**Sextus Empiricus** - Richard Bett 2012-07-26

Sextus Empiricus' *Against the Physicists* examines numerous topics central to ancient Greek inquiries into the nature of the physical world, covering subjects such as god, cause and effect, whole and part, bodies, place, motion, time, number, coming into being and perishing and is the most extensive surviving treatment of these topics by an ancient Greek sceptic. Sextus scrutinizes the theories of non-sceptical thinkers and generates suspension of judgement through the assembly of equally powerful opposing arguments. Richard Bett's edition provides crucial background information about the text and elucidation of difficult passages. His accurate and readable translation is

supported by substantial interpretative aids, including a glossary and a list of parallel passages relating *Against the Physicists* to other works by Sextus. This is an indispensable edition for advanced students and scholars studying this important work by an influential philosopher.

**Ancient Scepticism** - Harald Thorsrud 2014-12-05  
Scepticism, a philosophical tradition that casts doubt on our ability to gain knowledge of the world and suggests suspending judgement in the face of uncertainty, has been influential since its beginnings in ancient Greece. Harald Thorsrud provides an engaging, rigorous introduction to the arguments, central themes and general concerns of ancient Scepticism, from its beginnings with Pyrrho

of Elis (c.360-c.270 BCE) to the writings of Sextus Empiricus in the second century CE.

Thorsrud explores the differences among Sceptics and examines in particular the separation of the Scepticism of Pyrrho from its later form - Academic Scepticism - which arose when its ideas were introduced into Plato's "Academy" in the third century BCE. He also unravels the prolonged controversy that developed between Academic Scepticism and Stoicism, the prevailing dogmatism of the day. Steering an even course through the many differences of scholarly opinion surrounding Scepticism, Thorsrud provides a balanced appraisal of its enduring significance by showing why it remains so philosophically interesting and how ancient interpretations differ from modern ones.

### **Sextus Empiricus: Against the Logicians** - Sextus

(Empiricus) 2005-12-22

A new and accurate translation of an important work of ancient Greek scepticism.

### Five Modes of Scepticism -

Stefan Sienkiewicz 2019-03-28

Five Modes of Scepticism examines the argument forms that lie at the heart of Pyrrhonian scepticism as expressed in the writings of Sextus Empiricus. These are the Agrippan modes of disagreement, hypothesis, infinite regression, reciprocity and relativity; modes which are supposed to bring about that quintessentially sceptical mental state of suspended judgement. Stefan Sienkiewicz analyses how the modes are supposed to do this, both individually and collectively, and from two perspectives. On the one hand there is the perspective of the sceptic's dogmatic opponent and on the other there is the perspective of the sceptic himself.

Epistemically speaking, the dogmatist and the sceptic are two different creatures with two different viewpoints. The book elucidates the corresponding differences in the argumentative structure of the modes depending on which of these perspectives is

adopted. Previous treatments of the modes have interpreted them from a dogmatic perspective; one of the tasks of the present work is to reorient the way in which scholars have traditionally engaged with the modes. Sienkiewicz advocates moving away from the perspective of the sceptic's opponent - the dogmatist - towards the perspective of the sceptic and trying to make sense of how the sceptic can come to suspend judgement on the basis of the Agrippan modes.

Introduction to the Human Sciences - Wilhelm Dilthey 1988

For some two centuries, scholars have wrestled with questions regarding the nature and logic of history as a discipline and, more broadly, with the entire complex of the "human sciences," which include theology, philosophy, history, literature, the fine arts, and languages. The fundamental issue is whether the human sciences are a special class of studies with a specifically distinct object and

method or whether they must be subsumed under the natural sciences. German philosopher Wilhelm Dilthey dedicated the bulk of his long career to these and related questions. His *Introduction to the Human Sciences* is a pioneering effort to elaborate a general theory of the human sciences, especially history, and to distinguish these sciences radically from the field of natural sciences. Though the *Introduction* was never completed, it remains one of the major statements of the topic. Together with other works by Dilthey, it has had a substantial influence on the recognition and human sciences as a fundamental division of human knowledge and on their separation from the natural sciences in origin, nature, and method. As a contribution to the issue of the methodologies of the humanities and social sciences, the *Introduction* rightly claims a place. This is the first time the entire work is available in English. In his introductory essay, translator Ramon J. Betanzos surveys Dilthey's life

and thought and hails his efforts to create a foundational science for the particular human sciences, and at the same time, takes serious issue with Dilthey's historical/critical evaluation of metaphysics.

**The Incorporeal** - Elizabeth Grosz 2017-03-14

Philosophy has inherited a powerful impulse to embrace either dualism or a reductive monism—either a radical separation of mind and body or the reduction of mind to body. But from its origins in the writings of the Stoics, the first thoroughgoing materialists, another view has acknowledged that no forms of materialism can be completely self-inclusive—space, time, the void, and sense are the incorporeal conditions of all that is corporeal or material. In *The Incorporeal* Elizabeth Grosz argues that the ideal is inherent in the material and the material in the ideal, and, by tracing its development over time, she makes the case that this same idea reasserts itself in different intellectual contexts. Grosz shows that not

only are idealism and materialism inextricably linked but that this "belonging together" of the entirety of ideality and the entirety of materiality is not mediated or created by human consciousness. Instead, it is an ontological condition for the development of human consciousness. Grosz draws from Spinoza's material and ideal concept of substance, Nietzsche's amor fati, Deleuze and Guattari's plane of immanence, Simondon's preindividual, and Raymond Ruyer's self-survey or autoaffection to show that the world preexists the evolution of the human and that its material and incorporeal forces are the conditions for all forms of life, human and nonhuman alike. A masterwork by an eminent theoretician, *The Incorporeal* offers profound new insight into the mind-body problem

**Hellenistic Philosophy** - John Sellars 2018-07-04

The Hellenistic period was a rich and exciting time for philosophy. It saw the birth of two new schools of thought,

Epicureanism and Stoicism, and important developments in Plato's Academy. Aristotelians and Cynics were also active during the period, all of which created a vibrant philosophical landscape. Many of the ideas now associated with early modern and enlightenment philosophy - such as empiricism, materialism, and religious scepticism - were widely discussed by Hellenistic philosophers. In *Hellenistic Philosophy*, Sellars offers a thematic introduction to the philosophy of this era. The author highlights the very practical outlook common of the time, in which philosophy was seen as a guide for life, and summarizes the key debates on a series of topics, ranging from epistemology to political philosophy. The works of Hellenistic philosophers had a vital influence on later thought, and especially on the development of early modern philosophy. In providing an accessible outline of this important era, the book is of particular use to students and general readers interested in

the period. It is also an invaluable resource for teaching with its guide to Hellenistic philosophers, chronology, and extensive cross-references to standard collections of ancient texts.

*Ethics 101* - Brian Boone  
2017-11-07

"Ethics 101 offers an exciting look into the history of moral principles that dictate human behavior. This easy-to-read guide presents the key concepts of ethics in fun, straightforward lessons and exercises featuring only the most important facts, theories, and ideas. Ethics 101 includes unique, accessible elements such as explanations of the major moral philosophies, including utilitarianism, deontology, virtue ethics, and eastern philosophers including Avicenna, Buddha, and Confucius; and unique profiles of the greatest characters in moral philosophy"--

**Reason And Religious Faith** - Terence Penelhum 2019-07-11  
The concerns of philosophy and of religion overlap to a considerable extent—each

seeks, among other things, to develop an account of mankind's place in the universe. But their relationship has never been an easy one. Faith gives rise to philosophical puzzlement just as secular beliefs do, but it also generates special philosophical questions that secular beliefs do not. This engaging text encourages students and other readers to grapple with these special questions of faith, to look at how they relate to other issues in philosophy and in the empirical study of religion. Equally accurate and insightful in its treatment of historical authors such as Aquinas and Pascal as it is in treatment of such contemporaries as Plantinga and Alston, *Reason and Religious Faith* is the most up-to-date and balanced introduction to these issues available. It marks an advance over earlier surveys in its recognition of religious pluralism and the relevance of non-Christian religious views. It is an ideal introduction to the issues of religious epistemology for students of

both religious studies and philosophy.

**Routledge Companion to Ancient Philosophy -** Frisbee Sheffield 2013-12-04

The Routledge Companion to Ancient Philosophy is a collection of new essays on the philosophy and philosophers of the ancient Greek and Roman worlds. Written by a cast of international scholars, it covers the full range of ancient philosophy from the sixth century BC to the sixth century

AD and beyond. There are dedicated discussions of the major areas of the philosophy of Plato and Aristotle together with accounts of their predecessors and successors. The contributors also address various problems of interpretation and method, highlighting the particular demands and interest of working with ancient philosophical texts. All original texts discussed are translated into English.

Epistemological Disjunctivism -

Duncan Pritchard 2012-09-06  
Duncan Pritchard offers an account of perceptual knowledge, arguing that it is paradigmatically constituted by true belief that enjoys rational support which is reflectively accessible to the agent. This resolves the issue between internalism and externalism, and poses a radical challenge to contemporary epistemology.

**Pyrrhonism in Ancient, Modern, and Contemporary Philosophy** - Diego E.

Machuca 2011-07-17  
This is the first collection of original essays entirely devoted

to a detailed study of the Pyrrhonian tradition. The twelve contributions collected in the present volume combine to offer a historical and systematic analysis of the form of skepticism known as "Pyrrhonism". They discuss whether the Pyrrhonist is an ethically engaged agent, whether he can claim to search for truth, and other thorny questions concerning ancient Pyrrhonism; explore its influence on certain modern thinkers such as Pierre Bayle and David Hume; and examine Pyrrhonian skepticism in relation to contemporary analytic philosophy.

**Epistemology** - Nicholas Rescher 2012-02-01

A comprehensive introduction to the theory of knowledge.

**The Limits of Doubt** - Petr Lom 2001-07-19

Shows how different forms of skepticism can lead to remarkably different moral and political implications.

Epistemology - Stephen Everson 1990-02-22

A broad range of epistemological views, from the

extreme relativism of Protagoras to the skepticism of the Pyrrhonists, is explored in critical essays that span sixth century B.C. to the second and third centuries A.D.

Theoria, Praxis, and the Contemplative Life after Plato and Aristotle - Thomas

Bénatouïl 2012-04-19

This volume deals with the appropriations, criticism and transformation of Plato's and Aristotle's positions about theory, practice and the contemplative life, including their epistemological and metaphysical foundations, from Theophrastus to the end of Antiquity (including Jewish and Christian authors).

Some Phases in the Development of the Subjective Point of View During the Post-Aristotelian Period - Dagny

Gunhilda Sunne 1911

Sextus Empiricus: Outlines of Scepticism - Sextus Empiricus 2000-07-20

Outlines of Scepticism, by the Greek philosopher Sextus Empiricus, is a work of major importance for the history of

Greek philosophy. It is the fullest extant account of ancient scepticism, and it is also one of our most copious sources of information about the other Hellenistic philosophies. Its first part contains an elaborate exposition of the Pyrrhonian variety of scepticism; its second and third parts are critical and destructive, arguing against 'dogmatism' in logic, epistemology, science and ethics - an approach that revolutionized the study of philosophy when Sextus' works were rediscovered and published in the sixteenth century. This volume presents the accurate and readable translation which was first published in 1994, together with a substantial new historical and philosophical introduction by Jonathan Barnes.

**Epistemology: Contemporary Readings** -

Michael Huemer 2006-03-10

This comprehensive anthology draws together classic and contemporary readings by leading philosophers on

epistemology. Ideal for any philosophy student, it will prove essential reading for epistemology courses, and is designed to complement Robert Audi's textbook *Epistemology: A Contemporary Introduction* (Routledge, 1998). Themes covered include, perception, memory, inductive inference, reason and the a priori, the architecture of knowledge, skepticism, the analysis of knowledge,

testimony. Each section begins with an introductory essay, guiding students into the topic. Includes articles by: Russell, Hume, Berkeley, Malcolm, Quine, Carnap, J.L. Austin, Pollock, Nozick, Putnam, G.E. Moore, Huemer, Reid, Plato, Bonjour, Coady, Carroll, Fumerton, Edwards, Foster, Howson, Urbach, Stove, Empiricus, Oakley, Alston, Gettier, Clark, Goldman, Lehrer, Paxson, DeRose, Dretske, Klein and Chisholm
