Party Identification and Beyond Ian Budge 2010-02-01 First published in 1976, this classic volume of original essays provides a unique and comprehensive review of the approaches and assumptions that dominate the field of election studies and voting behaviour. Critical reviews of theory and established research are combined with innovative and original studies of a variety of European countries, as well as North America. The volume presents valuable comparative data and methodological insights, including statistical analyses of voting data and critical accounts of major approaches to the representation of voting and party competition. These include party identification (the socio-psychological approach); dimensional analysis (the production of party spaces based on social and political cleavages); and rational choice analysis (the interaction between voters and parties within a policy space). This edition includes a new introduction by Ian Budge.

100 New Artists Francesca Gavin 2011-08-24 Featuring artists born after 1970 this book brings together the people who are creating the aesthetics of the next decade. These are artists who have passed the post-art school no man's land and are making waves in the contemporary art world. It includes an innovative new generation of artists who work on a global scale from Madrid to Athens, Los Angeles to Paris, Berlin to Sao Paulo. There are members of the Bowery school of New York's Lower East Side such as Agathe Snow, the new wave of underground Berlin artists that include Ozlem Altin and Sven John, and new installation artists to emerge post-Murakami in Tokyo, like Teppei Kaneuji. Including painting, sculpture, installation art, photography, performance work, collage, video and new technology, 100 New Artists brings together the new themes, media, imagery and ideas emerging in contemporary art practice. This is a vital new wave of art post-conceptualism, post-minimalism, post-pop. Not only a snapshot of art at this moment, 100 New Artists is a place to discover the people who will define our aesthetic future.

Political Leadership Jean Blondel 1987 "Political leaders are the most universal, recognized, and talked about element of political life. However, the general analysis of political leadership has been little advanced. In this book Professor Blondel provides a general framework for the systematic study of leadership to make possible future empirical study and comparative analysis of political leadership. After examining the current state of political leadership studies, Professor Blondel categorizes the leaders of the world taking into account both their goals and the constraints and opportunities resulting from the environment. Important features and influences on leadership are identified: the sources of personal power, the role of leaders' own psychology and perspective, the instruments of power available to leaders, their relationship with subordinates and citizens, the influence of institutions on leadership and the impact of leaders"--Provided by publisher.

The Sayings Gospel Q in Greek and English James McConkey Robinson 2001 The Sayings Gospel Q in Greek and English with Parallels from the Gospels of Mark and Thomas is the outcome of a generation's work by the International Q Project, in reconstructing the collection of sayings ascribed to Jesus (and some to John) that lies behind the Gospels of Matthew and Luke. It thus makes available in a convenient form the most important source for reconstructing the message of Jesus'

original Galilean followers, as they proclaimed anew after his death his message of God's reign. Q is, as a result, the most important single source for the study of the historical Jesus. It should be in the hands of every student of theology and of every layperson seriously interested in knowing more about Jesus. This small volume presents, on facing pages, the Greek and English reconstruction of the text of Q. It is in a simplified and more readable format than its original massive publication of 1990, *The Critical Edition of Q: Synopsis including the Gospels of Matthew and Luke, Mark and Thomas with English, German and French Translations of Q and Thomas*, edited by James M. Robinson, Paul Hoffmann, and John S. Kloppenborg, Managing Editor Milton C. Moreland, at Peeters and Fortress Press.

Presented at UNSW Galleries, Sydney and in the online series 'Forms of Being Together', the project foregrounds how LGBTQI+ communities create alternative networks of support through various creative and resourceful means. This reader features companion texts by Wilfred Brandt, Daniel Marshall, Timothy Roberts, Sophie Robinson and Verónica Tello, alongside artists and collaborators featured in the exhibition project.

Celebrity Capital Barrie Gunter 2014-09-25 Celebrities attract the attention of commercial interests and other public figures. They receive payments from sponsors to endorse brands. They are sought out to appear with politicians during election campaigns. They are used to promote health messages. In other words, celebrities are often perceived to possess qualities that give them special value or what we will refer to here as 'celebrity capital'. This means that celebrities are regarded as being able to add premium value to specific objects, events, and issues and hence render these items more valuable or effective. Employing an interesting and new approach to the growing scholarly interest in celebrity culture, Barrie Gunter uses the idea of value as expressed through the term 'capital'. Capital usually refers to the monetary worth of something. Celebrity capital however can be measured in economic terms but also in social, political and psychological terms. Research from around the world has been collated to provide an evidence-based analysis of the value of celebrity in the 21st century and how it can be systematically assessed. Including further reading for students, key points and end of chapter discussion questions, Gunter creates the first methodology to assess the value of fame.

Expositional Modes and Temporal Ordering in Fiction Meir Sternberg 1993 .."" . this is one of the few books on narrative worth reading and rereading, a study that will make -- or should make -- a difference in the way we read narrative."" -- Nineteenth Century Fiction ""This is a remarkable book: original, clear-sighted, and luminously focused on a subject that has never been explored nearly so systematically or intensively.""A -- Dorrit Cohn, Harvard University This book, long out of print, is now available in a paperback edition, providing another window into one of the most exciting minds working in the areas of literary and biblical literary criticism.

Poor, But Sexy Geoff Stahl 2014 This edited collection of essays presents a wide-ranging examination of the nature of scenes and subcultures in contemporary Berlin. It touches upon a number of key debates about cultural life in the city, drawing from examples specific to Berlin itself but germane also to those interested in discussions about broader issues of urban living.

The Nazis Piotr Ukleński 1999 Piotr Ukleński, a New York based artist, has put together a most surprising and at the same time simple series of pictures. With them he has created an art book consisting of 160 portraits of movie actors playing Nazis. This volume is as much about history as it is about the industry of entertainment. In 1998, *The Observer*, London, wrote about these

compelling and at the same time enstranging portraits: "If you are an actor, chances are that you will play a Nazi, or at least a cruel German officer in the Second World War. How do you make yourself look the part? First comes the matter of expression. Mug up on verbal cliches: 'ice-cold eyes', 'thin, compressed lips', with if possible, 'the hint of cynical smile playing around the corners of the mouth'. An 'air of cold command', rigid jaw muscles denoting 'utter ruthlessness', a tiny flare of nostrils to suggest unspeakable depths of sadism. Fine! Now put on the gear: the tunic with its collar-tabs of SS lightning flashes, the tall black cap with eagle, swastika and death's head.

Stunning! Now all you need is that gargling accent unlike any noise ever uttered by a real German."

Children and the Good Life Sabine Andresen 2010-09-21 In April 2009, an inspiring international conference was held at Bielefeld on the topic "Children and the Good Life: New Challenges for Research on Children." The focus was on how we can define and measure a "good life" for children growing up in the modern world. This tied in with discussions on how convincing universalistic theories are, what research on children can contribute, and how children themselves can be integrated into the research process and debates on the "good life." Discourses and the production of knowledge on the "good life" or "well-being" require a guiding idea or a theoretical frame. This frame can come from the feminist ethic of care or from the Human and Children's Rights Convention, from the idea of welfare, or from the Capability Approach.

Language Engineering and Translation Juan C. Sager 1994-04-22 At a time when information technology has become a regular tool of specialised translators in all aspects of their work, it is useful to place the activity of technical translation into its appropriate environment and to describe it from the point of view of its role in the broader context of communication in which it occurs. The advent of automated alternatives to human translation has fundamentally affected the profession, its products and the relationship between translators and their clients. This book presents and discusses the process of translation against this background. The context in which translation is normally studied is widened in order to re-examine the process of translation as part of interlingual text production and to analyse the manner in which the new tools affect the product of translation. This book is of particular relevance in modern translator training courses. Contents 1. The language industry and translation, 2. Aspects of language, 3. Elements of communication theory, 4. A theory of text types and messages, 5. The nature of translation, 6. Specifications: Factors influencing the translation, 7. Preparation for translation, 8. Steps in translation, 9. Human and Machine Translation, 10 Pragmatic circumstances of automation, 11. Translation in an information technology environment. Bibliography + Index.

Markets without Limits Jason F. Brennan 2015-08-20 May you sell your vote? May you sell your kidney? May gay men pay surrogates to bear them children? May spouses pay each other to watch the kids, do the dishes, or have sex? Should we allow the rich to genetically engineer gifted, beautiful children? Should we allow betting markets on terrorist attacks and natural disasters? Most people shudder at the thought. To put some goods and services for sale offends human dignity. If everything is commodified, then nothing is sacred. The market corrodes our character. Or so most people say. In *Markets without Limits*, Jason Brennan and Peter Jaworski give markets a fair hearing. The market does not introduce wrongness where there was not any previously. Thus, the authors claim, the question of what rightfully may be bought and sold has a simple answer: if you may do it for free, you may do it for money. Contrary to the conservative consensus, they claim there are no inherent limits to what can be bought and sold, but only restrictions on how we buy and sell. *Between Marx and Coca-Cola* Axel Schildt 2006 In the 1960s and 70s, a new youth consciousness emerged in Western Europe which gave this period its distinct character. This volume demonstrates how international developments fused with national traditions, producing specific youth cultures that became leading trendsetters of emergent post-industrial Western societies.

Leadership and Organizational Change Sandra G. L. Schrujjer 1999 The eighties and nineties have witnessed a renewed interest in the phenomenon of leadership. This special issue provides an overview of research on the concepts of transformational leadership, while focusing on conceptual, methodological and measurement problems. The effectiveness of various leadership styles is

assessed, placing the concept against the background of changing organizations and changing environments.

How to Be a Man Glenn O'Brien 2011-04-05 The ultimate sartorial and etiquette guide, from the ultimate life and style guru. By turns witty, sardonic, and always insightful, Glenn O'Brien's advice column has been a must-read for several generations of men (and their spouses and girlfriends). Having cut his teeth as a contributor at Andy Warhol's Interview in its heyday, O'Brien sharpened them as the creative director of advertising at the hip department store Barneys New York for ten years before starting his advice column at Details magazine in 1996. Eventually his column, "The Style Guy," migrated to its permanent home at GQ magazine, where O'Brien dispenses well-honed knowledge on matters ranging from how to throw a cocktail party (a diverse guest list is a must), putting together a wardrobe for a trip to Bermuda (pack more clothes for less dressing), or when it is appropriate to wear flip-flops in public (never). *How To Be a Man* is the culmination of O'Brien's thirty years of accumulated style and etiquette wisdom, distilled through his gimlet eye and droll prose. With over forty chapters on style and fashion (and the difference), on dandies and dudes, grooming and decorating, on how to dress age-appropriately and how to age gracefully, this guide is the new essential read for men of all ages.

The Happy End of Comedy Zvi Jagendorf 1984 The Happy End of Comedy is an analysis of the most necessary of all comic conventions -- the happy ending. The book begins by assuming that the study of the ways three major playwrights brought their works to a close will reveal much about their conception of the artifice of theater and comedy and about their sense of human experience, which informs this artifice. Happy End is thus both a study of the uses and variations on a convention and a definition of each playwright's comic ethos. -- from book jacket.

Money and Magic Hans Christoph Binswanger 1994 In *Money and Magic*, Binswanger elucidates Goethe's remarkable prediction that, following the Industrial Revolution, economic society would be built on the transformation of natural resources into a continually expanding money supply. Yet Goethe also cautioned of the results should modern society exploit these resources and fail in its responsibility to the natural environment. Goethe meant Faust to be a warning to modern economic society.

Political Protest and Cultural Revolution Barbara Epstein 1993-09-03 From her perspective as both participant and observer, Barbara Epstein examines the nonviolent direct action movement which, inspired by the civil rights movement, flourished in the United States from the mid-seventies to the mid-eighties. Disenchanted with the politics of both the mainstream and the organized left, and deeply committed to forging communities based on shared values, activists in this movement developed a fresh, philosophy and style of politics that shaped the thinking of a new generation of activists. Driven by a vision of an ecologically balanced, nonviolent, egalitarian society, they engaged in political action through affinity groups, made decisions by consensus, and practiced mass civil disobedience. The nonviolent direct action movement galvanized originally in opposition to nuclear power, with the Clamshell Alliance in New England and then the Abalone Alliance in California leading the way. Its influence soon spread to other activist movements—for peace, non-intervention, ecological preservation, feminism, and gay and lesbian rights. Epstein joined the San Francisco Bay Area's Livermore Action Group to protest the arms race and found herself in jail along with a thousand other activists for blocking the road in front of the Lawrence Livermore Laboratory. She argues that to gain a real understanding of the direct action movement it is necessary to view it from the inside. For with its aim to base society as a whole on principles of egalitarianism and nonviolence, the movement sought to turn political protest into cultural revolution.

Tales for Transformation Johann Wolfgang von Goethe 2001 In 1768, at the age of nineteen, Johann Wolfgang von Goethe began to study hermetic literature. This exploration had a huge impact on the early aesthetic education of Europe's great man of letters, the last renaissance titan. In the years that followed, Goethe immersed himself in the hermetic tradition, and even set up an alchemic laboratory and attempted to make an elixir of immortality. Although he eventually gave up his

alchemical experiments, he was to believe in the validity of the Great Work for the rest of his life. Alchemic symbolism is prominent in many of Goethe's works, and it is particularly abundant in the tales of self-mastery and transformation presented in this collection. Included here are new translations of "Fairy Tale" ("Märchen"), Goethe's alchemical allegory; "The Counselor" and "The New Melusina," stories of temptation and the tests of love; "The Good Woman," a curious discourse on aesthetics and the rights of women; and the lyrical prose masterpiece "Novelle." Here also for the first time in English is "The Magical Flute," Goethe's sequel to Mozart's opera, with themes of initiation, the magical power of music, and liberated genius.

The Frenzy of Renown Leo Braudy 1997-11-25 "Remarkably ambitious . . . an impressive tour de force." —Washington Post Book World For Alexander the Great, fame meant accomplishing what no mortal had ever accomplished before. For Julius Caesar, personal glory was indistinguishable from that of Rome. The early Christians devalued public recognition, believing that the only true audience was God. And Marilyn Monroe owed much of her fame to the fragility that led to self-destruction. These are only some of the dozens of figures that populate Leo Braudy's panoramic history of fame, a book that tells us as much about vast cultural changes as it does about the men and women who at different times captured their societies' regard. Spanning thousands of years and fields ranging from politics to literature and mass media, *The Frenzy of Renown* explores the unfolding relationship between the famous and their audiences, between fame and the representations that make it possible. Hailed as a landmark at its original publication and now reissued with a new Afterword covering the last tumultuous decade, here is a major work that provides our celebrity-obsessed, post-historical society with a usable past. "Expansive . . . Braudy excels at rocketing a general point into the air with the fuel of drama." —Harper's

Culture and Agency Margaret Scotford Archer 1996-09-26 Margaret Archer's *Culture and Agency* was first published in 1988, and proved a seminal contribution to social theory and the case for the role of culture in sociological thought. Described in *Sociological Review* as 'a timely and sophisticated treatment', the book showed that the 'problems' of culture and agency, on the one hand, and structure and agency, on the other, could be solved using the same analytical framework. In this revised edition of *Culture and Agency*, Margaret Archer contextualises her argument in 1990s cultural sociology and links it explicitly to her latest book, *Realist Social Theory: The Morphogenetic Approach* (Cambridge University Press, 1995).

My Father's Country Wibke Bruhns 2009-11-10 In August 1944, Hans Georg Klamroth was executed for his part in the 20 July plot to assassinate Hitler. Wibke Bruhns, his youngest daughter, was six years old at the time. Decades later, watching a documentary about the events of 20 July, images of her father in the Third Reich People's Court appeared on the screen - and she realises she never knew him. In *My Father's Country*, Bruhns tells of her search for her father. Returning to her ancestral home in Halberstadt, Northern Germany, she retraces her family's story from Kaiser Wilhelm to the end of World War Two, discovering old photographs, letters and diaries, which she uses to piece together a unique and unforgettable family epic.

Teaching Translation and Interpreting 2 Cay Dollerup 1994-07-01 Selected papers from this second conference on Translator and Interpreter Training. With contributions from five continents, the articles deal with global challenges, taking into account the role of the translator in societies knit together by one tongue and those in which languages are the repositories of national cultures, such as India. The main merit of this volume is that it shows how translator training is tackled in the main translator training courses around the world, what requirements are made on the students and what solutions are given. The various approaches provide a wealth of translator training ideas.

Complementing the first volume of papers from the Language International conference, this second volume deals with a wide variety of aspects in this interdisciplinary field of study: dubbing, subtitling, simultaneous/consecutive interpreting, court interpreter training, linguistic features, cognitive aspects, cultural aspects, terminology and specialisation, computeraided translation in practice, translation procedures at the European Commission, etc.

Fascism Past and Present, West and East Roger Griffin 2006-04-27 In the opinion of some historians the era of fascism ended with the deaths of Mussolini and Hitler. Yet the debate about its nature as a historical phenomenon and its value as a term of historical analysis continues to rage with ever greater intensity, each major attempt to resolve it producing different patterns of support, dissent, and even hostility, from academic colleagues. Nevertheless, a number of developments since 1945 not only complicate the methodological and definitional issues even further, but make it ever more desirable that politicians, journalists, lawyers, and the general public can turn to "experts" for a heuristically useful and broadly consensual definition of the term. These developments include: the emergence of a highly prolific European New Right, the rise of radical right populist parties, the flourishing of ultra-nationalist movements in the former Soviet empire, the radicalization of some currents of Islam and Hinduism into potent political forces, and the upsurge of religious terrorism. Most monographs and articles attempting to establish what is meant by fascism are written from a unilateral authoritative perspective, and the intense academic controversy the term provokes has to be gleaned from reviews and conference discussions. The uniqueness of this book is that it provides exceptional insights into the cut-and-thrust of the controversy as it unfolds on numerous fronts simultaneously, clarifying salient points of difference and moving towards some degree of consensus. Twenty-nine established academics were invited to engage with an article by Roger Griffin, one of the most influential theorists in the study of generic fascism in the Anglophone world. The resulting debate progressed through two 'rounds' of critique and reply, forming a fascinating patchwork of consensus and sometimes heated disagreement. In a spin-off from the original discussion of Griffin's concept of fascism, a second exchange documented here focuses on the issue of fascist ideology in contemporary Russia. This collection is essential reading for all those who realize the need to provide the term 'fascism' with theoretical rigor, analytical precision, and

empirical content despite the complex issues it raises, and for any specialist who wants to participate in fascist studies within an international forum of expertise. The book will change the way in which historians and political scientists think about fascism, and make the debate about the threat it poses to infant democracies like Russia more incisive not just for academics, but for politicians, journalists, and the wider public.
