No obstante, las matemáticas son también una de las materias que tradicionalmente presentan mayor dificultad para los estudiantes. Pensando en ello, Editores Mexicanos Unidos ponen en sus manos matemáticas para primaria, sexto grado, el cual incluye los temas que los programas de la Secretaría de Educación Pública tiene previstos, expuestos con claridad didáctica y pedagógicamente. Los ejemplos, definiciones, ejercicios y explicaciones están planteados para que el estudiante cuente con una herramienta que le permita superar las dificultades de comprensión, reafirme lo que ha aprendido y avance consciente y de forma progresiva en esta materia.

**Equidad y enseñanza de las matemáticas** 1997 La cuestión de cómo proporcionar una escolarización equitativa a las mujeres ya las minorías lingüísticas ha vuelto al centro de la investigación, la política educativa y los debates con ella relacionados. Este volumen reúne un conjunto de importantes investigaciones para examinar el problema de la justicia y la igualdad de oportunidades desde la educación matemática, situándose más allá de los antiguos paradigmas y formas de ver la cuestión. La primera parte, dedicada a problemas culturales más generales, analiza propuestas de enseñanza de las matemáticas dirigidas a estudiantes de culturas, necesidades e intereses diferentes. La segunda parte estudia las cuestiones de género en matemáticas desde diversas perspectivas, incluida la feminista. La última parte se dedica al lenguaje y las matemáticas, prestando una gran atención a las situaciones de bilingüismo y de minorías lingüísticas. A lo largo de todo el libro se plantean asimismo los problemas de la potenciación profesional de los docentes y de la recualificación e intensificación de su trabajo.

**Enseñar y aprender con interés** 2007 En una escuela el interés del maestro por enseñar y de los estudiantes por aprender es personal: nadie lo da o lo impone, es el acto más libre y más autónomo. En este libro, los autores de Convivencia Educativa demuestran que es posible, en telesecundarias incompletas de Chihuahua y Zacatecas y en escuelas indígenas, alentar el interés de maestros y estudiantes en libertad y con autonomía. Sin cambiar programas o textos, sin apoyarse en nuevas tecnologías, con maestros ordinarios y en circunstancias normales, se logró enseñar y aprender con interés, que es la meta deseada en un país marcado por la desigualdad social y el desaliento con los resultados de la educación pública.

**Pluriculturalidad y aprendizaje de la matemática en América Latina** Alfonso E. Lizarzaburu 2001 El aprendizaje de la matemática es una necesidad sentida y percibida por las poblaciones indígenas, como se advierte en los testimonios que recogen los autores de esta obra. Esto se debe a que la ciencia y la tecnología son el núcleo y el motor de la actual sociedad del conocimiento. Aprender matemática es, ante todo, adquirir poder para

defenderse de la exclusión y autoafirmarse. ¿Cómo podemos adoptar decisiones inteligentes en nuestra vida diaria o influir en la política nacional e internacional sin una adecuada educación científico-tecnológica? De lo que se trata, en definitiva, es de responder a las preguntas: ¿es posible que los amerindios se apropien de la matemática e incluso contribuyan a su desarrollo sin renunciar a sus culturas específicas? y ¿es posible ser a la vez matemático y amerindio auténticos sin tener que adoptar, necesariamente, la cultura denominada del “progreso universal”? Éste es el tema desarrollado en el presente libro, fruto de una iniciativa surgida hace varios años con el fin de efectuar un balance de la situación educativa de los pueblos indígenas, elaborar nuevos enfoques conceptuales y diseñar respuestas pedagógicas adecuadas a sus necesidades y expectativas. Para lograrlo se ha implicado a los propios sujetos de los programas educativos desarrollados en las áreas indígenas y zonas populares de América Latina, contando con la participación de investigadores y especialistas en la materia. En la obra, coordinada por Alfonso E. LIZARZABURU y Gustavo ZAPATA SOTO, han colaborado los siguientes autores: Ubiratan D’AMBROSIO, André CAUTY, Kleber GESTEIRA E MATOS, Gustavo GOTTRET, Terezinha NUNES, Adán PARI RODRÍGUEZ, Ruperto R. ROMERO, Joachim SCHROEDER, Isabel SOTO CORNEJO y Martha VILLAVICENCIO UBILLÚS.
