Dual Relationships in Counseling Barbara Herlihy 1992-01-01 Issues involving dual relationships in counseling are discussed in this monograph. Dual relationships occur when counselors have another, significantly different, relationship with one of their clients, students, or supervisees. This monograph is intended to be a resource that reflects the current thinking of the counseling profession and that represents the diversity of opinion that exists. The book is organized in four parts: Part I contains two chapters that provide a general introduction and overview of dual

relationships. In chapter 1 the issues and areas of concern are defined. In chapter 2 the focus is on sexual dual relationships. The considerable body of existing literature is reviewed and discussed and questions are raised about some "gray areas." The remainder of the monograph focuses primarily on non-sexual dual relationships. In part II (containing chapters 3, 4, and 5) issues in the preparation and supervision of counselor trainees are examined. Part III (containing chapters 6-11) focuses on how dual relationships affect practitioners in various settings and aspects of their work. Issues that confront counselors in private practice, college personnel workers, school counselors, rehabilitation counselors, group counselors, and consultants are discussed. In the single chapter of part IV (chapter 12) key themes are identified, questions are asked to encourage integration and reflection, and a decision-making model is presented. It is noted that dual relationships, especially nonsexual dual relationships, will in all probability continue to be discussed and debated well into the 1990s. (ABL)

Dual Relationships in Counselling & Psychotherapy Gabrielle Syme 2003-08-07 ` This thought-provoking book should be required reading for all trainers, practitioners and supervisors. It examines the complex issues that arise when the clinician enters into a relationship with the client beyond the psychotherapeutic boundaries' - Healthcare Counselling and Psychotherapy Journal A recent development in the profession is a consideration of the appropriate use of touch. This is looked at in some detail in this book with useful guidelines of the issues to be considered in deciding whether to touch a client or not. The issue of dual relationships with clients, trainees and supervisees affects most counsellors or psychotherapists at some point in their careers. Many practitioners are unclear about such boundary issues and how, when and if it is appropriate to enter into a dual relationship, whether as a friend, business partner or sexual partner. These relationships are seldom neutral and can have a powerful beneficial or detrimental impact on the person seeking help. Dual Relationships in Counselling & Psychotherapy examines the circumstances in which such relationships arise and provides guidelines on how to ethically manage, avoid or even to develop dual relationships. It also clearly defines the limits beyond which practitioners must not go. The

There are taboos against erotic touch in psychotherapy, for excellent reasons, but what about nonerotic touch? These latter forms of physical contact are not explicitly taboo and they can be powerful forms of communication. Research and clinical experience indicate that they can contribute to positive therapeutic change when used appropriately. What, then, is appropriate use?

Psychotherapy Relationships That Work John C. Norcross 2019 First published in 2002, the landmark *Psychotherapy Relationships That Work* broke new ground by focusing renewed and corrective attention on the substantial research behind the crucial (but often overlooked) client-therapist relationship. All chapters provide original meta-analyses, clinical examples, landmark studies, diversity considerations, training implications, and most importantly, research-infused therapeutic practices by distinguished contributors. Featuring expanded coverage and an enhanced practice focus, the third edition of the seminal *Psychotherapy Relationships That Work* offers a compelling synthesis of the best available research, clinical expertise, and patient characteristics in the tradition of evidence-based practice.

Boundary Issues and Dual Relationships in the Human Services Frederic G. Reamer

2020-11-24 Should a therapist disclose personal information to a client, accept a client's gift, or provide a former client with a job? Is it appropriate to exchange e-mail or text messages with clients or correspond with them on social networking websites? Some acts, such as initiating a sexual relationship with a client, are clearly prohibited, yet what about more subtle interactions, such as hugging or accepting invitations to a social event? Is maintaining a friendship with a former client or a client's relative a conflict of interest? Frederic G. Reamer offers a frank analysis of a range of boundary issues that human-service practitioners may confront. He confronts the ethics of intimate relationships with clients and former clients, the healthy parameters of practitioners' self-disclosure, the giving and receiving of gifts and favors, and the unavoidable and unanticipated circumstances of social encounters and geographical proximity. With case studies addressing challenges in the mental health field, school contexts, child welfare, addiction programs, home health care, elder services, and prison, rural, and military settings, Reamer offers effective, practical risk-management models

Ethics complaints on dual relationship and boundary crossing continue to rise both in nature and variety. This paper examined and shed light on the complexities of dual relationship and boundary crossing in clinical psychology and explain the pertinent moral and clinical worries that clinical psychologist's face daily in their practice. The paper analysed three underlying themes: 1) using an empirical review of relevant literature to identify clinician's attitudes toward risky and useful dual relationship and boundary crossing, 2) learn whether involving in dual relationships, negatively or positively influences therapeutic outcome, 3) using the decision making model to address the concept, challenges and variances associated with dual relationship in clinical psychology. Lastly, the paper comes up with strategies that help psychologists to make flawless ethical standards and offer moral guidance. Finally, study shows that, though, dual relationships sometimes enhanced therapy, aids the treatment strategy, and promotes the clinician-client working
