Genders and Sexualities in Indonesian Cinema Ben Murtagh 2013-09-23 Indonesia has a long and rich tradition of homosexual and transgender cultures, and the past 40 years in particular has seen an increased visibility of sexual minorities in the country, which has been reflected through film and popular culture. This book examines how representations of gay, lesbian and transgender individuals and communities have developed in Indonesian cinema during this period. The book first explores Indonesian engagement with waria (male-to-female transgender) identities and the emerging representation of gay and lesbi Indonesians during Suharto's New Order regime (1966-98), before going on to the reimagining of these positions following the fall of the New Order, a period which saw the rebirth of the film industry with a new generation of directors, producers and actors. Using original interview research and focus groups with gay, lesbi and waria identified Indonesians, alongside the films themselves and a wealth of archival sources, the book contrasts the ways in which transgendered lives are actually lived with their representations on screen.

Geometric Algebra Applications Vol. I Eduardo Bayro-Corrochano 2018-06-20 The goal of the Volume I Geometric Algebra for Computer Vision, Graphics and Neural Computing is to present a unified mathematical treatment of diverse problems in the general domain of artificial intelligence and associated fields using Clifford, or geometric, algebra. Geometric algebra provides a rich and general mathematical framework for Geometric Cybernetics in order to develop solutions, concepts and computer algorithms without losing geometric insight of the problem in question. Current mathematical subjects can be treated in an unified manner without abandoning the mathematical system of geometric algebra for instance: multilinear algebra, projective and affine geometry, calculus on manifolds, Riemann geometry, the representation of Lie algebras and Lie groups using bivector algebras and conformal geometry. By treating a wide spectrum of problems in a common language, this Volume I offers both new insights and new solutions that should be useful to scientists, and engineers working in different areas related with the development and building of intelligent machines. Each chapter is written in accessible terms accompanied by numerous examples, figures and a complementary appendix on Clifford algebras, all to clarify the theory and the crucial aspects of the application of geometric algebra to problems in graphics engineering, image processing, pattern recognition, computer vision, machine learning, neural computing and cognitive systems.

Sex and Sexuality Glyn Hudson-Allez 2005-06-24 This book bridges the gap between the counsellor and the specialist sex therapist, by providing answers to questions raised by patients or clients about sex, gender and sexuality. It covers physiological information about genitalia, variations on sexuality, the differences between men and women in genital sexual arousal and sexual dysfunctions, an understanding of developmental sexuality and information as to whether the sex discussed is normal or pathological. By having a clearer understanding of usual sexual practices, counsellors can be readily equipped to reassure their clients, or refer to an appropriate person for specialist referral. Topics covered include physiological difficulties like erectile problems, ejaculatory difficulties, vaginismus and dyspareunia, and loss of sexual desire; gender problems including cross-dressing, transsexualism and intersex; and psychological problems include sexual addiction, fetishism and unusual sexual practices. These are discussed in the context of individual clients and in couple dynamics, and provide a comprehensive reference for the non-specialist mental health professional.

Handbook of Sexuality-Related Measures Clive M. Davis 1998 Fundamental to understanding human sexual expression is reliable and valid measurement and assessment. Many instruments have been developed to measure a myriad of sexuality-related states, traits, behaviors, and outcomes. Few are easily accessible and the information is limited concerning appropriate use and psychometric properties. In *Handbook of Sexuality-Related Measures*, more than 200 instruments are reproduced, accompanied by the necessary information for their use in research, as well as educational and

clinical settings. Measures relating to more than 50 topics are included. Examples are abortion, aging, arousal, general and specific attitudes and behavior, contraception, dysfunctions, education, experience, gender identity, homosexuality, ideology, jealousy, knowledge, masturbation, orgasm, rape, and sexually transmitted diseases. Each chapter describes the development and appropriate use of each instrument, giving information on timing, scoring, and interpretation. Reliability and validity data are summarized and completely referenced. Nearly all articles include the entire instrument; others provide illustrative content from the instrument and give all necessary information to obtain the instrument.

The American Popular Novel After World War II David Willbern 2013-03-22 Through the perspectives of selected best-selling novels from the end of World War II to the end of the 20th century--including *The Catcher in the Rye*, *To Kill a Mockingbird*, *The Godfather*, *Jaws*, *Beloved*, *The Silence of the Lambs*, and *Jurassic Park*--this book examines the crucial issues the U.S. was experiencing during those decades. These novels represent the voices of popular conversations, as Americans considered issues of family, class, racism and sexism, feminism, economic ambition, sexual violence, war, law, religion and science. Through the windows of fiction, the book surveys the Cold War and anti-communism, the prefeminist era of the 1950s and the sexual revolution of the 1970s, forms of corporate power in the 1960s and 1980s, the traumatic legacies of slavery and Vietnam, the American fascination with lawyers, cops and criminals, alternate styles of romance in the era of late capitalism, our abiding distrust of science, and our steadfast wonder about the Great Mysteries.

Maxi's Choice Phyllis H. Moore 2008-02 I began teaching 35 years ago, but this is not a book about how wonderful schools are. Nor is it a book complementing education about a job well done. KIDS never seem to rise to the level of expectations of the caretakers of our schools. Unless they're the students who completely comply and excel, it seems some little part of their make up, too often repulses the people who are supposed to have compassion and understanding for their weaknesses and psychological frailties. Education has a knack for suffocating creativity, establishing unrealistically high expectations, repressing exciting, expressive adolescent personalities, and perpetuating a system that is dull and disconnected from the potentials of technology. Instead of paving the way for student success, it creates unnecessary and complicated roadblocks that constantly keep students and parents off balance and confused. Teachers and administrators led by the "Theory Heads" in state and federal government positions have established success in college as the gold standard. Everyone is judged as a person according to whether they meet that narrow standard of success. There within the problem lies. The common thread that runs deep throughout this system is the fact that most of the people making the rules are well-educated, were great students, wouldn't recognize a disability or a "child at risk" if they slapped them in the face and yet they are the people who pave the runways by which we all fly. They equate high GPA's with effective teaching and effective learners. They want to perpetuate the system in their own likeness and they have. Students in the top 25% of their class will always succeed. However, a group I call the "Muddled Middle" gets the leftovers, and little respect. It is those misunderstood, lost and timid souls, along with their families for which I write this book.

Sun, Sex, and Gold Kamala Kempadoo 1999-10-27 With tourism accounting for approximately thirty percent of the Caribbean's GDP and twenty-four percent of employment, a link between the sex trade and the tourism industry has gained recent attention. Shifts in global production, an increase of disposable income for pleasure and recreation, and a desire by North Americans and Europeans for an experience of 'exotic' cultures, are often claimed to be the cause. This volume explores the connections between the global economy and sex work, focusing on the experiences and views of women, men, and children who sell sex. Apart from attention to sex tourism in Cuba, the Dominican Republic, Barbados, and Jamaica, the book also examines sex work in the gold mining industry in the hinterlands of Suriname and Guyana, and in the entertainment sector in Belize and the Dutch

On behalf of the organizing committee of the 13 International Conference on Biomedical Engineering, I extend our warmest welcome to you. This series of conference began in 1983 and is jointly organized by the YLL School of Medicine and Faculty of Engineering of the National University of Singapore and the Biomedical Engineering Society (Singapore). First of all, I want to thank Mr Lim Chuan Poh, Chairman A*STAR who kindly agreed to be our Guest of Honour to give the Opening Address amidst his busy schedule. I am delighted to report that the 13 ICBME has more than 600 participants from 40 countries. We have received very high quality papers and inevitably we had to turn down some papers. We have invited very prominent speakers and each one is an authority in their field of expertise. I am grateful to each one of them for setting aside their valuable time to participate in this conference. For the first time, the Biomedical Engineering Society (USA) will be sponsoring two symposia, ie "Drug Delivery Systems" and "Systems Biology and Computational Bioengineering". I am thankful to Prof Tom Skalak for his leadership in this initiative. I would also like to acknowledge the contribution of Prof Takami Yamaguchi for organizing the NUS-Tohoku's Global COE workshop within this conference. Thanks also to Prof Fritz Bodem for organizing the symposium, "Space Flight Bioengineering". This year's conference proceedings will be published by Springer as an IFMBE Proceedings Series.

Sex, Power, Conflict : Evolutionary and Feminist Perspectives Ann Arbor David M. Buss Professor of Psychology University of Michigan 1996-03-21 Sexual harassment in the workplace, date rape, and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes. Concurrently, the scientific community is conducting research in topics of sex and gender issues. Indeed, more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences. Despite this attention, it is clear that these issues are being addressed from two essentially different perspectives: one is labeled "feminist", while the other, viewed as antithetical to the feminist movement, is called "evolutionary psychology", which emphasizes the history of reproductive strategies in understanding conflict between the sexes. This book brings together leading experts from both sides of the debate in order to discover how each could offer insights lacking in the other. The editors' overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences, then provide an integration and synthesis. In fact, several of the contributors to this unique volume consider themselves advocates of both approaches. As a stimulating presentation of the dynamics of sex, power, and conflict--and a pioneering rapprochement of the diverse tendencies within the scientific community-- this book will attract a wide audience in both psychology and women's studies fields.

Sex Slaves and Discourse Masters Doctor Jo Doezema 2013-07-18 Why is the international community so concerned with the fate of prostitutes abroad? And why does the story of trafficking sound so familiar? In this pioneering new book, Jo Doezema argues that the current concern with trafficking in women is a modern manifestation of the myth of white slavery. Combining historical analysis with contemporary investigation, this book sheds light on the current preoccupations with trafficking in women. It examines in detail sex worker reactions to the myth of trafficking, questions the current feminist preoccupation with the 'suffering female body' and argues that feminism needs to move towards the creation of new myths. The analysis in this book is controversial but crucial, an alternative to the current panic discourses around trafficking in women. An essential read for anyone who is concerned with the increased movement of women internationally and the attempts of international and national governments to regulate this flow.
