**Pioneering Paths in the Study of Families** Gary W Peterson 2014-03-18 Meet the men and women whose groundbreaking work elevated the field of family studies! In *Pioneering Paths in the Study of Families: The Lives and Careers of Family Scholars*, you'll find 40 autobiographies written by leading scholars in sociology, family studies, psychology, and child development. Their fascinating stories demonstrate how their family experiences, educational opportunities, and occupational endeavors not only shaped the disciplines they chose but also shaped the theoretical perspectives they utilized and the topics they researched. From the editors: "These autobiographies document the experiences of scholars from the early twentieth century to the present. The descriptions of early influences on their education, of their graduate school experiences, and of their academic career paths, provides a wealth of valuable material. Since four of these scholars have died and a number are in their eighties or older, these histories provide rich case studies on factors that influence the decision to go to college, get married, pursue an advanced degree, make specific occupational choices, and investigate certain topics. These autobiographies also detail the barriers that early women scholars in the social sciences faced." **The Politics of Sexuality in Latin America** Javier Corrales 2010 The city of Buenos Aires has guaranteed all couples, regardless of gender, the right to register civil unions. Mexico City has approved the Cohabitation Law, which grants same-sex couples marital rights identical to those of common-law relationships between men and women. Yet, a gay man was murdered every two days in Latin America in 2005, and Brazil recently led the world in homophobic murders. These facts illustrate the wide disparity in the treatment and rights of lesbian, gay, bisexual, and transgender (LGBT) populations across the region. The Politics of Sexuality in Latin America presents the first English-language reader on LGBT politics in Latin America. Representing a range of contemporary works by scholars, activists, analysts, and politicians, the chapters address LGBT issues in nations from Cuba to Argentina. In their many findings, two main themes emerge: the struggle for LGBT rights has made significant inroads in the first decade of the twenty-first century (though not in every domain or every region); and the advances made were slow in coming compared to other social movements. The articles uncover the many obstacles that LGBT activists face in establishing new laws and breaking down societal barriers. They identify perhaps the greatest roadblock in Latin American culture as an omnipresent system of "heteronormativity," wherein heterosexuality, patriarchy, gender hierarchies, and economic structures are deeply rooted in nearly every level of society. Along these lines, the texts explore specific impediments including family dependence, lack of public spaces, job opportunities, religious dictums, personal security, the complicated relationship between leftist political parties and LGBT movements in the region, and the ever-present "closets," which keep LGBT issues out of the public eye. The volume also looks to the future of LGBT activism in Latin America in areas such as globalization, changing demographics, the role of NGOs, and the rise of economic levels and education across societies, which may aid in a greater awareness of LGBT politics and issues. As the editors posit, to be democratic in the truest sense of the word, nations must recognize and address all segments of their populations.

?STREETISM? Isaac Ishmael Arthur 2013-09 This book is a study that investigates the phenomenon of "streetism"--the manner of life of homeless or unmonitored youth on the streets of Accra, Ghana, and other urban centers in a country where barrenness and childlessness are socially undesirable. The study utilizes a qualitative, ethnographic, and critical theory-based approach to present a socio-culturally nuanced addition to the literature on street children. The work engages in theological reflection on the basis of the experiences of poverty and marginalization of the youth on the streets and for their liberation. This thesis also utilizes an intercultural methodology to examine the causes of streetism and liberation praxis for its eradication. The findings of the study include how poverty, dropping out of school, breakdown of the extended family systems, parental death, urbanization, adventure, and earning of personal income influence the migration of youth to the streets. The study also examines the effects of rape and the resilient and hopeful attitudes of the homeless youth. The study proposes pastoral responses on three ecological levels. At the macro level, advocacy is proposed for addressing the problems embedded in social structures, and government policies and ideologies. At the meso-level congregational and community response is offered to deal with issues emanating from local communities and institutions. Dealing with the psychosocial effects at the micro level, the study offers pastoral counseling for street youth and parents, and individual, group, and narrative counseling approaches for individuals and groups within the community.

*Between Sex and Power* Göran Therborn 2004-07-31 The institution of the family changed hugely during the course of the twentieth century. In this major new work, Göran Therborn provides a global history and sociology of the family as an institution and of politics within the family, focusing on three dimensions of family relations: on the rights and powers of fathers and husbands; on marriage, cohabitation and extra-marital sexuality; and on population policy. Therborn's empirical analysis uses a multi-disciplinary approach to show how the major family systems of the world have been formed and developed. Therborn concludes by assessing what changes the family might see during the next century. This book will be essential reading for anybody with an interest in either the sociology or the history of the family.

**Encyclopedia of Women and Gender, Two-Volume Set** Judith Worell 2001-10-16 The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences. Along the way, it was discovered

that while women very often think and behave differently than do men, industrialized societies cater to masculine perspectives. The "Psychology of Women" emerged as a field of study focusing on just those areas in which women most often butted against assumed roles. And similarly, in the 1990s, the "Psychology of Men" emerged to focus on the same issues for men. The Encyclopedia of Gender covers all three areas under one cover, discussing psychological differences in personality, cognition, and behavior, as well as biologically based differences and how those differences impact behavior. Coverage includes studies of these differences in applied settings such as education, business, the home, in politics, sports competition, etc. Key Features \* Over 100 In-depth chapters by leading scholars in the psychology of women and gender \* Addresses critical questions of similarities and differences in gendering across diverse groups, challenging myths about gender polarization and the "Venus/Mars" distinction \* Broad coverage of topics from theory and method to development, personality, violence, sexuality, close relationships, work, health, and social policy \* Sensitive attention to multicultural and cross-cultural research \* Clearly written, readable, comprehensive, with helpful guides (outline, glossary, reference list) \* Raises difficult questions related to power, inequality, ethics, and social justice \* Challenges the reader to revise established "truths" and to seek further information \* Maintains a feminist and woman-centered focus
