Sex in Development Vincanne Adams 2005-04-12 Sex in Development examines how development projects around the world intended to promote population management, disease prevention, and maternal and child health intentionally and unintentionally shape ideas about what constitutes "normal" sexual practices and identities. From sex education in Uganda to aids prevention in India to family planning in Greece, various sites of development work related to sex, sexuality, and reproduction are examined in the rich, ethnographically grounded essays in this volume. These essays demonstrate that ideas related to morality are repeatedly enacted in ostensibly value-neutral efforts to put into practice a "global" agenda reflecting the latest medical science. Sex in Development combines the cultural analysis of sexuality, critiques of global development, and science and technology studies. Whether considering the resistance encountered by representatives of an American pharmaceutical company attempting to teach Russian doctors a "value free" way to offer patients birth control or the tension between Tibetan Buddhist ideas of fertility and the modernization schemes of the Chinese government, these essays show that

attempts to make sex a universal moral object to be managed and controlled leave a host of moral ambiguities in their wake as they are engaged, resisted, and reinvented in different ways throughout the world. Learning to be Human: The Educational Legacy of John

MacMurray Michael Fielding 2016-04-14 The educational writings of John Macmurray, one of the finest 20th century philosophers of his generation, have a special relevance for us today. In similar circumstances of international crisis he argued for the central importance of education addressing fundamental issues of human purpose - how we lead good lives together, the emphasis on wisdom rather than knowledge alone, the advancement of a truly democratic culture, and the overriding importance of community in human flourishing. This remarkable collection of articles from leading international scholars includes the hitherto unpublished John Macmurray lecture - Learning to be Human - and brings together invited contributions from a range of fields and disciplines (e.g. philosophy of education, moral philosophy, care ethics, history of education, theology, religious education, future studies and learning technologies) and a number of countries across the world (e.g. Australia, the UK and the USA). Countering overemphasis on technique and its typical separation from wider human purposes emblematic of much of our current malaise, this book asks what it might mean to take the education of persons seriously and how such a perspective helps us to form judgments about the nature and worth of contemporary education policy and practice. This book was originally published as a special issue of the Oxford Review of Education.

Handbook for Human Sexuality Counseling Angela M.

Schubert 2022-09-20 Sexuality is a significant part of the human

experience, yet it is often a neglected topic in both counselor training and the counseling process. In this preeminent guide, expert clinicians with a variety of mental health and medical backgrounds write on diverse issues related to sexuality through a radical acceptance lens. Each chapter illustrates an affirmative and expansive approach to sexuality that considers clients' sexual and cultural identities and emphasizes sexual wellness. Students and professionals alike will learn how to respectfully and ethically approach sexuality considerations not commonly mentioned in the professional literature, such as sexuality and disability, healing after sexual violence, older adult sexuality, the impact of chronic illness on sexual expression, and paraphilias. The text is organized around eight comprehensive parts- Foundations; Physiological and Psychological; Attraction, Orientation, and Gender; Sexual Wellness; Sexual Agency; Approaches to Sexual Divergence; Relationships; and Education- with case examples, "Questions You Always Wanted to Ask," and additional resources interwoven throughout.

Love, Sex, and the Human Condition Lex Crane 2007 This book guides us into being fully alive by investing our sex and power drives with love and reason - and then expressing them boldly in the world.

Symptoms of Being Human Jeff Garvin 2017-11-14 Starred reviews from Publishers Weekly and Booklist * YALSA Top Ten Quick Pick for Reluctant Readers * ALA Best Fiction for Young Adults List * 2017 Rainbow List A sharply honest and moving debut perfect for fans of *The Perks of Being a Wallflower* and *Ask the Passengers*. Riley Cavanaugh is many things: Punk rock. Snarky. Rebellious. And gender fluid. Some days Riley identifies as a boy, and others as a girl. But Riley isn't exactly out yet. And between starting a new school and having a congressman father running for reelection in über-conservative Orange County, the pressure—media and otherwise—is building up in Riley's life. On

the advice of a therapist, Riley starts an anonymous blog to vent those pent-up feelings and tell the truth of what it's really like to be a gender fluid teenager. But just as Riley's starting to settle in at school—even developing feelings for a mysterious outcast—the blog goes viral, and an unnamed commenter discovers Riley's real identity, threatening exposure. And Riley must make a choice: walk away from what the blog has created—a lifeline, new friends, a cause to believe in—or stand up, come out, and risk everything. From debut author Jeff Garvin comes a powerful and uplifting portrait of a modern teen struggling with high school, relationships, and what it means to be human.

Applications of Flow in Human Development and Education

Mihaly Csikszentmihalyi 2014-08-08 The third volume of the collected works of Mihaly Csikszentmihalyi covers his work on the application of flow in areas that go beyond the field of leisure where the concept was first applied. Based on his personal experience with schooling and learning, as well as that of many others and contrary to what Cicero claimed, Csikszentmihalyi arrived at the conclusion that instead of taking pride in making the roots of knowledge as bitter as possible, we should try to make them sweeter. Just as flow became a popular and useful concept in voluntary activities, it could likewise be applied in education with the end result of young people being more likely to continue learning not just because they have to but because they want to. This volume brings together a number of articles in which Csikszentmihalyi develops ideas about how to make education and more generally the process of learning to live a good life, more enjoyable. Since theory is the mother of good practice, the first eleven chapters are devoted to theoretical

reflections. Some are general and explore what it means to be a human being, what it means to be a person, when we look at life from the perspective of flow. Others are more narrowly focused on such topics as consumption, education, teaching and learning. They help laypeople reflect how they can arrange their lives in such a way as to leave a small ecological footprint while getting the most enjoyment. The second section of the volume contains a dozen empirical articles on similar topics. They deal with the development of identity and self-worth; with the formation of goals and motivation; with loneliness and family life.

The Dawning of a New Dark Age Mark Alexander 2003-11-15

FOREWORD On September 11, 2001, Muslim terrorists launched an attack on the United States to punish it for being what Osama bin Laden considered the land of the infidels! In fact, this attack was an attack on the entire Western world and, even more important, it was an attack on Western civilization, the underlying objective being to take civilization back fourteen hundred years to a time of great glory for the Islamic world. In the wake of the attack by young Muslim extremists, which resulted in the collapse of the twin towers of the World Trade Center in Manhattan, our leaders attempted to assure us that the terrorists did not represent the entire Muslim world. It was said that they were the actions of a minority, of an extreme fringe group. It was, and continues to be, troubling, however, that we have heard very little strong condemnation coming from the supposed moderate Muslim community. Who are these moderates? Why have they not spoken out more vociferously? Do they really exist? When will they speak out with moral indignation? Indeed, will they ever? For most Westerners Islam is thought to be just another world religion, equal to Christianity and Judaism. But is this really the case? Upon closer study, Islam seems to be far different from the other two religions. Certainly no one would accuse Muslims of

being tolerant, non-judgmental, non-violent or peace-loving! While Muslims have been allowed to build hundreds of mosques in Western countries, Christian churches may only rarely be built, if ever, in Muslim countries! Indeed in some Muslim countries such as the Sudan, it is official government policy to demolish churches! In addition, it is difficult to believe that any world religion would advocate treating women as second-class citizens, and actually get away with it! The concept of brotherhood in Islam is strong. The posture advocated by Prophet Mohammed in the Koran toward non-Muslims, however, is to seek them out and annihilate them. The phenomenon of suicide bombers is at once both pathetic and chilling. On the one hand, it is pathetic that young Muslims are taught that they can gain entrance into paradise by taking peoples lives in such a gruesome manner. Carnal pleasures, of course, await the males upon entrance into heaven! On the other hand, it is chilling to think that there are any people living in the 21st century ready to teach and encourage such savagery. What is the supposed theological justification for holding to such beliefs? Indeed, is there any such thing in Islam as theology in which the tenets of the faith are examined critically? Isnt it the case, rather, that the teachings of Prophet Mohammed are accepted literally, and without question? In his book, *The Dawning of a New Dark Age*, Mark Alexander explores these questions, and often finds disturbing answers. Unlike many authors on the subject, Mark actually lived and worked among Muslims for many years; so he has first-hand knowledge of the religion and culture. While on his tours of duty in the Middle East, Mark immersed himself in Islam and Arabic culture, studying the religion both from Occidental and Oriental perspectives. He familiarized himself not only with the Koran, but also with the beliefs and attitudes of Muslims in the street. This experience has given him unusually clear insights into the aspirations of the Muslim world. Marks conclusions will not be comforting to those who would like to believe that the long-term

threat to the West is limited to the aspirations of a few fundamentalist terrorists. Douglas Kennedy, Ph.D.,

Intellectual Disability and Being Human Chrissie Rogers

2016-02-26 Intellectual disability is often overlooked within mainstream disability studies, and theories developed about disability and physical impairment may not always be appropriate when thinking about intellectual (or learning) disability. This pioneering book, in considering intellectually disabled people's lives, sets out a care ethics model of disability that outlines the emotional caring sphere, where love and care are psycho-socially questioned, the practical caring sphere, where day-to-day care is carried out, and the socio-political caring sphere, where social intolerance and aversion to difficult differences are addressed. It does so by discussing issue-based everyday life, such as family, relationships, media representations and education, in an evocative and creative manner. This book draws from an

understanding of how intellectual disability is represented in all forms of media, a feminist ethics of care, and capabilities, as well as other theories, to provide a critique and alternative to the social model of disability as well as illuminate care-less spaces that inhabit all the caring spheres. The first two chapters of the book provide an overview of intellectual disability, the debates surrounding disability, and outline the model. Having begun to develop an innovative theoretical framework for understanding intellectual disability and being human, the book then moves onto empirical and narrative driven issue-based chapters. The following chapters build on the emergent framework and discuss the application of particular theories in three different substantive areas: education, mothering and sexual politics. The concluding remarks draw together the common themes across the applied chapters and link them to the overarching theoretical framework. An important read for all those studying and researching intellectual or learning disability, this book will be an essential resource in sociology, philosophy, criminology (law), social work, education and nursing in particular.

Sex Guides Patty Campbell 2017-04-07 The history of the sex guide for adolescents documents the quite unconscious movement of Western culture's ideas about sex and youth, revealing the heritage of our own sexual beliefs and codes of behaviour. The first section of this book, first published in 1986, traces the development of the sex guide, examining 400 books

from 1892 to the 1980s. The second section comprises a detailed analysis of the patterns, content and usefulness of all the contemporary manifestations of the genre. The history of the teen sex manual is a fascinating revelation of American attitudes towards adolescent sexuality.
