Marx and Digital Machines Mike Healy 2020-10-16 This book explores the fundamental contradiction at the heart of the digital environment: technology offers all manner of promises, yet habitually fails to deliver. This failure often arises from numerous problems: the proficiency of the technology or end-user, policy failure at various levels, or a combination of these. Solutions such as better technology and more effective end-user education are often put into place to solve these failures. Mike Healy argues that such approaches are inherently faulty drawing upon qualitative research informed by Marx's theory of alienation. Using Marx's theory, he considers participants in three distinct settings: the workplace of information and communications technology (ICT) professionals; university scholars researching the ethical and societal implications of our digital environment; and a group of pensioners living in South London, UK, undertaking ICT training. By delving beneath the surface of how digital technologies are created, researched and experienced, this study illustrates the contradictory nature of our digital lives, as they directly arise from the needs of capitalism. The book also places Marx's theory in contrast to the mainstream approaches derived from Seaman and Blauner. In researching and comprehending ICT, this book reaffirms the superior explanatory power of Marx's theory of alienation.

An Anthology of Modern French Poetry (1850-1950) Peter Broome 1976-07-15 This anthology is the companion volume to The Appreciation of Modern French Poetry, the aim of which was to give detailed preliminary help with the problems of poetic appreciation. poetry, from 1850 to 1950. Hugo, the colossus of the nineteenth century, whose work gives new resonance and vitality to imaginative vision, opens the anthology, and Michaux, the most individual and 'modern' of twentieth-century poets in that he bridges the gap between poetry and contemporary science, closes it. Almost all the major poets of the period are included: Nerval, Baudelaire, Mallarmé, Verlaine, Rimbaud and Laforgue from the second half of the nineteenth century; Valéry, Apollinaire, Supervielle and Eluard in the twentieth. The lesser known Cros and Desnos, fresh and spontaneous poets with an immediate appeal, invite a new look at the lyric traditions of french verse and offer an attractive new avenue for study. The choice of poems, dictated above all by their individual poetic value, reflects also the trends of recent criticism and the tastes of present-day readers. The texts are all accompanied by full notes, which not only explain local difficulties of vocabulary, syntax and expression, but lead the reader directly into the heart of the richness of theme, style and interpretation. These will prove of value not only to the student who is grappling with the basics of french verse, or is anxious to give depth to his familiarity, but to the general reader seeking to rekindle his enjoyment of French poetry. In addition, there are introductions to each poet summarizing the essence of his art, useful suggestions for further reading, and groups of discussion topics to stimulate comparative insights and a wider responsiveness.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological.

Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need

not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
