

# Mating Intelligence Sex Relationships And The Minds Reproductive System

**The Wiley-Blackwell Handbook of Individual Differences** - Tomas Chamorro-Premuzic 2011-03-01

The Wiley-Blackwell Handbook of Individual Differences provides a comprehensive, up-to-date overview of recent research, current perspectives, practical applications, and likely future developments in individual differences. Brings together the work of the top global researchers within the area of individual differences, including Philip L. Ackerman, Ian J. Deary, Ed Diener, Robert Hogan, Deniz S. Ones and Dean Keith Simonton Covers methodological, theoretical and paradigm changes in the area of individual differences Individual chapters cover core areas of individual differences including personality and intelligence, biological causes of individual differences, and creativity and emotional intelligence

**Evolutionary Psychology 101** - Glenn Geher 2013-10-10

Print+CourseSmart

*The Mating Mind* - Geoffrey Miller 2001

Miller shows how our brains are the products of sexual selection, not natural selection, and how this alters and illuminates our understanding of intelligence, art, language, mortality, sex and the differences between men and women.

*The Unfit* - Elof Axel Carlson 2001

Carlson's history of degeneracy theory, the idea that certain people are biologically disposed to become socially unfit or "degenerate," examines the birth of both good and bad eugenics movements. While good eugenics movements focus on people whose needs may require intense social attention and expensive social investments, bad eugenics movements call for isolation if not eradication and genocide. He brings the history into the present day, where the potential misapplication of DNA science and social attitudes toward the human genome could lead to similar movements.

*Mating Intelligence Unleashed* - Glenn Geher, PhD 2013-02-14

Until recently, evolutionary psychologists have considered human mating behavior to be universal and similar to other animals, painting a picture of human mating as visceral, animalistic, and instinctual. But that's not the whole story. In courtship and display, sexual competition and rivalry, we are guided by Mating Intelligence, or the range of psychological abilities designed for sexual reproduction. In this book, psychologists Glenn Geher and Scott Barry Kaufman take a fascinating tour of the intersection of mating and intelligence by drawing on cutting-edge research on evolutionary psychology, intelligence, creativity, personality, social psychology, developmental psychology, neuroscience, epigenetics, and more. This book will change the way you think about sex, dating, love, and the human mind.

**In the Light of Evolution** - National Academy of Sciences 2007

The Arthur M. Sackler Colloquia of the National Academy of Sciences address scientific topics of broad and current interest, cutting across the boundaries of traditional disciplines. Each year, four or five such colloquia are scheduled, typically two days in length and international in scope. Colloquia are organized by a member of the Academy, often with the assistance of an organizing committee, and feature presentations by leading scientists in the field and discussions with a hundred or more researchers with an interest in the topic. Colloquia presentations are recorded and posted on the National Academy of Sciences Sackler colloquia website and published on CD-ROM. These Colloquia are made possible by a generous gift from Mrs. Jill Sackler, in memory of her husband, Arthur M. Sackler.

*Spent* - Geoffrey Miller 2009

Explores how evolutionary psychology has begun to identify the prehistoric origins of human behavior and discusses how those discoveries have influenced the way consumer spending is viewed and controlled by companies, retailers, and marketers.

**Dating - Philosophy for Everyone** - Kristie Miller 2011-01-10

Progressing from the first flirtatious moment of eye contact to the selection of a "mate," this enlightening

book offers playful philosophical explorations of the dating game for anyone who has dated, is dating, or intends to date again. Offers amusing and enlightening philosophical insights into the dating game Helps demystify coupling in the 21st century for those young daters just entering the fray, and those veterans returning to the game Features contributions from a wide range of disciplines, including philosophy, psychology, communications, theology, economics, health sciences, professional ethics, and engineering and applied sciences Opens with Carrie Jenkins' ground-breaking essay, The Philosophy of Flirting, first published in The Philosopher's Magazine

**On Fertile Ground** - Peter Thorpe ELLISON 2009-06-30

Reproduction is among the most basic of human biological functions, both for our distant ancestors and for ourselves, whether we live on the plains of Africa or in North American suburbs. Our reproductive biology unites us as a species, but it has also been an important engine of our evolution. In the way our bodies function today we can see both the imprint of our formative past and implications for our future. It is the infinitely subtle and endlessly dramatic story of human reproduction and its evolutionary context that Peter T. Ellison tells in *On Fertile Ground*. Ranging from the latest achievements of modern fertility clinics to the lives of subsistence farmers in the rain forests of Africa, this book offers both a remarkably broad and a minutely detailed exploration of human reproduction. Ellison, a leading pioneer in the field, combines the perspectives of anthropology, stressing the range and variation of human experience; ecology, sensitive to the two-way interactions between humans and their environments; and evolutionary biology, emphasizing a functional understanding of human reproductive biology and its role in our evolutionary history. Whether contrasting female athletes missing their periods and male athletes using anabolic steroids with Polish farm women and hunter-gatherers in Paraguay, or exploring the intricate choreography of an implanting embryo or of a nursing mother and her child, *On Fertile Ground* advances a rich and deeply satisfying explanation of the mechanisms by which we reproduce and the evolutionary forces behind their design.

*Faking It* - William Ian Miller 2003-08-18

This book is about the intrusive fear that we may not be what we appear to be, or worse, that we may be only what we appear to be and nothing more. It is concerned with the worry of being exposed as frauds in our profession, cads in our love lives, as less than virtuously motivated actors when we are being agreeable, charitable, or decent. Why do we so often mistrust the motives of our own deeds, thinking them fake, though the beneficiary of them gives us full credit? Much of this book deals with that self-tormenting self-consciousness. It is about roles and identity, discussing our engagement in the roles we play, our doubts about our identities amidst this flux of roles, and thus about anxieties of authenticity.

*Mating Intelligence* - Glenn Geher 2008

Human intelligence is sexually attractive, and strongly predicts the success of sexual relationships, but the behavioral sciences have usually ignored the interface between intelligence and mating. This is the first serious scholarly effort to explore that interface, by examining both universal and individual differences in human mating intelligence. Contributors include some of the most prominent evolutionary psychologists and promising new researchers in human intelligence, social psychology, intimate relationships, and sexuality. David Buss' foreword and the opening chapter explore what 'mating intelligence' means, and why it is central to human cognition and sexuality. The book's six sections then examine (1) our mating mechanisms -- universal emotional and cognitive adaptations for mating intelligently -- that guide mate search, mate choice, and courtship; (2) how mating intelligence strategically guides our choice of mating tactics and partners given different relationship goals, personality traits, forms of deception, and the existence of children; (3) the genetic and psychiatric causes of individual differences in mating intelligence; (4) how we use mental fitness indicators -- forms of human intelligence such as creativity, humor, and emotional intelligence -- to attract and retain sexual partners; (5) the ecological and social contexts of

mating intelligence; (6) integrative models of mating intelligence that can guide future research. Mating Intelligence is intended for researchers, advanced students, and courses in human sexuality, intimate relationships, intelligence research, behavior genetics, and evolutionary, personality, social, and clinical psychology.

**Sex at Dawn** - Christopher Ryan 2021-01-05

The 10th-anniversary edition of the book that radical re-evaluates the origins and nature of human sexuality. Since Darwin's day, we've been told that sexual monogamy comes naturally to our species. Mainstream science — as well as religious and cultural institutions — has maintained that men and women evolved in families in which a man's possessions and protection were exchanged for a woman's fertility and fidelity. In this groundbreaking book, however, Christopher Ryan and Cacilda Jethá argue that human beings evolved in egalitarian groups that shared food, child care, and, often, sexual partners. Weaving together evidence from anthropology, archaeology, primatology, anatomy, and psychosexuality, the authors show how far from human nature monogamy really is. With intelligence and humour, Ryan and Jethá explain how our promiscuous past haunts our contemporary struggles. They explore why many people find long-term fidelity so difficult; why sexual passion tends to fade even as love deepens; why homosexuality persists in the face of standard evolutionary logic; and what the human body reveals about the prehistoric origins of modern sexuality. Shocking, enlightening, and ultimately inspiring, *Sex at Dawn* offers a revolutionary understanding of why we live and love as we do.

*The Cognitive Basis of Social Interaction Across the Lifespan* - Heather J. Ferguson 2021

Explores the cognitive mechanisms underlying the development of human social interactive abilities across the lifespan, in healthy and atypical development. Combines traditionally separate bodies of research into one coherent volume, following the trajectory of communication over the entire lifespan from infancy to old age. Crosses multiple disciplines, drawing together expertise from researchers in psychology, neuroscience, psychiatry, linguistics, and philosophy. Brings together key methodologies and debates in a vibrant and fast-growing field. Written in an accessible style and suited to a wide range of readers, including academics and students of cognitive, developmental, and social psychology, related sciences and social sciences, as well as practitioners working in the fields of social care, mental health, and education

**Mating Intelligence Unleashed** - Glenn Geher PhD 2013-01-30

Psychologists often paint a picture of human mating as visceral, instinctual. But that's not the whole story. In courtship and display, sexual competition and rivalry, we are also guided by what Glenn Geher and Scott Barry Kaufman call Mating Intelligence—a range of mental abilities that have evolved to help us find the right partner. Mating Intelligence is at work in our efforts to form, maintain, and end relationships. It guides us in flirtation, foreplay, copulation, finding and choosing a mate, and many other behaviors. In *Mating Intelligence Unleashed*, psychologists Geher and Kaufman take readers on a fascinating tour of the crossroads of mating and intelligence, drawing on cutting-edge research on evolutionary psychology, intelligence, creativity, personality, social psychology, neuroscience, and more. The authors show that despite what you may read in the latest issue of *Maxim*, *Playboy*, *Vogue*, or *GQ*, physical attractiveness isn't the whole story. Human mating draws on a range of mental skills and attributes—from the creative use of pick-up lines, to displays of charisma, intelligence, humor, personality, and compassion. Along the way, the authors shed new light on age-old questions, such as: What role does personality play in mating? Which traits are attractive—and which traits repulse? How do people really choose mates? How do men and women deceive each other? How important is emotional intelligence? Why do people create art—and does it have anything to do with sex? Do nice guys really finish last? Since Glenn Geher coined the term Mating Intelligence in 2006, it has drawn a great deal of media attention, ranging from a *Psychology Today* cover story to articles in the *New Scientist*, the *Washington Times*, the *Huffington Post*, and elsewhere. Now, in *Mating Intelligence Unleashed*, readers will have the first full account of this revolutionary new approach to dating, mating, and love.

**EPSA Philosophy of Science: Amsterdam 2009** - Henk W. de Regt 2011-10-15

This is a collection of high-quality research papers in the philosophy of science, deriving from papers presented at the second meeting of the European Philosophy of Science Association in Amsterdam, October 2009.

*Women in Philosophical Counseling* - Luisa de Paula 2015-04-23

This multi-faceted collection of women's perspectives on the renaissance in philosophical practices provides an international overview on the professional practice of philosophical counseling as rooted in the ancient philosophical discipline of life and its essential difference from modern mainstream philosophy.

*The Oxford Handbook of Evolutionary Psychology and Romantic Relationships* - Todd Kennedy Shackelford 2023-02-28

"Evolutionary social science is having a renaissance. This volume showcases the empirical and theoretical advancements produced by the evolutionary study of romantic relationships. The editors assembled an international collection of contributors to trace how evolved psychological mechanisms shape strategic computation and behavior across the lifespan of a romantic partnership. Each chapter provides an overview of historic and contemporary research on the psychological mechanisms and processes underlying initiation, maintenance, and dissolution of romantic relationships. Contributors discuss popular and cutting-edge methods for data analysis and theory development, critically analyse the state of evolutionary relationship science, and provide discerning recommendations for future research. The handbook integrates a broad range of topics (e.g., partner preference and selection, competition and conflict, jealousy and mate guarding, parenting, partner loss and divorce, and post-relationship affiliation) that are discussed alongside major sources of strategic variation in mating behavior, such as sex and gender diversity, developmental life history, neuroendocrine processes, technological advancement, and culture. Its content promises to enrich students' and established researchers' views on the current state of the discipline and should challenge a diverse cross-section of relationship scholars and clinicians to incorporate evolutionary theorizing into their professional work"--

*Essentials of KABC-II Assessment* - Alan S. Kaufman 2005-01-21

Quickly acquire the knowledge and skills you need to confidently administer, score, and interpret the KABC-II Now designed for children aged three to eighteen, the KABC-II is among the top tier of children's tests of cognitive ability. Alan and Nadeen Kaufman, authors of the KABC-II, joined forces with Elizabeth Lichtenberger and Elaine Fletcher-Janzen to produce *Essentials of KABC-II Assessment*. The best source of information on the new edition of the K-ABC, *Essentials of KABC-II Assessment* provides students and practitioners with an unparalleled resource for learning and application, including expert assessment of the test's relative strengths and weaknesses, valuable advice on its clinical applications, and illuminating case reports. Like all the volumes in the *Essentials of Psychological Assessment* series, this book is designed to help busy mental health professionals quickly acquire the knowledge and skills they need to make optimal use of a major psychological assessment instrument. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered.

**Biosocial Criminology** - Anthony Walsh 2008-11-12

This book is designed to bring criminology into the 21st century by showing how leading criminologists have integrated aspects of the biological sciences into their discipline. These authors cover behavior and molecular genetics, epigenetics, evolutionary biology, and neuroscience, and apply them to various correlates of crime such as age, race, and gender. There are also chapters on substance abuse, psychopathy, career criminals, testosterone and treatment. While not trashing traditional ideas about these topics, the authors of these chapters show how biosocial concepts add to, complement, a.

**The Cambridge Handbook of Intelligence** - Robert J. Sternberg 2020-01-16

Written by the foremost experts in human intelligence. It not only includes traditional topics, such as the nature, measurement, and development of intelligence, but also contemporary research into intelligence and video games, collective intelligence, emotional intelligence, and leadership intelligence. In an area of study that has been fraught with ideological differences, this Handbook provides scientifically balanced and objective chapters covering a wide range of topics. It does not shy away from material that historically has been emotionally charged and sometimes covered in biased ways, such as intellectual disability, race and intelligence, culture and intelligence, and intelligence testing. The overview provided by this two-volume set leaves virtually no area of intelligence research uncovered, making it an ideal resource for undergraduates, graduate students, and professionals looking for a refresher or a summary of the new

developments.
