Islands of Identity - Samuel Edquist
2015-01-31

Islands of Identity: History-writing and identity formation in five island regions in the Baltic Sea Gotland, Aland, Saaremaa, Hiiumaa and Bornholm are five island regions in the Baltic Sea which constitute, or have until recently constituted, provinces or counties of their own. Combining perspectives from two disparate academic fields, uses of history and island studies, this book investigates how regional history writing has contributed to the formation of regional identity on these islands since the year 1800. The special geographic situation of

the islands-somewhat secluded from the mainland but also connected to important waterways-has provided their inhabitants with shared historical experiences. Due to varying geographic and historical circumstances, the relationship between regional and national identity is however different on each island. While regional history writing has in most cases aimed at integrating the island into the nation state, it has on Aland in the second half of the 20th century been used to portray its inhabitants as a separate nation. Dramatic political upheavals as the World Wars has also caused shifts in how regional history writing has

represented the relationship to the mainland nation state, and has sometimes also resulted in altered national loyalties.

Persistent Object Systems - Graham N.C. Kirby 2001-10-10

This book constitutes the thoroughly refereed post-proceedings of the 9th International Workshop on Persistent Object Systems, POS-9, held in Lillehammer, Norway, in September 2001. The 19 revised full papers presented together with seven session overviews and an epilogue were selected during two rounds of reviewing and revision for inclusion in the proceedings. Among the topics addressed are persistence-enabled optimization, Java applications, JVM, systems architecture, persistent GIS, data sharing middleware, polylingual persistence, transactions, distributed object systems, object stores, garbage collectors, WWW and persistence, persistent computation implementation, orthogonally persistent Java, and personal information devices.

Negotiating Climate Change in Crisis - Steffen Böhm 2021-09-28

Climate change negotiations have failed the world. Despite more than thirty years of high-level, global talks on climate change, we are still seeing carbon emissions rise dramatically. This edited volume, comprising leading and emerging scholars and climate activists from around the world, takes a critical look at what has gone wrong and what is to be done to create more decisive action. Composed of twenty-eight essays—a combination of new and republished texts—the anthology is organised around seven main themes: paradigms; what counts?; extraction; dispatches from a climate change frontline country; governance; finance; and action(s). Through this multifaceted approach, the contributors ask pressing questions about how we conceptualise and respond to the climate crisis, providing both ‘big picture’ perspectives and more focussed case studies. This unique and extensive collection will be of

great value to environmental and social scientists alike, as well as to the general reader interested in understanding current views on the climate crisis.

The Party - Barry Sheppard 2005

Gateways to Art - Debra J. DeWitte 2018-10

Flexible organization, inclusive illustration program, expanded media resources.

Dissenting Traditions - Sean Carleton
2021-07-12

The work of Bryan D. Palmer, one of North America's leading historians, has influenced the fields of labour history, social history, discourse analysis, communist history, and Canadian history, as well as the theoretical frameworks surrounding them. Palmer's work reveals a life dedicated to dissent and the difficult task of imagining alternatives by understanding the past in all of its contradictions, victories, and failures. *Dissenting Traditions* gathers Palmer's contemporaries, students, and sometimes critics

to examine and expand on the topics and themes that have defined Palmer's career, from labour history to Marxism and communist politics.

Paying attention to Palmer's participation in key debates, contributors demonstrate that class analysis, labour history, building institutions, and engaging the public are vital for social change. In this moment of increasing precarity and growing class inequality, Palmer's politically engaged scholarship offers a useful roadmap for scholars and activists alike and underlines the importance of working-class history. With contributions by Alan Campbell, Alvin Finkel, Sam Gindin, Gregory S. Kealey, John McIlroy, Kirk Niegarth, Bryan D. Palmer, Leo Panitch, Chad Pearson, Sean Purdy, and Nicholas Rogers.

To overcome our dependence on systematic sins for relief from emotional pain, we must avoid reoccurring emotional pain that opens separation from God. We prevent reoccurring emotional pain from happening by replacing emotional disabilities with emotional abilities. Emotional disabilities from adverse reactions to emotional injuries include hate, unresolved grief, unprovoked anger, impatience, meanness, evil intentions, unfaithfulness, harshness, and undisciplined behavior. The fruit of the Holy Spirit are the emotional abilities that we need to nurture God-pleasing priorities, values, and behavior. Emotional abilities prevent self-serving ego, anger, and greed from disrupting fellowship with God. The fruit of the Holy Spirit are love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, and self-control. When we have God-pleasing emotional abilities, our emotional and spiritual growth experiences overcome adverse reactions to emotional injuries. The emotional injuries continue to

occur, but our response as followers of Jesus Christ avoids reoccurring emotional pain. We experience emotional renewal that defeats emotional pain when our love for God becomes the humility and compassion we show in our relationships with others.

Glomerulonephritis - Howard Trachtman
2019-04-08

This Handbook serves as a convenient, state-of-the-art and comprehensive resource on the pathogenesis, diagnosis, and treatment of glomerular diseases. Clinical approaches, modalities and challenges are provided, along with new developments since the publication of *Kidney Disease Improving Global Outcomes (KDIGO): Glomerulonephritis*. Chapters dedicated to glomerular diseases mirror the

current classification schemes used by Nephrologists and Pathologists and will include definition and natural history, epidemiology, clinical manifestations, pathology, diagnosis, differential diagnosis, treatment (algorithms when appropriate), prognosis and future prospects and current direction of research. Contributing authors consist of internationally renowned glomerulonephritis experts, renal pathologists and clinical nephrologists who are engaged in the management of glomerular diseases in clinical pediatric and internal medicine practices. Glomerulonephritis fills a considerable knowledge gap for general nephrologists, providers involved with the care of patients with glomerular diseases, and researchers. It should also be of value to medical students, interns, residents and fellows, as well as all clinicians engaged in medical education.

Improving Inclusive Education through Universal Design for Learning - Alvyra

Galkiene 2021-09-10

This open access international scientific study provides an analysis of how the educational strategy of Universal Design for Learning can stimulate the process of inclusive education in different educational-cultural contexts and different areas of the educational system. The findings of the research deepen the conception of inclusive education and present an analysis of factors that are significant for developing the educational system as well as providing evidence-based recommendations for educational practice. The research for this work was done in four European countries with various historical-cultural contexts: Lithuania and Poland underwent a transformation of the educational systems at the turning point in their political system, shifting from a strictly centralized Soviet policy to a liberal and democratic education system; Austria has experienced changes in social stratification and a need for cultural harmonisation arising from active national migration processes, whereas
