The Last Lecture Randy Pausch 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. "We cannot change the cards we are dealt, just how we play the hand." —Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—"Really Achieving Your Childhood Dreams"—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have . . . and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

They Were Her Property Stephanie E. Jones-Rogers 2020-01-07 Winner of the Los Angeles Times Book Prize in History A bold and searing investigation into the role of white women in the American slave economy "Compelling."—Renee Graham, Boston Globe "Stunning."—Rebecca Onion, Slate "Makes a vital contribution to our understanding of our past and present."—Parul Sehgal, New York Times Bridging women's history, the history of the South, and African American history, this book makes a bold argument about the role of white women in American slavery. Historian Stephanie E. Jones-Rogers draws on a variety of sources to show that slave-owning women were sophisticated economic actors who directly engaged in and benefited from the South's slave market. Because women typically inherited more slaves than land, enslaved people were often their primary source of wealth. Not only did white women often refuse to cede ownership of their slaves to their husbands, they employed management techniques that were as effective and brutal as those used by slave-owning men. White women actively participated in the slave market, profited from it, and used it for economic and social empowerment. By examining the economically entangled lives of enslaved people and slave-owning women, Jones-Rogers presents a narrative that forces us to rethink the economics and social conventions of slaveholding America.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

What Women Want When They Test Men Bruce Bryans 2015-08-13 Discover What Women Want in a Man and How They Secretly Test You For it If you pay close enough attention to what really attracts women, you'll find that what women want is a man with a backbone. Women want to be with a man who knows how to take the lead and make decisions; one who has strong personal boundaries and knows how to love her like...a man. Unfortunately, a lot of men have difficulty accepting the truth that many women prefer to be with a man who isn't afraid to stand up to them, who challenges them, and who refuses to be pushed around by women (or anything else for that matter). This is especially true of women who seek a more traditional male-female gender role dynamic in their romantic relationships. Even if a man knows how to attract women, cultivating a mind-blowing relationship with one requires a different set of skills entirely. Women want men who can make them feel secure - men with strong boundaries and unwavering commitment. Sadly, most dating and relationship books rarely show men how to keep a woman happy without them having to sacrifice their manhood in the process. How to Understand Women and Pass Their Tests With Unshakeable Confidence Men around the world have no idea that the women they know and love are testing them. These men go about their lives interacting with the opposite sex in absolute darkness, ignorant to the fact that they're being judged, appraised, approved, and rejected based on their subconscious reactions to female testing. If you had no idea that women test men and why they have to, you're about to take a journey onto a road

less traveled - the more mysterious side of female psychology and how women think. Attract Women Through Authenticity and Be the Strong Man a Woman Wants For a Relationship It's important for a man to learn how to walk that thin line between caring, thoughtful lover and firm, assertive leader. Here's what you're going to learn inside: How to be radically honest with a woman and why this makes her MORE attracted to you. The reason why women test men CONSISTENTLY and how to use this knowledge to deepen a woman's desire. (Hint: This is the key to female psychology and how women think.) How to be confident with difficult women. What women want in a man and how to give it to them. How to make a woman happy without becoming a complete doormat of a man. How to seduce your wife and get her in the mood by responding like a MAN whenever she "pokes the bear." How to be firm and say "No" to the woman you love without destroying intimacy. How to keep a woman interested in you by doing the ONE thing MOST men are deathly afraid of doing. How to avoid unnecessary arguments, fights, and drama with a woman by using a simple communication technique. The best way to secretly test a woman's level of romantic interest in you (as well as her emotional maturity) before making a long-term commitment. Survival of the Prettiest Nancy L. Etcoff 2000 SURVIVAL OF THE PRETTIEST is the simple title for a comprehensive book on this complex and contentious subject, from the factual details of what makes a face beautiful to the deepest questions about the nature of beauty itself and its place in the human condition. Its aim is to satisfy everyone's insatiable curiosity about beauty, a subject shrouded in mystique, and to provide answers to basic questions guided by cutting edge scientific knowledge rather than myth. Is there such a thing as universal beauty of the human face or body? The book will also be full of fascinating facts about the nitty-gritty of beauty. Why do men strive for V-shaped torsos? Why do women paint their lips red? SURVIVAL OF THE PRETTIEST will not be a political manifesto, though it will discuss the politics of beauty in depth. It will discuss beauty for what it is: an essential and ineradicable part of human nature - and far from a trivial or shallow matter.

Why Youth is Not Wasted on the Young David F. Bjorklund 2009-02-04 Why Youth is Not Wasted on the Young examines the nature of childhood through an evolutionary lens and argues that childhood is an essential stage of development with its own unique purposes, separate from those of adulthood; a time of growth and discovery that should not be rushed. Written by a renowned developmental psychologist Examines the role that our period of immaturity plays on the social, emotional, and educational needs of today's children Challenges common perceptions of children as simply "adults in training"

Looks Gordon PATZER 2008-01-16 We all know one hard and undeniable truth: Physical beauty comes with tremendous power, and tremendous benefits. Those who possess it are generally luckier in love, more likely to be popular, and more apt to get better grades in school. But very few of us realize just how much looks affect every aspect of our lives. Recent studies document that people blessed with good looks earn about 10% more than their average-looking colleagues. They are also more likely to get hired and promoted at work. What exactly is this "physical attractiveness" phenomenon and how does it affect each and every one of us? Dr. Gordon L. Patzer has devoted the last 30 years to investigating this unsettling phenomenon for both women and men, and how it touches every part of our lives. In Looks, he reveals not only its impact on romance, but also on family dynamics, performance in school, career, courtroom proceedings, politics and government. Looks is the first book to explore how the power of beauty affects both sexes and how the rise of reality TV shows, cosmetic surgery, and celebrity culture have contributed to our culture's overall obsession with being beautiful. Unflinching and topical, Looks uncovers the sometimes ugly truth about beauty and its profound effects on all of our lives.

Neurobiology of Chemical Communication Carla Mucignat-Caretta 2014-02-14 Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

The End of Men Hanna Rosin 2012-10-11 What Betty Friedan, Simone de Beauvoir, Susan Faludi and Naomi Wolf did for feminism, senior editor of The Atlantic Hanna Rosin does for a new generation of women: an explosive new argument for why women are winning the battle of the sexes and why men are no longer top dog. Women are no longer catching up with men. By almost every measure, they are out-performing them. We are at an unprecedented moment in history. In 2010, for the first time, the balance of the British workforce tipped towards women, who now hold around half of the nation's jobs. In the US, meanwhile, for every two men that receive a BA, three women will achieve the same. Not only do women now dominate colleges and professional schools on every continent except Africa, young single women in the US now earn more than their male counterparts, and more than a third of mothers in the UK and the US are their family's main breadwinner. The tides have turned. The 'age of testosterone' is decisively over. At almost every level of society women are proving themselves far more adaptable and suited to a job market that rewards people skills and intelligence, and a world that has a dramatically diminishing need for traditional male muscle. In this landmark, once-in-a-generation book, Hanna Rosin reveals how this new world order came to be and its profound implications for marriage, sex, children, work, families and society. Unhampered by old assumptions and ideologies and drawing on examples from across the globe, The End of Men helps us see how both men and women can - and must - adapt for a radically new era. 'In this bold and inspired dispatch, Rosin upends the common platitudes of contemporary sexual politics with a deeply reported meditation from the unexpected frontiers of our rapidly changing culture' Katie Roiphe, author of The Morning After and Uncommon Arrangements 'The End of Men describes a new paradigm that can, finally, take us beyond 'winners' and 'losers' in an endless 'gender war.' What a relief! Ultimately, Rosin's vision is both hope-filled and creative, allowing both sexes to become far more authentic: as workers, partners, parents...and people' Peggy Orenstein, author of Cinderella Ate My Daughter and Schoolgirls Hanna Rosin is a senior editor at The Atlantic magazine and a founder and co-editor of DoubleX, Slate's women's section. She has written for the New Yorker, The New York Times, GQ, and The New Republic, and for a number of years covered politics and religion for the Washington Post. In 2009 she was nominated for a National Magazine Award, and in 2010 she won one. She is the author of a previous book, God's Harvard: A Christian College on a Mission to Save America. Rosin lives in Washington, DC, with her husband, Slate editor David Plotz, and their three children.

The 48 Laws of Power Robert Greene 2000-09-01 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or

defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine 2016-12-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Models Mark Manson 2017-09-11 "You can become irresistibly attractive to women without changing who you are." So says Mark Manson, superstar blogger and author of the international bestseller, *The Subtle Art of Not Giving A F*ck*, a self help book that packs a punch. Mark brings the same approach to teaching men what they need to know about attracting women. In *Models* he shows us how much it sucks trying to attract women using the tricks and tactics recommended by other books. Instead, he says, men need to focus on seduction as an emotional process not a physical or social one. What matters is the intention, the motivation, the authenticity. To improve your dating life you must improve your emotional life - how you feel about yourself and how you express yourself to others. Funny, irreverent and confronting, *Models* is a mature and honest guide on how a man can attract women by giving up the bullsh*t and becoming an honest broker. "A detailed guide to modern sexual ethics" *Sydney Morning Herald* "There's nothing subtle about Mark Manson. He's crude and vulgar and doesn't give a f*ck . . . He's as painfully honest as he is outrageously funny" *Huffington Post*

The Female Brain Louann Brizendine 2009-05-04 Accessible, fun and compelling, and based on more than three decades of research, The Female Brain will help women to better understand themselves - and the men in their lives. In this groundbreaking book, Dr Louann Brizendine describes the uniquely flexible structure of the female brain and its constant, dynamic state of change - the key difference that separates it from that of the male - and reveals how women think, what they value, how they communicate, and whom they'll love. She also reveals the neurological explanations behind why... - A woman remembers fights that a man insists never happened... - Thoughts about sex enter a woman's brain perhaps once every couple of days, but may enter a man's brain up to once every minute... - A woman's brain goes on high alert during pregnancy - and stays that way long after giving birth... - A woman over 50 is more likely to initiate divorce than a man... - Women tend to know what people are feeling, while men can't spot an emotion unless someone cries or threatens them with bodily harm!

Educating the Student Body Institute of Medicine 2013-11-30 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

And they said, "No." The company said that it wasn't dangerous, that we didn't need to be afraid.' As the First World War spread across the world, young American women flocked to work in factories, painting clocks, watches and military dials with a special luminous substance made from radium. It was a fun job, lucrative and glamorous - the girls shone brightly in the dark, covered head to toe in dust from the paint. However, as the years passed, the women began to suffer from mysterious and crippling illnesses. It turned out that the very thing that had made them feel alive - their work - was slowly killing them: the radium paint was poisonous. Their employers denied all responsibility, but these courageous women - in the face of unimaginable suffering - refused to accept their fate quietly, and instead became determined to fight for justice. Drawing on previously unpublished diaries, letters and interviews, *The Radium Girls* is an intimate narrative of an unforgettable true story. It is the powerful tale of a group of ordinary women from the Roaring Twenties, who themselves learned how to roar. Further praise for *The Radium Girls* 'The importance of the brave and blighted dial-painters cannot be overstated.' Sunday Times 'A perfect blend of the historical, the scientific and the personal.' *Bustle* 'Thrilling and carefully crafted.' Mail on Sunday?
