Disease Control Priorities, Third Edition (Volume 6) - King K. Holmes  
2017-11-06

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

*Colonization and Domestic Service* - Victoria K. Haskins 2014-12-05

This groundbreaking book brings together two key themes that have not

been addressed together previously in any sustained way: domestic service and colonization. Colonization offers a rich and exciting new paradigm for analyzing the phenomenon of domestic labor by non-family workers, paid and otherwise. Colonization is used here in its broadest sense, to refer to the expropriation and exploitation of land and resources by one group over another, and encompassing imperial/extraction and settler modes of colonization, internal colonization, and present-day neo-colonialism. Contributors from diverse fields and disciplines share new and stimulating insights on the various connections between domestic employment and the processes of colonization, both past and present, in a range of original essays dealing with Indonesian, Canadian Aboriginal, Australian Aboriginal, Pacific Islander, African, Jamaican, Indian, Chinese, Anglo-Indian, Sri Lankan, and 'white' domestic servants.

Protection of Sexual Minorities since Stonewall - Phil C.W. Chan  
2013-09-13

The Stonewall Riot in New York in 1969 marked the birth of the sexual minority rights movement worldwide. In the subsequent four decades, equality and related rights on grounds of sexual orientation and gender identity have been enshrined in many African, Asian, Australasian, European and North American countries, thanks to better informed

discourses of the natures of sexual orientation, gender identity, equality and rights that systematic scientific and socio-legal research has generated. Discrimination, harassment and persecution on grounds of a person's sexual orientation or gender identity, however, continue to pervade the laws and social norms in all developed and developing countries. In tribute to the courage of those who participated in the Stonewall Riot, this book examines the progress and stalemate in various countries on five continents, as well as in the development of international law, concerning the rights of persons belonging to sexual minorities. This book covers issues including homophobic bullying and gay-straight alliances in schools; the merits and problems that legislation prohibiting hate speech on grounds of sexual orientation presents; criminal justice systems in relation to male rape victims and to criminalisation of HIV exposure and transmission; the development of sexual minority rights, from historical and socio-legal perspectives, in Hong Kong, Japan, Singapore, and Zimbabwe; the lives of transgender persons in Asian countries; the evolution, operation and impact of international and domestic refugee laws on sexual orientation and gender identity as grounds for refugee status and asylum; and the conflicts between law, religion and sexual minority equality rights that inhere in the same-sex marriage debate in Ireland. This book was previously published as a special double issue of *The International Journal of Human Rights*.

**Clinical Gynecology** - Eric J. Bieber 2015-04-23

Written with the busy practice in mind, this book delivers clinically focused, evidence-based gynecology guidance in a quick-reference format. It explores etiology, screening, tests, diagnosis, and treatment for a full range of gynecologic health issues. The coverage includes the full range of gynecologic malignancies, reproductive endocrinology and infertility, infectious diseases, urogynecologic problems, gynecologic concerns in children and adolescents, and surgical interventions including minimally invasive surgical procedures. Information is easy to find and absorb owing to the extensive use of full-color diagrams, algorithms, and illustrations. The new edition has been expanded to

include aspects of gynecology important in international and resource-poor settings.

**Sexually Transmitted Diseases** - Lawrence R. Stanberry 2000-01-12

There are 12 million new cases of sexually transmitted diseases every year. This growing world-wide problem has captured the concern of medical professionals, behavioural scientists, and public health officials. *Sexually Transmitted Diseases: Vaccines, Prevention and Control* provides a comprehensive assessment of the global epidemiology of sexually transmitted diseases plus current data on various strategies for controlling the epidemic, with particular focus on vaccines. The editors and authors represent the leading authorities in the field and provide international and multi-disciplinary expertise. This book is essential reading for all researchers and clinicians working in infectious diseases, virology, microbiology, immunology and vaccine development. This work will also be of key interest to medical students, physicians and workers in pharmaceutical and biotechnology companies and public and world health organisations. Key Features \* Comprehensive coverage of epidemiology, physiology and immunology \* General preventive strategies such as behavioural modification, barrier methods and topical

microbicides \* Individual chapters on Herpes Simplex Virus, Papillomavirus, Hepatitis B, HIV, Syphilis, Gonorrhoea, Cytomegalovirus and Chlamydia \* Pathogenesis, microbiology and clinical manifestations of each STD \* Current advances in vaccine development \* Foreword by Julius Schachter, President of the American STD Association
