The Transformation of Social Work Education through Virtual Learning R. Paul Maiden 2019-09-12 Over the past few years, numerous highly ranked, Tier 1 universities across the United States have embraced the development of advanced online degrees, a niche of secondary education long held by a small group of private, for-profit universities. Rapid advances in online learning technology, increasingly sophisticated, and easy to use 'learning management systems' and 'anytime, anywhere access' has dramatically increase the demand of individuals, mostly full time employed, working professionals. This volume addresses the dramatic changes that are occurring in social work pedagogy as more schools develop online programs. The University of Southern California Suzanne Dworak Peck School of Social Work launched their 'Virtual Academic Center' with a cohort of 80 online students. The program has now reached a 'steady state' of 2,200 'virtual' students now representing two thirds of their MSW student population. Additionally, the school launched a doctorate of social work degree with a focus on leading and managing innovation, leading public discourse and management of large complex systems. This book essentially tells the 'USC story' with the challenges faced in embracing this new technology, teaching social work courses in an online environment, as well as pedagogical enhancements made by faculty in converting traditional campus based courses to the virtual environment.

Governance Networks in the Public Sector Erik Hans Klijn 2015-08-28 *Governance Networks in the Public Sector* presents a comprehensive study of governance networks and the management of complexities in network settings. Public, private and non-profit organizations are increasingly faced with complex, wicked problems when making decisions, developing policies or delivering services in the public sector. These activities take place in networks of interdependent actors guided by diverging and sometimes conflicting perceptions and strategies. As a result these networks are dominated by cognitive, strategic and institutional complexities. Dealing with these complexities requires sophisticated forms of coordination: network governance. This book presents the most recent theoretical and empirical insights into governance networks. It provides a conceptual framework and analytical tools to study the complexities involved in handling wicked problems in governance networks in the public sector. The book also discusses strategies and management recommendations for governments, business and third sector organisations operating in and governing networks. *Governance Networks in the Public Sector* is an essential text for advanced students of public management, public administration, public policy and political science, and for public managers and policymakers.

Small Group and Team Communication Thomas E. Harris 2018-05-10 Much of contemporary communication occurs between and among small groups, whether in person in a work setting or on the Internet via email, Facebook, or instant messages. How we engage in our small-group communication in each medium matters. To be effective we have to consider our group roles, norms, cohesion, process, and phases of development, as well as our personal verbal and nonverbal communication and listening styles. To succeed as a member of a team, we need to consider the limits of our personal experience and perspective, recognize the creative strength of diverse perspectives in decision making and problem solving, develop our conflict-management skills, and strengthen our leadership skills. To be successful necessitates an understanding of group process, participation style, ethical group behavior, and the influences of the medium. *Small Group and Team Communication* explores all these different interconnections and the communication strategies we use in our work and social groups. The authors use the systems perspective as their core approach throughout the text, treating small groups as complex open systems reliant upon communication to achieve success. Many chapters highlight the importance of considering ethics and diversity in relation to a variety of topics. Harris and Sherblom address the growing influence of computer-mediated communication to this discipline. Real-world, applied examples show students that what they're learning aren't simply abstract concepts, but knowledge that will serve them outside the classroom.

Community Organizing and Community Building for Health and Social Equity, 4th Edition Meredith Minkler 2021-12-10 The fourth edition of *Community Organizing and Community Building for Health and Social Equity* provides both classic and recent contributions to the field, with a special accent on how these approaches can contribute to health and social equity. The 23 chapters offer conceptual frameworks, skill- building and case studies in areas like coalition building, organizing by and with women of color, community assessment, and the power of the arts, the Internet, social media, and policy and media advocacy in such work. The use of participatory evaluation and strategies and tips on fundraising for community organizing also are presented, as are the ethical challenges that can arise in this work, and helpful tools for anticipating and addressing them. Also included are study questions for use in the classroom. Many of the book's contributors are leaders in their academic fields, from public health and social work, to community psychology and urban and regional planning, and to social and political science. One author was the 44th president of the

United States, himself a former community organizer in Chicago, who reflects on his earlier vocation and its importance. Other contributors are inspiring community leaders whose work on-the-ground and in partnership with us “outsiders” highlights both the power of collaboration, and the cultural humility and other skills required to do it well. Throughout this book, and particularly in the case studies and examples shared, the role of context is critical, and never far from view. Included here most recently are the horrific and continuing toll of the COVID-19 pandemic, and a long overdue, yet still greatly circumscribed, “national reckoning with systemic racism,” in the aftermath of the brutal police killing of yet another unarmed Black person, and then another and another, seemingly without end. In many chapters, the authors highlight different facets of the Black Lives Matter movement that took on new life across the country and the world in response to these atrocities. In other chapters, the existential threat of climate change and grave threats to democracy also are underscored. Growing People Through Small Groups David Stark 2004-07-01 This fresh look at small groups starts with people and principles rather than program and structure. Stark and Wieland examine why many small-group ministries fall short of their goals, and they offer strategies that start with God's leading and people's needs. Straightforward, informative, and practical, this new organic system works for smaller churches as well as larger ones. Useful for lay leaders, small-group members, and pastors who want people to thrive and develop their spiritual gifts.

Small Groups with Purpose Steve Gladen 2011-06-01 Over the past fifteen years, small groups have become a vital way to build community in large churches. Nowhere has this been more apparent than at Saddleback Church. Now Steve Gladen, pastor of small groups at Saddleback, shares the secrets of that ministry's incredible success in creating small groups with purpose. This practical book walks church leaders through the questions they need to answer to develop their own intentional small group strategy. Built around the most commonly asked questions, *Small Groups with Purpose* outlines the step-by-step process of creating a successful small group ministry. Because it is built upon principles and not methods, this plan can be implemented in any size church. Each chapter ends with a list of questions for readers to answer to help them assess their current situation and their desires for the future. Personal stories, Scripture, and examples ground the discussion and show the system in action. Pastors and small group leaders will find this book instrumental in making small groups work in their churches.

Being Together David Stark 1998-04-01 The *People Together* Series provides a strong foundation for beginning, developing, and sustaining a small group ministry that fits the unique mix of your church. In addition to the overarching vision for small groups, there are guides that help develop specific kinds of small groups. Especially for relational groups -- men's, women's, and recreational activities groups.

Developing Effective International Education Experiences: Preparing Pre-Service Teachers for the Classroom Sara Tours 2023-04-18 Globally, and within the United States, we continue to progress toward a more diverse and inclusive culture. This fact is perhaps reflected nowhere better than in the public school system in the United States, where, by 2029 (NCES, 2020), non-white students will outnumber white students in classrooms. The challenges that the current system of education confronts in ensuring equitable access and equal achievement are also well-documented (Darling-Hammond, 2015). A key component in the re-shaping and development of a more equitable and inclusive system are the pre-service teachers enrolled in our college and university teacher preparation programs across the country. As we prepare for the diverse classrooms of the future, we need to prepare the teachers of the future to not only be able to teach all students but to also have the cultural competencies to ensure the same access and opportunities are provided to all students. It has been well documented (Cunningham, 2015; Lupi & Turner, 2013) that international education experiences, or international field experiences, have a positive effect on both the professional development and cultural competencies of pre-service teachers. Across a wide range of performance outcomes, pre-service teachers with international field experiences are better equipped to enter the field (DeVillar & Jiang, 2012) and may even persist longer in the profession (Egeland, 2016). However, not all international experiences provide the same positive outcomes. In this book, we will explore the importance of developing culturally competent educators in the United States education system, the research that supports the benefits of international education experiences, and how to develop effective international education experiences that will prepare pre-service teachers for the classrooms of the next decade and beyond.

Let the Church Meet in Your House! Emerson T. Manaloto 2019-10-31 The communities in which we live all suffer alienation from God and the sin, social disorder and brokenness that follows. As Christians, we yearn to see our communities saturated with the good news of Jesus Christ, but there are countless obstacles to overcome in our churches and mission agencies as we seek to fulfil this vision. In this book, Emerson Manaloto offers the model of New Testament-based house churches as the vehicle for gospel ministry in communities around the world with specific applications for the Filipino context. Examining four areas - leaders, learners, lessons, and locations - Dr Manaloto presents foundational principles of the New Testament that can be the basis for our own contemporary churches and ministry. Manaloto critically analyzes the house church in terms of its concepts in the first century, its context in the Greco-Roman world and its practices as outlined in the New Testament. This analysis is then used to draw conclusions for how twenty-first century small groups in the Philippines can be stable, mature, and multiply, resulting in the birth of more churches locally and globally, and the transformation of lives and communities as they encounter Jesus Christ.

Small Group Outreach Jeffrey Arnold 1998-01-01 Jeffrey Arnold, in this book on the dynamics of small group spirituality, argues that healthy small groups must grow outward in their commitment to those outside the group in evangelism, prayer, and missions.

From ACT UP to the WTO Benjamin Shepard 2020-05-05 In March 1987 a radical coalition of queer activists converged on Wall Street ... their target, 'Business, Big Business, Business as Usual!!!' It was ACT UP's first demonstration. In November 1999 a radical coalition of environmental, labor, anarchist, queer, and human rights activists converged in Seattle-their target was similar, a system of global capitalism. Between 1987 and 1999 a new project in activism had emerged unshackled from past ghosts. Through innovative use of civil rights' era non-violent disobedience, guerrilla theatre, and sophisticated media work, ACT UP has helped transform the world of activism. This anthology offers a history of ACT UP for a new generation of activists and students. It is divided into five sections which address the new social movements, the use of street theater to reclaim public space, queer and sexual politics, new media/electronic civil disobedience, and race and community building. Contributions range across a diverse spectrum: The Northwest Bronx Community and Clergy Coalition, Jubilee 2000, Students for an Undemocratic Society, Fed Up Queers, Gender Identity Center of Colorado, Triangle Foundation, Jacks of Color, National Coalition for Sexual Freedom, Lower East Side Collective, Community Labor Coalition, Church of Stop-Shopping, Indy Media Collective, Black Radical Congress, The Theater of the Oppressed Laboratory, Adelante Street Theater; HealthGAP, Housing Works, SexPanic! and, of course, ACT UP itself.

The Handbook of Communication Ethics George Cheney 2011-01-18 The *Handbook of Communication Ethics* serves as a comprehensive guide to the study of communication and ethics. It brings together analyses and applications based on recognized ethical theories as well as those outside the traditional domain of ethics but which engage important questions of power, equality, and justice. The work herein encourages readers to make important connections between matters of social justice and ethical theory. This volume makes an unparalleled contribution to the literature of communication studies, through consolidating knowledge about the multiple relationships between communication and ethics; by systematically treating areas of application; and by introducing explicit and implicit examinations of communication ethics to one another. The *Handbook* takes an international approach, analyzing diverse cultural contexts and comparative assessments. The chapters in this volume cover a wide range of theoretical perspectives on communication and ethics, including feminist, postmodern and postcolonial; engage with communication contexts such as interpersonal and small group communication, journalism, new media, visual communication, public relations, and marketing; and explore contemporary issues such as democracy, religion, secularism, the environment, trade, law, and economics. The chapters also consider the dialectical

tensions between theory and practice; academic and popular discourses; universalism and particularism; the global and the local; and rationality and emotion. An invaluable resource for scholars in communication and related disciplines, the Handbook also serves as a main point of reference in graduate and upper-division undergraduate courses in communication and ethics. It stands as an exceptionally comprehensive resource for the study of communication and ethics.

Unlocking Your Parish Ron Huntley 2019-01-09 Can Catholic parishes become communities of missionary disciples that bear lasting fruit? If so, what does it take to move them in that direction? Through his years as pastor of Saint Benedict Parish in Halifax, Canada, Fr. James Mallon discovered that the answer to the first question was a resounding yes! Open Friendship in a Closed Society Peter Slade 2009-10-09 Peter Slade examines Mission Mississippi's model of racial reconciliation (which stresses one-on-one, individual friendships among religious people of different races) and considers whether it can effectively address the issue of social justice. Slade argues that Mission Mississippi's goal of "changing Mississippi one relationship at a time" is both a pragmatic strategy and a theological statement of hope for social and economic change in Mississippi.

A New New Deal Amy B. Dean 2011-05-15 In *A New New Deal*, the labor movement leaders Amy B. Dean and David B. Reynolds offer a bold new plan to revitalize American labor activism and build a sense of common purpose between labor and community organizations. Dean and Reynolds demonstrate how alliances organized at the regional level are the most effective tool to build a voice for working people in the workplace, community, and halls of government. The authors draw on their own successes to offer in-depth, contemporary case studies of effective labor-community coalitions. They also outline a concrete strategy for building power at the regional level. This pioneering model presents the regional building blocks for national change. A diverse audience—both within the labor movement and among its allies—will welcome this clear, detailed, and inspiring presentation of regional power-building tactics, which include deep coalition-building, leadership development, policy research, and aggressive political action. *A New New Deal* explores successful coalitions forged in Los Angeles, Boston, Denver, San Jose, New Haven, and Atlanta toward goals such as universal health insurance for children and sensible redevelopment efforts that benefit workers as well as businesses. The authors view partnerships between labor and grassroots organizations as a mutually beneficial strategy based on shared goals, resulting in a broadened membership base and increased organizational capacity. They make the innovative argument that the labor movement can steward both industry and community and make manifest the ways in which workplace battles are not the parochial concerns of isolated workers, but a fundamental struggle for America's future. Drawing on historical parallels, the authors illustrate how long-term collaborations between labor and community organizations are sowing the seeds of a new New Deal.

Way To Grow Ronald J. Lavin 1996 Nothing is more important for ministry today than small groups. (George Gallop Jr., a Christian who conducts polls on political and religious matters, quoted in chapter 1 of this book.) Lavin is quick to point out that this book is not merely about numerical growth. It is about nurturing spiritual growth, which in itself is a dynamic that leads to growth in numbers. Use this publication as a workbook. The chapters each end with fascinating questions for consideration and group discussion. Dr. Lavin offers five different kinds of group structures for discipleship development. Each is fully explored, offering the reader or study participant the opportunity to determine which style best fits their group. He also lists five essentials that must be present for any group to function effectively. Lavin has had over 35 years of experience in the ministry, during which time he has refined the methods that are most successful in leading people to commitment and discipleship. This book is filled with fascinating anecdotes and stories that have grown out of his experience with congregations where impressive growth has taken place. Dr. Ronald J. Lavin is Senior Pastor of King of Glory Lutheran Church, Fountain Valley, California. He previously served congregations in Indiana, Iowa, and Arizona. In each church where he served as pastor the membership doubled. He graduated cum laude from Carthage College, Northwestern Theological School of Theology, and engaged in graduate studies at the Lutheran School of Theology, Chicago. Lavin has published twelve books and numerous magazine articles. He has been in demand as a speaker and seminar leader at schools and churches throughout the country as well as in several foreign countries.

Organizing Your Youth Ministry Paul Borthwick 2004-03-01 We need to get organized around here! That is the common cry of youth workers who feel burdened by so much to do in so little time, so many responsibilities and so few results, so much criticism--it seems--so little support. Paul Borthwick agrees that getting organized is essential for effective your ministry, and he has written an essential book to help those of you in youth ministry organize three different areas of your lives: Personal: How do your personal goals and your need for personal growth fit with your youth ministry? If you're married, are your spouse and children helped or hurt by your involvement with kids? Are your other responsibilities suffering? As Borthwick says, Good ministry is the result of a balanced personal life. Ó Professional: Do you see yourself as a youth professional? Is your interaction with pastor and church board characterized by mutual respect? It's the youth worker who will help other people see youth ministry as a profession and not just a fun-and-games operation. Ó Practical: Is your budget balanced? Do you frequently begin activities feeling only half-prepared? Do your volunteers and coworkers know what is expected of them? Better planning and time management can create programs, lessons, and activities that help people grow, learn, and love each other. Ó Part I of 'Organizing Your Youth Ministry' examines the need to the youth minister to organize his or her personal life as well as ministry, setting priorities, and the special challenges of church youth ministry. Part II addresses the philosophical foundations of youth ministry organization: Why do we do what we do? What is it young people really need? How do you work with a team? Where do parents fit in? Part III discusses how to organize the daily, weekly, monthly, and yearly administrative demands of the youth ministry, from budgets to retreats, from activities to Sunday school lessons, from choir to missions projects, from discipleship programs to the special needs of junior-high students. Part IV helps us to evaluate our goals and to measure the effectiveness of our youth ministry -- always keeping in mind that, as Borthwick says, the ultimate purpose isn't just to produce better programs or a more efficient discipleship system Ó but to present each person complete in

ChristÓ (Col. 1:28 NASB). So if you, like every other youth worker, have too much to do, too little time to do it in, and sometimes don't know where to begin, 'Organizing Your Youth Ministry' can help. Give it a try -- and you'll find out why Paul Borthwick says that organization can be a ministry in itself.

Cross-cultural Strategies for Improving the Teaching, Training, and Mentoring Skills of Military Transition Team Advisors Andi O'Connor 2009 Military doctrine currently provides guidance on various methods to train host-nation security forces (FM3-24); yet U.S. advisors typically have little training in teaching methods, particularly in a cross-cultural environment. This report presents a conceptual framework that identifies individual advisor and counterpart differences, as well as the situational and cultural factors that impact the success and failure of training, coaching, or mentoring. The report includes a comprehensive literature review and data from iterative interviews with host nationals, military transition team members, cross-cultural education experts, and educators and trainers from the United States, Afghanistan, Iraq, and the Horn of Africa. It also includes recommendations that outline innovative methods for training military advisors to more effectively teach and coach their counterparts in a cross-cultural setting. To provide effective advising to host nationals, advisors need expertise in two areas: (1) cross-cultural competencies related to teaching and learning, and (2) cross-cultural teaching strategies. Key cross-cultural competencies pertinent to the military advisor are identified and include understanding the cross-cultural teaching/advising relationship, culturally relevant curriculum and methods, cross-cultural communication, and effective cross-cultural assessment. The report also includes a discussion of structural barriers to effective advising, and recommendations for developing a cross-cultural teaching and training curriculum for Soldiers.

Shared Leadership in Higher Education Elizabeth M. Holcombe 2023-07-03 Today's higher education challenges necessitate new forms of leadership. A volatile financial environment and the need for new business models and partnerships to address the impact of new technologies, changing demographics, and emerging societal needs, demand more effective and innovative forms of leadership. This book focusses on a leadership approach that has emerged as particularly effective for organizations facing complex challenges: shared leadership. Rather than concentrating power and authority in an individual leader at the top of an organization, shared leadership involves multiple people influencing one another across varying levels and at different times. It is a flexible, collective, and non-hierarchical approach to leadership. Organizations that have implemented shared leadership have been better able to learn, innovate, perform, and adapt to the types of external challenges that campuses now face and that will continue to shape higher education in the future. This book brings together the two foremost scholars of higher education who have studied, described and evaluated the impact of shared leadership, a university chancellor with prior experience of facilitating systemic institutional change at two university systems, and the former president of three universities where she coordinated processes that led to the transformational changes needed renew institutional mission and purpose. Opening with four chapters that define the nature of shared leadership, describe its key characteristics, and how to build institutional capacity, the book then presents ten institutional cases. Ranging from institution-wide initiatives at four year colleges and a community college, to examples of managing change in a college, a center, and across STEM departments, the contributing authors describe the context and drivers of the need for change, the building of shared vision to create coalitions, lessons learned, and outcomes. Intended as a resource for leaders at the highest levels such as Presidents and Provosts as well as mid-level leaders such as deans, directors, and department chairs, the book is also addressed to faculty and staff who are interested in collaborating with campus leaders on institutional decision-making or creating new change initiatives. It is intended to build capacity for shared leadership across institutions and for use in leadership courses and programs.

Community Organizing and Community Building for Health and Welfare Meredith Minkler 2012-07-16 The third edition of Community Organizing and Community Building for Health and Welfare provides new and more established ways to approach community building and organizing, from collaborating with communities on assessment and issue selection to using the power of coalition building, media advocacy, and social media to enhance the effectiveness of such work. With a strong emphasis on cultural relevance and humility, this collection offers a wealth of case studies in areas ranging from childhood obesity to immigrant worker rights to health care reform. A "tool kit" of appendixes includes guidelines for assessing coalition effectiveness, exercises for critical reflection on our own power and privilege, and training tools such as "policy bingo." From former organizer and now President Barack Obama to academics and professionals in the fields of public health, social work, urban planning, and community psychology, the book offers a comprehensive vision and on-the-ground examples of the many ways community building and organizing can help us address some of the most intractable health and social problems of our times. Dr. Minkler's course syllabus: Although Dr. Minkler has changed the order of some chapters in the syllabus to accommodate guest speakers and help students prep for the midterm assignment she uses, she arranged the actual book layout in a way that should flow quite naturally if instructors wish to use it in the order in which chapters appear.

Making Sense of the Organization, Volume 2 Karl E. Weick 2012-01-12 Making Sense of the Organization elaborates on the influential idea that organizations are interpretation systems that scan, interpret, and learn. These selected essays represent a new approach to the way managers learn and act in response to their environment and the way organizational change evolves. Readers of this volume will find a wealth of examples and insights which go well beyond thinking and cognition to explain action. The author's ideas are at the forefront of our thinking on leadership, teams, and the management of change. "This book engages the puzzle of impermanence in organizing. Through rich examples, evocative language, artful literature citing, and imaginative connecting, Weick re-introduces core ideas and themes around attending, interpreting, acting and learning to unlock new insights about impermanent organizing. The wisdom in this book is timeless and timely. It prods scholars and managers of organizations to complicate their views of organizing in ways that enrich thought and action." - Jane E. Dutton, Robert L. Kahn Distinguished University Professor, University of Michigan

Intelligent Governance Paquet Gilles 2022-06-30 Striking the right fit between resources, processes, and outcomes in complex environments, where different groups have something to contribute towards joint outcomes, even though they partake in joint operations in the pursuit of their own objectives This is what intelligent governance is all about. It is the practical application of an evolving worldview that is a less conflictive, more intelligent, more cooperative and a wiser mode of human coordination. This short book proposes some guideposts for intelligent governance. It does not put forward a rigid blueprint or a recipe that could mechanically and blindly be followed, but a prototype for a process of inquiry seeking to help organizations find a way forward (through innovation and value adding), some general indications about the most toxic pitfalls likely to materialize mental prisons, lack of mindfulness, etc. and comments about the most promising opportunities or initiatives likely to nudge the coordinating inquiries into successful directions.
