The International Labour Organization and the Quest for Social Justice, 1919-2009 - Gerry Rodgers 2009

This book tells the story of the International Labour Organization, founded in 1919 in the belief that universal and lasting peace goes hand in hand with social justice. Since then the ILO has contributed to the protection of the vulnerable, the fight against unemployment, the promotion of human rights, the development of democratic institutions and the improvement of the working lives of women and men everywhere. In its history the ILO has sometimes thrived, sometimes suffered setbacks, but always survived to pursue its goals through the political and economic upheavals of the last 90 years.

Telework in the 21st Century - Jon C. Messenger 2019

Technological developments have enabled a dramatic expansion and also an evolution of telework, broadly defined as using ICTs to perform work from outside of an employer's premises. This volume offers a new conceptual framework explaining the evolution of telework over four decades. It reviews national experiences from Argentina, Brazil, India, Japan, the United States, and ten EU countries regarding the development of telework, its various forms and effects. Topics covered include the role of culture in long-term economic growth, globalization and economic governance, human development, and the effects of the distribution of productive wealth on the pace of development. Economic Reform in Vietnam - Keith Griffin 2016-01-20

Vietnam, along with China, stands out as a rare success story among transition economics. This authoritative study of the reform process since 1989 pays particular attention to the way the macroeconomics framework can contribute to an environment that encourages human development and helps to reduce poverty. Thus there are chapters on macroeconomics reforms, international trade policies, the role of the state, rural development, education and health, environmental issues and poverty and gender inequality. Although areas of weakness are indicated, emphasis is placed on the success Vietnam has experienced compared to other transition economies. The lessons of both the successes and failures of the reform process for policymakers elsewhere are outlined.

Governing the Ungovernable - Ishrat Husain 2018

Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of the last twenty-five years, and through a process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring some key public institutions that pertain to accountability, transparency, security, economic growth, and equity.

Solar and Space Physics - National Research Council 2014-09-25

In 2010, NASA and the National Science Foundation asked the National Research Council to assemble a committee of experts to develop an integrated national strategy that would guide agency investments in solar and space physics for the years 2013-2022. That strategy, the result of nearly 2 years of effort by the survey committee, which worked with more than 100 scientists and engineers on eight supporting study panels, is presented in the 2013 publication, *Solar and Space Physics: A Science for a Technological Society*. This booklet, designed to be accessible to a broader audience of policymakers and the interested public, summarizes the content of that report.
