Femininity, Masculinity, and Sexuality in Morocco and Hollywood - Osire Glacier

2017-05-19

This book is the first to formulate an ideology of emancipation for women in Morocco. Beginning with constructs of the body, femininity and masculinity, it analyzes the central role played by the sociopolitical writing of sexuality in creating gender hierarchy. The author focuses on Morocco, while drawing parallels with Hollywood cinema, one of the great producers of femininity and masculinity, and conducts an exhaustive examination of constructs of femininity and masculinity in language, social practices, cultural productions and legal texts. The objectives of this project are tripartite: it exposes the dynamics that devalue women's humanity; it charts the schemas of their sexual, economic and sociopolitical exploitation; and it advances concrete solutions for re-establishing women's human dignity.

Sexing the Body - Anne Fausto-Sterling
2020-06-30

The groundbreaking examination of the construction of sexual identity -- now updated to reflect the latest research Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is

shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

The Body - Chris Shilling 2016

In this introduction, Chris Shilling considers the social significance of the human body, and the importance of the body to individual and collective identities. He examines how bodies not only shape but are shaped by the social, cultural, and material contexts in which humans live.

The Ashgate Research Companion to Queer Theory - Noreen Giffney 2016-03-23

This interdisciplinary volume of thirty original essays engages with four key concerns of queer theoretical work - identity, discourse, normativity and relationality. The terms 'queer' and 'theory' are put under interrogation by a combination of distinguished and emerging scholars from a wide range of international locations, in an effort to map the relations and disjunctions between them. These contributors

are especially attendant to the many theoretical discourses intersecting with queer theory, including feminist theory, LGBT studies, postcolonial theory, psychoanalysis, disability studies, Marxism, poststructuralism, critical race studies and posthumanism, to name a few. This Companion provides an up to the minute snapshot of queer scholarship from the past two decades and identifies many current directions queer theorizing is taking, while also signposting several fruitful avenues for future research. This book is both an invaluable and authoritative resource for scholars and an indispensable teaching tool for use in the classroom.

How to Suppress Women's Writing - Joanna Russ
1983-09

Discusses the obstacles women have had to overcome in order to become writers, and identifies the sexist rationalizations used to trivialize their contributions

The Evolving Female - Mary Ellen Morbeck
1996-12-09

A human female is born, lives her life, and dies within the space of a few decades, but the shape of her life has been strongly influenced by 50 million years of primate evolution and more than 100 million years of mammalian evolution. How the individual female plays out the stages of her life--from infancy, through the reproductive period, to old age--and how these stages have been formed by a long evolutionary process, is the theme of this collection. Written by leading scholars in fields ranging from evolutionary biology to cultural anthropology, these essays together examine what it means to be female, integrating the life histories of marine mammals, monkeys, apes, and humans. The result is a fascinating inquiry into the similarities among the ways females of different species balance the need for survival with their role in reproduction and mothering. *The Evolving Female* offers an outlook integrating life history with an intimate examination of female life paths. Behavior, anatomy and physiology, growth and

development, cultural identity of women, the individual, and the society are among the topics investigated. In addition to the editors, the contributors are Linda Fedigan, Kathryn Ono, Joanne Reiter, Barbara Smuts, Mariko Hiraiwa-Hasegawa, Mary McDonald Pavelka, Caroline Pond, Robin McFarland, Silvana Borgognini Tarli and Elena Repetto, Gilda Morelli, Patricia Draper, Catherine Panter-Brick, Virginia J. Vitzthum, Alison Jolly, and Beverly McLeod. *Gender Ironies of Nationalism* - Tamar Mayer 2012-10-12

This book provides a unique social science reading on the construction of nation, gender and sexuality and on the interactions among them. It includes international case studies from Indonesia, Ireland, former Yugoslavia, Liberia, Sri Lanka, Australia, the USA, Turkey, China, India and the Caribbean. The contributors offer both the masculine and feminine perspective, exposing how nations are comprised of sexed bodies, and exploring the gender ironies of nationalism and how sexuality plays a key role in nation building and in sustaining national identity. The contributors conclude that control over access to the benefits of belonging to the nation is invariably gendered; nationalism becomes the language through which sexual control and repression is justified masculine prowess is expressed and exercised. Whilst it is men who claim the prerogatives of nation and nation building it is, for the most part, women who actually accept the obligation of nation and nation building.

[Lessons from the Intersexed](#) - Suzanne J. Kessler 1998

Focusing on intersexuality, having physical gender markers that are neither female or male, the author examines the social institutions that are mobilized to maintain the two seemingly objective sexual categories. She argues that we need to rethink the meaning of gender, genitals and sexuality.

Feminism and Evolutionary Biology - Patricia Gowaty 2012-12-06

Standing at the intersection of evolutionary biology and feminist theory is a large audience interested in the questions one field raises for the other. Have evolutionary biologists worked largely or strictly within a masculine paradigm, seeing males as evolving and females as merely reacting passively or carried along with the tide? Would our view of nature 'red in tooth in claw' be different if women had played a larger role in the creation of evolutionary theory and through education in its transmission to younger generations? Is there any such thing as a feminist science or feminist methodology? For feminists, does any kind of biological determinism undermine their contention that gender roles purely constructed, not inherent in the human species? Does the study of animals have anything to say to those preoccupied with the evolution and behavior of humans? All these questions and many more are addressed by this book, whose contributing authors include leading scholars in both feminism and evolutionary biology. Bound to be controversial, this book is addressed to evolutionary biologists and to feminists and to the large number of

people interested in women's studies.

Sexing the Body - Anne Fausto-Sterling
2000-11

Myths Of Gender - Anne Fausto-Sterling
2008-08-04

Sexual Politics - Kate Millett 2016-02-16

A sensation upon its publication in 1970, *Sexual Politics* documents the subjugation of women in great literature and art. Kate Millett's analysis targets four revered authors—D. H. Lawrence, Henry Miller, Norman Mailer, and Jean Genet—and builds a damning profile of literature's patriarchal myths and their extension into psychology, philosophy, and politics. Her eloquence and popular examples taught a generation to recognize inequities masquerading as nature and proved the value of feminist critique in all facets of life. This new edition features the scholar Catharine A. MacKinnon and the *New Yorker* correspondent Rebecca Mead on the importance of Millett's work to challenging the complacency that sidelines feminism.

The Subject of Anthropology - Henrietta L. Moore 2013-04-23

In this ambitious new book, Henrietta Moore

draws on anthropology, feminism and psychoanalysis to develop an original and provocative theory of gender and of how we become sexed beings. Arguing that the Oedipus complex is no longer the fulcrum of debate between anthropology and psychoanalysis, she demonstrates how recent theorizing on subjectivity, agency and culture has opened up new possibilities for rethinking the relationship between gender, sexuality and symbolism. Using detailed ethnographic material from Africa and Melanesia to explore the strengths and weaknesses of a range of theories in anthropology, feminism and psychoanalysis, Moore advocates an ethics of engagement based on a detailed understanding of the differences and similarities in the ways in which local communities and western scholars have imaginatively deployed the power of sexual difference. She demonstrates the importance of ethnographic listening, of focused attention to people's imaginations, and of how this illuminates different facets of complex theoretical issues and human conundrums. Written not just for professional scholars and for students but for anyone with a serious interest in how gender and sexuality are conceptualized and experienced, this book is the most powerful and persuasive assessment to date of what anthropology has to contribute to these debates now and in the future.

Gender, Sex, and Sexualities - Nancy Kimberly Dess 2018

This volume is a compendium of conceptual frameworks and associated research approaches used for inquiry into gender, sex, and sexualities. It is suitable for use as an advanced textbook.
