desired behavior. This is the reason why this thesis is split up into the four big chapters Motivation, Trust, Respect and Effective Teaching. The didactic purpose of each chapter will be explained in the following segment.

2013-05-18 Most people don't often mean what they say."How to Efficiently Decode People's Inner Feelings and Emotions Through Their Body Movements, and How You Can Use This Knowledge to Succeed in Your Career, Relationships, and Personal Life!"What I am about to tell you might shock you. Many people think that the most popular way of communicating with other people is through the mouth. But what they didn't know is that actual verbal communication accounts to only around 10% (or even less) of the overall means to convey a message. The only way you can determine their true inner feelings and thoughts is by reading their body language. Have you ever wondered what it would be like if you can "see through" the emotions of other people? Let's say you asked a person if he can do an important task. He says "ok." But deep inside, you are questioning yourself, "Is he really willing to do this job?" or "Does he have the confidence to finish this assignment?"You can't question him directly because that
