

Eves Rib Searching For The Biological Roots Of Sex Differences

Life Without Father - David Popenoe 1996
The author of *Disturbing the Nest: Family Change and Decline in Modern Society* reveals how the disintegration of the child-centered, two-parent family, and the weakening commitment of fathers to their children that usually follows, are a central cause of many of America's worst individual and social problems.

Engaging the Doctrine of Marriage -
Matthew Levering 2020-08-12

This book is the next volume in Levering's *Engaging Doctrine* series. The prior volume of the series examined the doctrine of creation. The present volume examines the purpose of

creation: the marriage of God and humans. God created the cosmos for the purpose of the marriage of God and his people--and through his people, the marriage of God and the entire creation. Given that the central meaning or "prime analogate" of marriage is the marriage of God and humankind, the study of human marriage needs to be shaped by this eschatological goal and foregrounded as a dogmatic theme. After a first chapter defending and explaining the biblical witness to the marriage of God and his people, the book explores various themes: marriage as an image of God, original sin as the fall of the primordial

marriage, the cross of Jesus Christ and marital self-sacrificial love, the procreative and unitive ends of marriage, marriage as a sacrament, and marriage's importance for social justice and for the upbuilding of the kingdom of God. Along the way, the book provides an introduction to the key biblical, patristic, medieval, modern, and contemporary thinkers and controversies regarding the doctrine of marriage.

Self-Help in Mental Health - T. Mark Harwood
2009-11-24

Self-help is big business, but alas not a scientific business. The estimated 10 billion—that's with a "b"—spent each year on self-help in the United States is rarely guided by research or monitored by mental health professionals. Instead, marketing and metaphysics triumph. The more outrageous the "miraculous cure" and the "revolutionary secret," the better the sales. Of the 3,000 plus self-help books published each year, only a dozen contain controlled research documenting their effectiveness as stand-alone

self-help. Of the 20,000 plus psychological and relationship web sites available on the Internet, only a couple hundred meet professional standards for accuracy and balance. Most, in fact, sell a commercial product. Pity the layperson, or for that matter, the practitioner, trying to navigate the self-help morass. We are bombarded with thousands of potential resources and contradictory advice. Should we seek wisdom in a self-help book, an online site, a 12-step group, an engaging autobiography, a treatment manual, an inspiring movie, or distance writing? Should we just do it, or just say no? Work toward change or accept what is? Love your inner child or grow out of your Peter Pan? I become confused and discouraged just contemplating the choices.

Peak - K Anders Ericsson 2016-04-01

For the first time in decades of groundbreaking research, the inventor of the 10,000-hour rule explains his techniques for developing mastery of any skill We live in a world full of people with

Downloaded from
legacy.opendemocracy.net on
2022-04-12 by guest

extraordinary abilities. Consider what Roger Federer can do with a tennis ball, or Connor McDavid with a puck. There are chess grandmasters who can play several dozen different games simultaneously--while blindfolded--and a seemingly unending supply of young musical prodigies who would have astonished aficionados a century ago. We are dramatically better at just about everything than we were just a generation ago. We assume, though, that these peak performers are the lucky ones, the ones with a gift. That's only partly true. The fact is we are all lucky. We all have that gift. As Ericsson's whole career has shown, with the proper practice, we are "all" capable of extraordinary feats. On the surface, the techniques that chess players use to develop their skills seem quite different from the methods soccer players use to perfect their games, which in turn seem quite different from how pianists improve their playing. But at a deeper level, they are all variations on a single

fundamental approach to learning, what Ericsson, a world-renowned researcher, has named "deliberate practice": a simple, yet powerful system for enhancing learning. This approach to expertise has the potential to revolutionize how we think about every sort of education and training. We are not limited by an endowment of natural talent. We create our own limits. Whether you want to step up your game at work or on the weekend, or help your kid achieve athletic or academic goals, Ericsson's revolutionary methods will show you how to master almost anything."

The Scent of Eros -

Rape and the Culture of the Courtroom -

Andrew E. Taslitz 1999-06

A study of how rape stereotypes are used by defence lawyers to gain acquittals in the USA. The author also presents reform proposals, consistent with feminist theories of justice, designed to improve both the American

adversary system in general and the way in which the system handles rape cases.

Missing: Half the Story - Kalpana Sharma
2012-12-31

Toilets, trees and gender? Can there be a connection? Is there a gender angle to a business story? Is gender in politics only about how many women get elected to parliament? Is osteoporosis a women's disease? Why do more women die in natural disasters? These are not the questions journalists usually ask when they set out to do their jobs as reporters, sub-editors, photographers or editors. Yet, by not asking, are they missing out on something, perhaps half the story? This is the question this book, edited and written by journalists, for journalists and the lay public interested in media, raises. Through examples from the media, and from their own experience, the contributors explain the concept of gender-sensitive journalism and look at a series of subjects that journalists have to cover - sexual assault, environment, development,

business, politics, health, disasters, conflict - and set out a simple way of integrating a gendered lens into day-to-day journalism. Written in a non-academic, accessible style, this book is possibly the first of its kind in India - one that attempts to inject a gender perspective into journalism.

The Beast Within - Neil Boyd 2000

What causes male violence ... and how can we stop it? A sure-to-be-controversial, challenging, and provocative study suggests that biology plays a definitive role in engendering murder, rape, torture, and other vicious acts. To understand brutality, start with the animal world, where males use aggression to ensure the survival of the species and their primacy within the group. Uncover testosterone's powerful effects, and the connection between the number of teenage boys in the population and patterns of violence. Environmental factor do have an effect too, influencing a person's ability to handle anger. Most important of all, because biology is not destiny, here is the key to reducing lethal aggression, as well as ways to manage the root of this evil.

Gender and the Science of Difference - Jill A.

Downloaded from
legacy.opendemocracy.net on
2022-04-12 by guest

Fisher 2011-06-15

How does contemporary science contribute to our understanding about what it means to be women or men? What are the social implications of scientific claims about differences between "male" and "female" brains, hormones, and genes? How does culture influence scientific and medical research and its findings about human sexuality, especially so-called normal and deviant desires and behaviors? Gender and the Science of Difference examines how contemporary science shapes and is shaped by gender ideals and images. Prior scholarship has illustrated how past cultures of science were infused with patriarchal norms and values that influenced the kinds of research that was conducted and the interpretation of findings about differences between men and women. This interdisciplinary volume presents empirical inquiries into today's science, including examples of gendered scientific inquiry and medical interventions and research. It analyzes

how scientific and medical knowledge produces gender norms through an emphasis on sex differences, and includes both U.S. and non-U.S. cases and examples.

Macro Socio-economics: From Theory to Activism - David Sciulli 2016-09-16

Contributors to this volume respond to the normative capsule framing economic behaviour that Amitai Etzioni has explored. The text also looks at his works on organisations, public policy, socio-economics and communitarianism.

Sports Science Handbook: A-H - Simon P. R. Jenkins 2005

A valuable reference source for professionals and academics in this field, this is an encyclopedia-dictionary of the many scientific and technical terms now encountered in kinesiology and exercise science.

[Transgender Rights](#) - Paisley Currah 2006

"Transgender Rights packs a surprising amount of information into a small space. Offering spare, tightly executed essays, this slim volume

nonetheless succeeds in creating a spectacular, well-researched compendium of the transgender movement." -Law Library Journal Over the past three decades, the transgender movement has gained visibility and achieved significant victories. Discrimination has been prohibited in several states, dozens of municipalities, and more than two hundred private companies, while hate crime laws in eight states have been amended to include gender identity. Yet prejudice and violence against transgender people remain all too common. With analysis from legal and policy experts, activists and advocates, Transgender Rights assesses the movement's achievements, challenges, and opportunities for future action. Examining crucial topics like family law, employment policies, public health, economics, and grassroots organizing, this groundbreaking book is an indispensable resource in the fight for the freedom and equality of those who cross gender boundaries. Moving beyond media

representations to grapple with the real lives and issues of transgender people, Transgender Rights will launch a new moment for human rights activism in America. Contributors: Kylar W. Broadus, Judith Butler, Mauro Cabral, Dallas Denny, Taylor Flynn, Phyllis Randolph Frye, Julie A. Greenberg, Morgan Holmes, Bennett H. Klein, Jennifer L. Levi, Ruthann Robson, Nohemy Solórzano-Thompson, Dean Spade, Kendall Thomas, Paula Viturro, Willy Wilkinson. Paisley Currah is associate professor of political science at Brooklyn College, executive director of the Center for Lesbian and Gay Studies at the CUNY Graduate Center, and a founding board member of the Transgender Law and Policy Institute. Richard M. Juang cochairs the advisory board of the National Center for Transgender Equality (NCTE) in Washington, DC. He has taught at Oberlin College and Susquehanna University. He is the lead editor of NCTE's Responding to Hate Crimes: A Community Resource Manual and coeditor of Transgender Justice, which explores

models of activism. Shannon Price Minter is legal director of the National Center for Lesbian Rights and a founding board member of the Transgender Law and Policy Institute.

War Over the Family - David Popenoe

2017-09-29

One of the most surprising and controversial social debates of the past two decades has been about the meaning and importance of marriage and the family in contemporary American life. Referred to by some as a culture "war over the family," the debate has pitted those concerned about the weakening of the traditional married-parent nuclear family, especially in its impact on children, against those arguing that nothing has gone wrong with families--that they are merely "diversifying." David Popenoe has been one of the most influential figures in laying out for a wide audience the importance of "family decline," and what it means for our children, our society, and our future.

Looking Queer - Dawn Atkins 2012-10-12

Looking Queer: Body Image in Lesbian, Bisexual, Gay, and Transgender Communities contains research, firsthand accounts, poetry, theory, and journalistic essays that address and outline the special needs of sexual minorities when dealing with eating disorders and appearance obsession. Looking Queer will give members of these communities hope, insight, and information into body image issues, helping you to accept and to love your body. In addition, scholars, health care professionals, and body image activists will not only learn about queer experiences and identity and how they affect individuals, but will also understand how some of the issues involved affect society as a whole. Dismantling the myth that body image issues affect only heterosexual women, Looking Queer explores body issues based on gender, race, class, age, and disability. Furthermore, this groundbreaking book attests to the struggles, pain, and triumph of queer people in an open and comprehensive manner. More than 60 contributors provide their

*Downloaded from

knowledge and personal experiences in dealing with body image issues exclusive to the gay and transgender communities, including: exploring and breaking down the categories of gender and sexuality that are found in many body image issues finding ways to heal yourself and your community discovering what it means to “look like a dyke” or to “look gay” fearing fat as a sign of femininity determining what race has to do with the gay ideal discussing the stereotyped “double negative”--being a fat lesbian learning strategies of resistance to societal ideals critiquing “the culture of desire” within gay men’s communities that emphasizes looks above everything else Revealing new and complex dimensions to body image issues, Looking Queer not only discusses the struggles and hardships of gay, lesbian, bisexual, and transgendered persons, but looks at the processes that can lead to acceptance of oneself. Written by both men and women, the topics and research in Looking Queer offer insight into the lives of people you

can relate to, enabling you to learn from their experiences so you, too, can find joy and happiness in accepting your body. Visit Dawn Atkin’s website at:

Eve's Rib - Robert Pool 1994

From before birth, the brains of males and females are different in distinct, predictable ways, and these differences underlie much of the mental, emotional and psychological variation between the sexes.

Handbook of Marriage and the Family -

Marvin B. Sussman 2013-06-29

In a thoroughgoing revision of the first edition of this classic text and reference, published by Plenum in 1987, the editors have assembled a distinguished group of contributors to address such topics as past, present, and future perspectives on family diversity; theory and methods of the family; changing family patterns and roles; the family and other institutions; and family dynamics and processes.

Scapegoat - Andrea Dworkin 2000-06

On Yom Kippur, Jews of antiquity would sacrifice two goats: one as an offering to a harsh and judging god, the other turned loose in the wilderness as a carrier of the group's sins. But throughout history, says Andrea Dworkin, women and Jews themselves have served as society's scapegoats. From the Inquisition, when women were targeted as witches and Jews as heretics, to the Nazi assault on Jewish and female bodies, these groups have been doomed to the twin fates of slaughter and exile. In Scapegoat Dworkin draws on history, literature, philosophy, and politics to create a series of pairings -- homeland/home, pogrom/rape, Palestinians/prostitutes -- that elucidate the misogyny and anti-Semitism of the past millennium's atrocities. Sure to incite debate, Dworkin presents a startling new view of how Nazism waged war on the female body. She offers a profound indictment of Israel's "scapegoating" of the Palestinians and critiques

the supremacy Israeli men exert over Israeli women. Most provocatively, she imagines a world in which women betray the men of their ethnic/racial groups to fight for their own rights. Dworkin's exploration of when and how scapegoats themselves use violence will shock and disturb -- and no reader will look at the world the same way again.

Coequal and Counterbalanced - John D. Garr 2013-01-16

God created woman and man so that they would be consubstantial and coequal and that they would manifest perfectly counterbalanced complementarity. The relationship of the two halves of humanity was to be one of love, mutuality, and fulfillment. By recovering the Hebraic understanding of God's blueprint for them, both women and men can finally experience the relationship that God designed to be heaven on earth; The God-Designed Two-in-One, Coequal, Counterbalanced Partnership; Designer-Fashioned Woman; Gender Self-

Identity and Self-Fulfillment; Spare Ribs and Afterthoughts?' Marriage as Heaven on Earth. \Whatever your race, ethnicity, gender, faith, or social status, this book and the other volumes in this series will literally set you free from misconceptions that have long perverted relationships between women and men. As you reconnect with the Hebraic foundations of your faith, you will rediscover God's original design for humanity, and you will come to understand, respect, and honor the different God-designed distinctives, preferences, and roles for women and men that counterbalance and complement each other in mutuality and love.

Couples Therapy, Second Edition - Linda Berg Cross 2013-12-16

Harness the power of an integrative approach to couples counseling! Why do marriages fail? The behaviorist or cognitive therapist explains that unhappy couples have self-defeating ways of thinking about their spouses and themselves. The sociologically oriented counselor points to

the impact of social trends and dramatic changes in child-rearing and social expectations. A therapist oriented toward psychodynamics or systems theory sees the destructive patterns of childhood replayed in the marriage, with spouses taking on rigid roles. The pastoral or humanist counselor believes that partners who cannot experience self-fulfillment through commitment and trust will feel less love and grow more and more disconnected. Couples Therapy, Second Edition, brings together all these points of view to make a unified whole. This integrative approach proposes a new model of successful marriage based on four cornerstones: resiliency, social support, adaptability, and self-fulfillment. Weaving together theory and research, Couples Therapy, Second Edition, explores how common issues can lead to trouble in relationships. It suggests specific interventions so therapists can teach clients to deal with such problem areas as anger management, domestic violence, depression,

anxiety, parenting conflicts, in-laws, work pressures, and sexual dissatisfaction. *Couples Therapy, Second Edition*, offers a sound theoretical framework as well as practical ideas. Through clinical vignettes and up-to-date research, it makes the common conflicts and developmental stages of marriage so understandable that it can be profitably read by clients as well as counselors. Its invaluable resources for the couples therapist include: end-

of-chapter professional development questions therapeutic exercises answers to frequently asked professional and ethical questions intervention suggestions for the therapist self-assessment questionnaires book and video recommendations on each chapter topic Written in clear, readable prose, *Couples Therapy, Second Edition*, offers practical help for the experienced clinician as well as theoretical overviews for the counselor in training.
