

How To Approach A Tall Girl

Reflections of Gratitude - David M. Seymon 2011-05-16

This partial autobiography, written with prose and poetry, concerns a 17 year old, 195 pound, athletic senior class president. He awoke from a 4 month coma, after 4 craniotomies, as a 3 year old mentally, in a 120 pound body. It tells of his struggles and trials this young man endured in his desire to achieve his goals before brain surgery and coma. It continues as he relives many of the same type of experiences of his pre-accident days. Graduation from high school, attempting/succeeding in completing college, driving, looking for work and dating, were many of the steps he took in order to find himself. This all led to his meeting the girl of his dreams, proposing, and finally tying the knot.

"How Tall Are You?" - Don Doxsie 2023-04-04

Most people believe that being extremely tall would be fantastic. It isn't. It has its advantages, but it also has nearly as many disadvantages. It can be useful in basketball, business, and politics, and when friends are trying to find you in a crowded place. However, it's also inconvenient, expensive, sometimes harmful to one's health, and a little tedious to be bombarded almost daily with questions about how the weather is up there. In this book, the author takes a lighthearted look at the various aspects of extreme height, and those affected by it, from the perspective of someone who has spent the majority of his life towering above the crowd.

MIXED NUTS - Rick Cormier 2016-04-21

"Highly irreverent, but filled with wisdom and infused with deep caring, Mixed Nuts is a memoir of a life working in psychotherapy." "Some people assume that all therapists are new-agey hand-holders who just listen and nod like bobbleheads, then suggest an astrology reading, a gluten-free diet, and your choice of complimentary love flower or polished healing stone on your way out the door. That's not me. My job is to help fix what's broken." Speaking to the layperson and the practitioner alike, even Rick's signature humor can't hide his deep understanding of mental illness, his desire to help heal it quickly and effectively, and his pragmatic and often creative approach to treatment."

Washington DC Intelligence Analyst Chris Jung has gone fetal. Tormented by panic-fueled obsessive thoughts and buried in TPS reports, the walls of his cubicle are closing in. But when a mysterious series of

EMPs plunges the industrialized world into darkness, it saves Chris from himself and spurs him to head for the hills with his pregnant wife. Along the way, Chris meets Rita Luevano, a jaded Unitarian reverend who leads a motley horde fleeing to Monticello. Together with the remnants of a Marine battalion, Chris and Rita help establish communities of urban refugees in the Shenandoah Valley. They and the other lucky few who have escaped civilization's collapse learn the lost arts of subsistence agriculture, blacksmithing and archery in order to adapt to a world devoid of technology and instant gratification. Faced with the specter of starvation and death, Chris and Rita must face their own demons and conjure the dormant will to live even while pop tunes and TV commercials still ring fresh in their ears and they no longer have Wikipedia to give them the answers. Not everything from the old world has perished. One corporate entity, a black ops military security corporation, weathered the collapse and seeks hostile takeovers of what the burgeoning communities have scraped together. Thrust out of their suburban malaise and into a gritty struggle for survival, a tenacious spirit awakens in the haunted souls of Chris and Rita who find their authentic selves at the end of civilization.
