Journeys through Emerging Adulthood - Alan Reifman 2022-07-29

Journeys through Emerging Adulthood takes the reader on a tour of contemporary transitions to adulthood, reporting on the latest cross-national and cross-cultural research into young adulthood and separating fact from fiction about this important life phase. Alan Reifman shows how today's youth are taking more time to enter traditional adult roles, and explores the benefits and disadvantages of this gradual emergence into adulthood. This essential textbook navigates the research that reveals the substantial variety in young people's paths to adulthood. It covers the spectrum of the young adult experience, examining the influence that parents have on their grown children's progress and identity as adults, and considering the impact of traditional milestones such as higher education, establishing a career, forming romantic relationships and becoming a parent. It examines key topics including mental health in emerging adults and the likelihood of substance abuse, and how young adults might reach out into the community through volunteerism, religious involvement and political activism. Each section includes examples and studies conducted in a range of countries, exploring how the journey to adulthood can vary according to cultural context as well as individual circumstance. The book affirms that while there is great variety in how one transitions to adulthood, there is no correct path, and most people fare well - or even thrive - in adulthood. Featuring end-of-chapter summaries, quizzes and activities, Journeys Through Emerging Adulthood provides an accessible yet comprehensive overview of this

significant life stage, connecting fundamental psychological theories with modern social phenomena. Reifman's text is essential reading for both undergraduate and graduate students of psychology, human development and sociology, as well as students and researchers of any discipline interested in the path to adulthood.

Sexual Fluidity - Lisa M. Diamond 2008

Calls for new categories in sexual identity for women based on research that concludes that they tend to be attracted to the individual rather than gender and their sexuality fluctuates more than men, which stays fixed once established.

Lesbian Health 101 - Suzanne L. Dibble 2010

This is the first comprehensive textbook on lesbian health, reflecting the exponential increase in research on lesbian health over the past 10 years. I highly recommend this textbook to all clinicians and students who provide health care for women, and to inquisitive patients. --Susan Love, MD, President of the Susan Love Breast Cancer Foundation This book presents new and little-known, current and well-researched material that is essential to combat myths and misinformation about lesbian health. The intended audience is literally starved for this book. Health care providers and lesbian health care advocates may be aware of some of the information in this book, but none of us have the comprehensive understanding and knowledge base that this book provides. It should be available in every curriculum where health care disparities are addressed, and where LGBT health is taught. --Peggy Chinn, PhD, RN, FAAN, Professor Emerita, University of Connecticut Each time a lesbian thinks about weight, retirement, children, a hospital

stay, filling out a form, or any other health related activity, she has to insist on a paradigm shift to simply be recognized. This book will push that shift along a little faster and give lesbians the leverage we need to live healthily in this century. --Jewelle Gomez, Author and activist This book presents new and little-known, current and well-researched material that is essential to combat myths and misinformation about lesbian health. Her Neighbor's Wife - Lauren Jae Gutterman 2019-11-01

At first glance, Barbara Kalish fit the stereotype of a 1950s wife and mother. Married at eighteen, Barbara lived with her husband and two daughters in a California suburb, where she was president of the Parent-Teacher Association. At a PTA training conference in San Francisco,

Barbara met Pearl, another PTA president who also had two children and happened to live only a few blocks away from her. To Barbara, Pearl was "the most gorgeous woman in the world," and the two began an affair that lasted over a decade. Through interviews, diaries, memoirs, and letters, Her Neighbor's Wife traces the stories of hundreds of women, like Barbara Kalish, who struggled to balance marriage and same-sex desire in the postwar United States. In doing so, Lauren Jae Gutterman draws our attention away from the postwar landscape of urban gay bars and into the homes of married women, who tended to engage in affairs with wives and mothers they met in the context of their daily lives: through work, at church, or in their neighborhoods. In the late 1960s and 1970s, the lesbian feminist movement and the no-fault divorce revolution transformed the lives of wives who desired women. Women could now choose to divorce their husbands in order to lead openly lesbian or bisexual lives; increasingly, however, these women were confronted by hostile state discrimination, typically in legal battles over child custody. Well into the 1980s, many women remained ambivalent about divorce and resistant to labeling themselves as lesbian, therefore complicating a simple interpretation of their lives and relationship choices. By revealing the extent to which marriage has historically permitted space for wives' relationships with other women, Her Neighbor's Wife calls into question the presumed straightness of traditional American marriage.

Working with Lesbian, Gay, Bisexual, and Transgender College Students - Ronni L. Sanlo 1998-05-21

This handbook is intended for faculty and administrators who wish to create a welcoming and safe environment for all lesbian, gay, bisexual and transgender students on our campuses. It will help readers, even those who may struggle personally with understanding non-heterosexual identities, gain a clearer understanding of the important issues facing these students. While some students arrive on campus with full clarity about their sexual identities, others may just be discovering their orientations while in our institutions. It is difficult to provide the attention LGBT students need if we do not understand the crises affecting them or how to address them. Each chapter analyzes specific

issues affecting these students and offers recommendations or suggestions for change. Some of the areas discussed include: identity development theories, residence halls, career planning, health and counseling centers, HIV/AIDS, and student leadership and organizational development. Non-heterosexual faculty and staff may also find this work useful as they attempt to discover themselves in academic and educational literature. Lesbian, gay, bisexual, and transgender students are on our campuses. They are either discovering their orientations while in our institutions or arriving with full clarity about their sexual identities. It is difficult to provide the attention these students need if we do not understand the issues or how to address them. This handbook is a guide to providing services to lesbian, gay, bisexual, and transgender students. It is for all faculty and administrators, especially those who may struggle personally with understanding non-heterosexual identities, who wish to create a safe and welcoming environment for all students. Non-heterosexual faculty and staff may also find this work useful as they attempt to discover themselves in academic and educational literature. Each section presents an area in which questions usually arise. Chapters within the sections dissect specific issues and, where appropriate, offer recommendations for change. Some of those areas include: identity development theories; residence halls; career planning; health and counseling centers; HIV/AIDS; students with disabilities; same-sex dating and domestic violence; athletics; fraternities; student leadership; speakers' bureaus and safe zone programs; commuter schools and church-related institutions; and Internet resources.

Sexual (Dis)Orientation - T. Wilton 2004-07-06

Tamsin Wilton interviewed close to a hundred women in order to understand how we go about constructing a sexual identity as 'lesbian' or 'heterosexual'. How do women experience desire? What are the differences between men and women as sexual partners? How do desire,

pleasure, intimacy, gender and morality become part of women's sense of self? Asking these, and other questions, this study breaks through the stand-off between essentialists and constructionists to propose a fresh re-thinking of the desiring self.

Gay and Lesbian Families - Joan Nordquist 2000

Each bibliography includes a comprehensive list of the theorist's works and critical studies of these works in English. Each bibliography contains approximately 600 to 900 entries. Books, journal articles, essays within edited books (in the manner of Essay and General Literature) and dissertations are included. References are provided from a wide variety of disciplines and bibliographic sources. The primary purpose of each bibliography is to provide access to the widely reprinted primary works in English and the critical literature in a great variety of books and journals. The topical bibliographies include the authoritative works on the subject and are arranged in useful categories. The lively part of the modern/post-modern debate is generally taking place in alternative and left journals -- journals always included in the literature search in the compiling of the bibliographies.

Married Women Who Love Women - Carren Strock 2023-06-29

Originally written in the 1990s, this book remains a key resource for women in heterosexual marriages who discover, or are coming to terms with, their lesbianism or bisexuality. This classic edition includes a new foreword from Ann Northrop—veteran journalist, activist, and co-host of Gay USA—that reflects on the changes in language, intersectionality, and understandings of gender since first publication. Celebrating 25 years since first publication, this book shares the author's personal story, as well as the descriptive experience of others, to provide validation and empowerment to multitudes of women in their search for their true identities. The author gives women ways in which to structure and restructure their lives and their families after they realize their samegender sexuality. Chapters consider questions such as how women make this discovery, reactions from loved ones, and the outcomes for marriages and families. Updated throughout with contemporary understandings of sexuality and gender, as well as updated language,

this book includes a wealth of information, fresh narratives, and stories offering insight into women's experiences across the country. This is an essential read for women and their partners who are discovering their true identity, as well as therapists, helping professionals, and students of women's studies, gender studies, sexuality studies, and LGBTQ+ studies programs.

The Story of Sexual Identity - Phillip L. Hammack 2009-03-06

This book assembles a diverse group of scholars working within a new, pathbreaking paradigm of sexual science, fusing perspectives from history, sociology, and psychology. The contributors are united in their commitment to the idea of "narrative" as central to the study of sexual identity, offering an analytic approach to social science inquiry on sexual identity that restores the voices of sexual subjects. The result is a rich examination of lives in context, with an eye toward multiplicity and meaning across the life course. Central to the chapters in this volume is the significance of history, generation, and narrative in the provision of a workable and meaningful configuration of identity.

Contemporary Perspectives on Lesbian, Gay, and Bisexual Identities - Debra A. Hope 2008-12-11

Debra A. Hope The Nebraska Symposium on Motivation is steeped in history and tradition. Over the years the series editors have striven to maintain the highest standards of academic excellence and to highlight some of the most important trends in psychology. Perusing the chapter

titles in the first 53 volumes shows the shifting emphasis as the science of psychology developed in the latter half of the twentieth century. All of the most important topics are there — drive theory, social learning, the cognitive revolution, developing perspectives on understanding individual differences and the role of culture, and the increasing role of neuroscience. The key figures are there as well — Harry Harlow, Kenneth Spence, Raymond Cattell, George Kelly, Albert Bandura, Carl Rogers, Carroll Izard, Walter Mischel, Sandra Bem, Sandra Spence, Herbert Simon, David Barlow, and many others. In late 2004, I met with a group of interested graduate students, and together we developed a proposal to join this long and proud tradition with a volume on sexual orientation. Our motivation stemmed, in part, from the events around us. The same-sex marriage debate was covered extensively in the media, reflecting a rapid and important discussion about sexual orientation that we were having (and are still having) as a society. Psychology and related fields have much to offer on many of the issues raised in this debate.

And Then I Met this Woman - Barbee J. Cassingham 1999

These stories are about the transforming commitment made by these women to own the authenticity of their feelings for another woman in order to be congruent in all areas of their lives. Their lives included the realities common to all women that are inherent in loving their children, husbands, parents and friends, as well as struggles with unfulfilling marriages, addictions, and seeking meaningful work. And, for the women in this book, their lives were further complicated by their love for a woman and the issues that are intrinsic to the coming out process.

[Current Research on Bisexuality](#) - Ronald C. Fox 2004
