**In the Name of the Children** - Jeffrey L. Rinek 2019-06-27

FBI Special Agent Jeff Rinek had a gift for getting child predators to confess. All he had to do was share a piece of his soul . . . In the Name of the Children gives an unflinching look at what it's like to fight a never-ending battle against an enemy far more insidious than terrorists: the predators, lurking amongst us, who seek to harm our children. During his 30-year career with the FBI, Jeff Rinek worked hundreds of investigations involving crimes against children: from stranger abduction to serial homicide to ritualized sexual abuse. Those who do this kind of work are required to plumb the depths of human depravity, to see things no one should ever have to see - and once seen can never forget. There is no more important - or more brutal - job in law enforcement, and few have been more successful than Rinek at solving these sort of cases. Most famously, Rinek got Cary Stayner to confess to all four of the killings known as the Yosemite Park Murders, an accomplishment made more extraordinary by the fact that the FBI nearly pinned the crimes on the wrong suspects. Rinek's recounting of the confession and what he learned about Stayner provides perhaps the most revelatory look ever inside the psyche of a serial killer and a privileged glimpse into the art of interrogation. In the Name of the Children takes readers into the trenches of real-time investigations where every second counts and any wrong decision or overlooked fact can have tragic repercussions. Rinek offers an insider's perspective of the actual case agents and street detectives who are the boots on the ground in this war at home. By placing us inside the heart and mind of a rigorously honest and remarkably self-reflective investigator, we will see with our own eyes what it takes-and what it costs - to try to keep our children safe and to bring to justice those who prey on society's most vulnerable victims. With each chapter dedicated to a real case he worked, In the Name of the Children also explores the evolution of Rinek as a Special Agent - whose unorthodox, empathy-based approach to interviewing suspects made him extraordinarily successful in obtaining confessions - and the toll it took to have such intimate contact with child molesters and murderers. Beyond exploring the devastating impact of these unthinkable crimes on the victims and their families, this book offers an unprecedented look at how investigators and their loved ones cope while living in the spectre of so much suffering.

**No Dig, No Fly, No Go** - Mark Monmonier 2010-05-15

Some maps help us find our way; others restrict where we go and what we do. These maps control behavior, regulating activities from flying to fishing, prohibiting students from one part of town from being schooled on the other, and banishing certain individuals and industries to the periphery. This restrictive cartography has boomed in recent decades as governments seek regulate activities as diverse as hiking, building a residence, opening a store, locating a chemical plant, or painting your

house anything but regulation colors. It is this aspect of mapping—its power to prohibit—that celebrated geographer Mark Monmonier tackles in No Dig, No Fly, No Go. Rooted in ancient Egypt's need to reestablish property boundaries following the annual retreat of the Nile's floodwaters, restrictive mapping has been indispensable in settling the American West, claiming slices of Antarctica, protecting fragile ocean fisheries, and keeping sex offenders away from playgrounds. But it has also been used for opprobrium: during one of the darkest moments in American history, cartographic exclusion orders helped send thousands of Japanese Americans to remote detention camps. Tracing the power of prohibitive mapping at multiple levels—from regional to international—and multiple dimensions—from property to cyberspace—Monmonier demonstrates how much boundaries influence our experience—from homeownership and voting to taxation and airline travel. A worthy successor to his critically acclaimed How to Lie with Maps, the book is replete with all of the hallmarks of a Monmonier classic, including the wry observations and witty humor. In the end, Monmonier looks far beyond the lines on the page to observe that mapped boundaries, however persuasive their appearance, are not always as permanent and impermeable as their cartographic lines might suggest. Written for anyone who votes, owns a home, or aspires to be an informed citizen, No Dig, No Fly, No Go will change the way we look at maps forever.

**Where is Daniel?** - Bruce Morcombe 2014-08-04

On 7 December 2003 Daniel Morcombe disappeared on the Sunshine Coast, while waiting for a bus. For Bruce and Denise Morcombe - the parents of Daniel - and his brothers, Bradley and Dean, it was apparent within hours that something was very wrong. In the first few days following Daniel's disappearance, Bruce and Denise made a promise to their son that they would never ever stop looking for him, and bring who was responsible to justice. 'We will never give up.' As the nightmare of hours became days then weeks, and months and years, the family mobilised to become the moral force behind the longest criminal investigation in Australia's history. Where is Daniel? covers the decade-long investigation into the disappearance of Daniel and the extraordinary courage, dignity, persistence and fortitude Bruce and Denise displayed under unbearable circumstances. This determination also applied to Bruce and Denise's desire to mine something positive from the darkest of experiences. They started the Daniel Morcombe Foundation in 2005, to teach children about safety, and have since visited hundreds of schools around Australia. They've established Australia's largest annual child safety day-of-action, 'Day for Daniel', and utilised the funds raised to support other children who have been the victims of abuse. Over a decade later, with Daniel's killer brought to justice thanks to an amazing covert police sting, this is the family's story. Where is Daniel? is a testament to the enduring power of love between parents and their child, and the strength and bonds of family to survive.

Desistance from Sex Offending - D. Richard Laws 2011-03-11

This book offers a fresh perspective on treating a population that is often demonized by policymakers, the public, and even clinicians. The authors argue that most sex offenders are "people like us," with the potential to lead meaningful, law-abiding lives—if given a chance and appropriate support. They describe an empirically and theoretically grounded rehabilitation approach, the Good Lives Model, which can be integrated with the assessment and intervention approaches that clinicians already use. Drawing on the latest knowledge about factors promoting desistance from crime, the book discusses how encouraging naturally occurring desistance processes, and directly addressing barriers to community reintegration, can make treatment more effective and long lasting.

**The Meaning of Gay** - Todd J. Ormsbee 2012-07-10

The Meaning of Gay traces the conflicts among San Francisco's gay men and with the dominant society, describing the broad range of meanings they came to ascribe onto 'gayness' between 1962 and 1972. Combining historical method, symbolic interaction, and the concerns of John Dewey's pragmatism, the book explains why gay men created the meanings they did and challenges the prevailing view that the 1960s was merely the transformation of an assimilationist gay politic into a radical one.

*Sexual Homicide of Women on the U.S.-Mexican Border* - Sara Schatz 2016-10-21

This volume focuses on the specific relationship between the institutional impunity, lack of public safety and public space in failing to prevent organized sexual murder. The murder of women on the U.S.-Mexican border is a complex phenomenon with multiple geographic, economic, political, sociological, and psychological causes.

*Lost Memory of Skin* - Russell Banks 2011-09-29

Suspended in a strangely modern-day version of limbo, a young man must create a life for himself in the wake of incarceration. Known only as the Kid, and on probation after doing time for a liaison with an underage girl, he is shackled to a GPS monitoring device and forbidden to live within 2,500 feet of anywhere children might gather. With nowhere else to go, the Kid takes up residence in a makeshift encampment with other convicted sex offenders. Barely beyond childhood himself, the Kid is in many ways an innocent, trapped by impulses and foolish choices. Enter the Professor, a man who has built his own life on secrets and lies. A university sociologist of enormous size and intellect, he finds in the Kid the perfect subject for his research on homelessness and reoffending sex offenders. The two men forge a tentative partnership. But when the Professor's past resurfaces and threatens to destroy his carefully constructed world, the balance in the two men's relationship shifts. Suddenly, the Kid must reconsider everything he has come to believe, and choose what course of action to take when faced with a new kind of moral decision.
