their child-even their well-educated, well-grounded, Christian child-could be having consensual sex before graduating middle school. Promise rings, parental contracts and disease warnings provide but meager defense against a culture overrun with weapons of mass seduction. While many factors contributing to the misguided messages received by children stand outside the realm of parental control-music videos, film, fashion-others, like the meaning of true love, can, and should be fostered at home. Eric and Leslie Ludy, authors of the bestselling *When God Writes Your Love Story*, present the shocking, unvarnished realities of today's sexual climate but they balance the bitter pill with a large dose of hopeful, practical advice for parents.

healthy attitudes toward sexuality and prepare their children and themselves for sexual topics that will arise in later years. While there are many books on sexual health written for parents of teens and young adults, there are very few written for parents of young children. But the early years are crucial to sexual health, and what parents do and say is of the utmost importance. This book, written for parents or other primary caregivers who are raising a child under the age of six, shows how to provide essential information about sexuality, bodies, and behavior in age-appropriate but thorough and accurate language. It helps parents prepare for conversations that might make them uncomfortable by supplying not only the necessary information but also specific phrases and words they can use when speaking to their young children, while also helping parents process their own anxieties around sex. A parent is their child's best sex ed teacher. By providing reliable, straightforward information about sexuality, parents can establish open, honest relationships with their children, help protect them from harm, and set them up for healthy, fulfilling, and pleasurable sex lives and relationships as adults.

**Pedophilia, Hebephilia and Sexual Offending against Children** Klaus M. Beier 2021-03-08 This book provides extensive information on pedophilia (sexual interest in the prepubescent body age), hebephilia (sexual interest in the early-pubescent body age) and sexual offenses against children, i.e., the various forms of child sexual abuse, including the use of child sexual abuse images, along with the current state of knowledge concerning offender groups. The book makes it clear that pedophilia or hebephilia do not inevitably lead to offenses against children – that there are those who keep their desires in their fantasies and do not act them out on the behavioral level. The World Health Organization classifies pedophilia as a mental disorder. It can be safely assumed that many pedophile men in a given community live their lives, unrecognized and adamant about hiding their sexual drives from society and from themselves, and who are genuinely motivated not to act upon their sexual fantasies. The numbers of exactly this particular group of pedophilically inclined non-offenders can be increased by preventive therapeutic measures. For this purpose, two treatment programs have been developed at the Institute of Sexology and Sexual Medicine at the Charité-Universitätsmedizin Berlin (University Clinic) since the initiation of the Prevention Project Dunkelfeld in 2005 – First, the project involving adult participants (Berlin Dissexuality Therapy: BEDIT) and later, another for adolescents (BEDIT-A), who find themselves attracted to children. Both program manuals are completely integrated into this work, which reflects 15 years of assessment and treatment experience.

**What's Love Got to Do With It** Dr. John Chirban 2012-06-04 Having trouble talking to your kids about sex? Their friends at school don't... Unfortunately, for many parents, the most important conversations are the hardest. Ninety-three percent of adults are dissatisfied with the sex education they received as children, which is precisely why they are so bad at teaching their kids—they have no frame of reference. Renowned Harvard Medical School psychologist and frequent Dr. Phil guest John Chirban helps parents talk to their kids . . . about sex. Kids are going to learn about sex, and it is up to parents to decide if their kids are going to learn from them or from MTV. How parents address sex—their openness, the context, and their attitudes—will impact how their children view their own sexuality and self worth. Dr. Chirban helps parents know when, how, and how much. He uses humor, compassion, and real-life examples to prepare parents for a healthy and ongoing conversation that will equip their kids to own their own sexuality and an understanding of the larger issues of relationships, love, commitment, and intimacy. In addition, parents understand how helping their children understand these veiled yet critical keys of a fulfilling life deepens their own connection with their children.
