Whaling in Massachusetts -

Gioia Dimock 2017-03-06

The popular novel Moby-Dick first spurred young and old alike to romanticize the whaling industry. Author Herman Melville wrote his story based on the exploits of the Essex whaleship, and he documented his travels aboard the Acushnet, which departed from a Massachusetts whaling port. In the early 1700s,

Massachusetts residents caught whales from the shore before embarking on offshore voyages for several weeks. Later, these trips would extend over many years, bringing home an average of 1,500 barrels of whale oil and thousands of pounds of whalebone in the 1800s. New Bedford and Nantucket were the founding towns for the whaling industry, but little known are the other Massachusetts towns that sent out whalers, built the ships, and outfitted them. Essex, Mattapoisett, and Falmouth

were shipbuilding communities; Fairhaven began as a whaling town but quickly took to outfitting whalers; Gloucester made the yellow slickers that were rubbed with sperm whale oil to waterproof them; and Provincetown and Boston were among the many ports that sent out whaling ships.

The Oxford Handbook of Maritime Archaeology -

Alexis Catsambis 2011-04-01

The Oxford Handbook of Maritime Archaeology is a comprehensive survey of the field as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology. This volume draws on many of the distinct and universal aspects of maritime archaeology, bringing them together under four main themes: the research process, ships and shipwrecks, maritime and nautical culture, and issues of preservation and management. The first section of the book deals with the best practices for locating,

documenting, excavating, and analyzing submerged sites. This methodological foundation is followed by a sample of shipwreck studies from around the world as scholars trace the regional development of ships and seafaring. Chosen to balance the traditional core regions of maritime archaeology with important but lesser-studied areas, it aims at offering an international account of the study of submerged sites. Reflecting the growing number of scholars who study past maritime cultures, but not shipwrecks, the third section of the book addresses various aspects of the maritime landscape and ethnography above and below the water. The final chapters then approach maritime archaeology in a broader context, moving beyond archaeological sites to discuss the archaeological record in general within legal, preservation, and management frameworks. Taken together, these individual and original articles provide a valuable resource that summarizes the

current state of the field of maritime archaeology and offers insight into the future of this established and growing discipline.

[Citizen's Guide to Sources for Marine and Coastal Information in Massachusetts](#) - Madeleine Hall-Arber 1998

Essex - Dawn Robertson 2010
Essex is nestled on the Atlantic coast within beautifully preserved hills, forest, fields, and wetlands--but the serene landscape belies the town's rich history. According to tradition, the first Essex boat was built in an attic around 1660. Eventually, this shipbuilding industry would create a thriving town as it developed into one of the largest producers of fishing schooners in the country. By its incorporation in 1819, Essex was a renowned community of fishing, farming, shipbuilding, and other industries. Over time, Essex became the birthplace of the fried clam, sent a native son to the baseball major leagues, acquired a Paul Revere church

bell, and raised a barn that is now the oldest still in use in America. With a newly gathered collection of vintage images, Essex reveals a microcosm of American culture and growth, telling the story of leading patriots, entrepreneurs, Civil War heroes, and hardworking everyday citizens.

Keepers of Tradition - Maggie Holtzberg 2008
Throughout Massachusetts, artists carry on and revitalize deeply rooted traditions that take many expressive forms--from Native American basketry to Yankee wooden boats, Armenian lace, Chinese seals, Puerto Rican santos, and Irish music and dance. These keepers of tradition are recognized in their communities as outstanding practitioners of craft, music, dance, and sacred arts. Yet much of this work is hidden to

the public at large, remaining essentially unknown beyond the local community in which it flourishes. This beautifully illustrated volume celebrates and shares the work of a wide array of these living artists. Passed down from person to person within both long-settled and new immigrant communities, traditional art involves the shaping of deeply held cultural values into meaningful artistic forms. *Keepers of Tradition* presents material drawn from eight years of intensive field research by folklorists at the Massachusetts Cultural Council--an investigation that has taken researchers into the homes, kitchens, workshops, dance halls, places of worship, parade routes, and festival sites where traditional art is produced, used, valued, and displayed. Featuring more than sixty artists from communities across the state, *Keepers of Tradition* showcases high levels of mastery in diverse media--the uniformity and handiness of a Nantucket Lightship basket, the Native quill work on a

tobacco pouch, the vibrant colors and textures of a Caribbean Carnival costume, the exquisite gestures of Cambodian dance. At the same time, the text describes the deeply personal and cultural context for each piece of work. This volume is published in conjunction with an exhibition of the same name, organized by the Massachusetts Cultural Council and the National Heritage Museum in Lexington, Massachusetts, and on view there from May 2008 through February 2009.

Off the Beaten

Massachusetts - Barbara Radcliffe Rogers 2004-12

Experience the lesser-known joys of the Bay State, from watching a sea of red cranberries harvested from blue bogs, to walking through a stained glass globe, to relaxing at the Bridge of Flowers over the Deerfield River.

Essex Shipbuilding - Courtney Ellis Peckham 2002
For three centuries, shipbuilding flourished in Essex, a small village wrapped around a shallow tidal estuary that flows into Ipswich Bay. From sturdy little Chebacco boats to the tough but graceful fishing schooners that plied the Grand Banks, Essex vessels became known throughout the maritime world as swift and strong fishermen, and Essex shipbuilding became synonymous with

craftsmanship of the highest order. More than four thousand ships slid down the ways destined for ports such as Gloucester, Boston, and New York. By the middle of the twentieth century, however, the industry had vanished and this extraordinary chapter in American maritime history was closed. Essex Shipbuilding recalls an era when dozens of vessels in different stages of construction lined the Essex River and the shipyard gangs worked six days a week, year-round, in any weather. Featuring the photograph collection of Dana A. Story, Essex Shipbuilding illustrates the firms of A.D. Story and Tarr & James, who built the famous racing schooners Mayflower, Columbia, and Gertrude L. Thebaud, and the high-lining fishermen Elsie and Adventure. Essex Shipbuilding also depicts these vessels at sea-fishing, racing, or pursuing more unusual work, from Arctic exploration to naval service in both world wars to rumrunning during Prohibition.
