### **COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence**

Paul T. P. Wong In the era of COVID-19, many people have suffered high levels of stress and mental health problems. To cope with the widespread of suffering (physical, psychological, social, and economical) the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing. Other approaches such as Viktor Frankl's theory of self-transcendence provide a promising framework for research and intervention on how to achieve resilience, wellbeing, and happiness through overcoming suffering and self-transcendence. The existential positive psychology of suffering complements the positive psychology of happiness, which is championed by Martin Seligman, as two equal halves of the circle of wellbeing and optimal mental health. This Research Topic aims to examine the different approaches to Positive Psychology and their influence on individual wellbeing during the COVID-19 era. One of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions, such as shame, guilt, and anger, as well as the dialectical process of balancing negative and positive emotions. As an example, based on all the empirical research and Frankl's self-transcendence model, Wong has developed the existential positive psychology of suffering (PP2.0) as the foundation for flourishing. Here are a few main tenets of PP2.0: (1) Life is suffering and a constant struggle throughout every stage of development, (2) The search for self-transcendence is a primary motive guided by the meaning mindset and mindful mindset. (3) Wellbeing cannot be

sustainable without overcoming and transforming suffering. In this Research Topic we welcome diverse approaches discussing the following points: • The dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self-transcendence; • The role of self-transcendence in resilience, virtue, meaning, and happiness; • The upside of negative emotions; • The new science of resilience based on cultivating the resilient mindset and character; • How to make the best use of suffering to achieve our potentials & mental health.

**The Self-Care Project** Jayne Hardy 2017-12-14 'Refreshing, heartfelt and humble...a game changer in promoting positive mental health' Sarah Turner, bestselling author of *THE UNMUMSY MUM* There's a damaging misconception in society that putting ourselves first is an act of selfishness. But self-care is not just a millennial buzzword. Without the restorative power of self-care, how will we ever escape the vicious circle where we're sick and fed-up of feeling sick and fed-up? Self-care is a tool, accessible to us all, which helps us to take responsibility for our own happiness - our physical, emotional, psychological and social needs. Jayne Hardy, founder and CEO of The Blurt Foundation, argues that it is the best preventative measure available to us to combat overwhelmedness, stress and ill health, in our hectic, modern world. The Self-Care Project is for those who have been feeling off-kilter for a while but have not been able to put the finger on the 'why'. It is a no-nonsense, practical journey to help you do just that. It'll walk you through the case for self-care (why it's so darn important), why it isn't selfish at all, help you explore what self-care means for you, what your obstacles might be and provide advice on how to chisel out daily space for self-care in a practical, achievable and realistic way. A committed, long term relationship was something that I strongly desired while I was single during my mid to late twenties. The fact that I never seemed to have one was beyond me. Not only was I attractive and available, but, I was college educated, had a career, my own home and car--all the things that an equally well established man would want in a woman. Time after time I would find myself in the wrong type of romantic situation, dealing with and also doing crazy things, in hopes that it would manifest into the relationship that I wanted. It was not until life threw me a curve ball that I was forced to do some true self-reflection. Now that I am happily married with two beautiful daughters, I realize what I could have done better while single to attract the love that I desired into my life. Take a journey with me as I offer experienced insight on how to get from where you are at, to where you want to be--in love and relationships!

**The Making and Meaning of Relationships in Sri Lanka** Mihirini Sirisena 2018-03-15 This book proposes that romantic relationships—filtered through various socio-cultural sieves—can lead to the development of affective kin bonds, which underlie our sense of personhood and belonging. Sirisena argues that the process resembles an attempt to make strangers into kin, and that sort of affective relating is a form of self-conscious relationality, in which the inhabitants reflect on their individual and collective needs, as well as their expectations and dreams in the future of their relationships. University students' romantic relationships, which they gloss as 'serious,' appear to be processual and non-linear, and are considered to be stabilising forces which are pitched against the inherent uncertainty in young people's lives.

Cognitive Readiness in Project Teams Carl Belack 2019-02-21 Issues surrounding business complexity plague organizations throughout the world. This situation is particularly true of the numerous complex projects and programs upon which organizations embark on a regular basis. Current project management processes and standards are based on Newtonian/Cartesian principles, such as linearity, reductionism, and single source problem causation. However, complex projects exhibit both Newtonian/Cartesian characteristics and complex systems characteristics, such as emergence, self-organization, non-linearity, non-reductionism, and multi-source problem causation. To conduct successful projects, complementary ways of approaching projects are required, and new competencies for those who manage projects and for those on project teams are required as well. There are a number of books available to help project managers and teams address the issue of systems behavior. However, there are none that approach complex projects from a neuroscience-based approach to human behavior and ambiguity. This book does exactly that in order to reduce project complexity and thereby increase the probability of project success. Cognitive Readiness in Project Teams looks to the concept of cognitive readiness (CR), first developed by the United States Department of Defense to better prepare and manage teams of individuals in complex battlefield situations. Its intent is to make project managers and teams more focused, responsive, resilient and adaptive through self-mastery and the mastering of interpersonal relationships. It introduces a CR framework for project managers and teams. This framework has neuroscience fundamentals and theorems as the foundation for the three pillars of CR: mindfulness, emotional intelligence, and social intelligence. The book is a compendium of chapters written by renowned authors in the fields of project management, neuroscience, mindfulness, and emotional and social intelligence.

Christian expression, and while this notion of relationship with God usually lacks a clear definition and its explication is often deeply flawed, this book argues nevertheless for the centrality of a theology of relationship. By reintroducing Emil Brunner as a relational theologian, based on his seminal work *Truth as Encounter*, it is boldly proposed that relationship must be the prime leitmotif for the whole of theology. Furthermore, the relationship analogy is investigated in light of contemporary relationship science: is it accurate to speak of a relationship with God? Berra argues that God-human interaction is indeed categorically a relationship and existentially intended to be intimate. Consequently, this relationship needs to be the theological leitmotif leading to a theology of relationship.
