Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Titi Lucreti Cari De Rerum Natura Libri Sex - H. A. J. Munro 2019-09-13

Published in Cambridge in 1864, H. A. J. Munro's two-volume critical edition of the Roman poet Lucretius' *De Rerum Natura* ('On the Nature of the Universe'), represents one of the finest contributions to classical scholarship of the nineteenth century. Lucretius' didactic poem, written in hexameters, is divided into six books and explains Epicurean cosmology. Munro's edition was conceived in response to that of the German philologist Karl Lachmann, who had published an edition of Lucretius in 1850. Munro began working on Lucretius in 1849 at which time he collated a range of manuscripts from European libraries. His first edition of the poem appeared in 1860. This revised edition followed in 1864 complete with an introduction, translation, and commentary. The first volume contains all six books of Lucretius' poem in Latin with an English translation.

T. Lucreti Cari, De Rerum Natura Libri Sex (Classic Reprint) - Francis W. Kelsey 2015-07-26
Excerpt from *T. Lucreti Cari, De Rerum Natura Libri Sex* Most students, and general readers as well, prefer a text in either prose or poetry free from all marks not needful for purposes of reference. Any one interested in the critical study of Lucretius will of course make use of Munro's edition and Lachmann's masterly work. The Introduction was prepared with the design of offering some suggestions regarding Lucretius' personality, his mission in philosophy, and his rank as a poet. It is much compressed. The Notes have likewise been condensed; but even as they stand they may in places seem too full. For it has been the editor's aim not simply to explain the more difficult word-forms and constructions, but also to bring out the philosophic import of the passages annotated in the light of both ancient and modern thought. Most classical writings have an interest for us mainly because of the general human element in them, because they crystallize in artistic form something that appeals to thinking men of all times and of all nations. But Lucretius stands in close relation with the life of the present. His work is not lacking in the power and finish that mark the true poet, - one the duration of whose fame is to be measured not by decades, but by centuries.
